

ANNUAL REPORT 2025

 **Flowers**
FOODS

FELLOW SHAREHOLDERS:

We concluded 2025 on a strong note, achieving results at the high end of our expectations. To continue this momentum, we remain focused on our four strategic priorities — developing our team, focusing on brands, prioritizing margins, and pursuing smart mergers and acquisitions (M&A).

DEVELOPING OUR TEAM

I want to take a moment to express my heartfelt gratitude to our employees. Their hard work, dedication, and unwavering commitment have been instrumental in driving our results. I'd also like to recognize the contributions of our long-serving CFO, Steve Kinsey, who retired at the end of 2025. We've welcomed Anthony Scaglione as our new CFO, who is already making a positive impact across the organization with his energy and vision. We're confident his strategic insight will help us continue to navigate an increasingly complex landscape.

FOCUSING ON BRANDS

Our brands continued to perform well in a challenging environment. We are leveraging the strength of our leading brands to uncover growth opportunities in an otherwise soft category. And that investment is yielding positive results, enabling strong performance in several subcategories. We aim to drive further growth by expanding into faster-growing segments like better-for-you snacking, and stabilizing and growing the cake business by harnessing the power of the Wonder brand.

PRIORITIZING MARGINS

Through diligent efforts to enhance efficiencies, we notably reduced adjusted SD&A as a percentage of sales for the year. The improvement was driven by initiatives throughout the company, as we work to align our cost base with changing demand. We will remain vigilant about managing costs. In addition to cost savings, the successful execution of our portfolio strategy, whereby we work to increase the percentage of sales of higher margin branded retail products, is critical for long-term margin growth.

PURSUING SMART M&A

We closed on our acquisition of Simple Mills in 2025, and we couldn't be more excited about the addition to our team and product portfolio. As a leading natural snack company, Simple Mills is perfectly positioned to appeal to consumers looking for high quality, delicious, and better-for-you snacks. And we intend to meet that growing demand by bringing innovation to extend its product portfolio and expanding distribution. The integration of Simple Mills is progressing well, and the brand continues to resonate with today's health-conscious consumers.

While we had a strong close to 2025, we anticipate ongoing category headwinds to pressure results in 2026. In response, we are proactively conducting a comprehensive review of our operations aimed at positioning us to reignite top-line growth and expand margins. While the economic landscape remains uncertain, we believe that as consumer confidence rebounds, we will be well-positioned to grow market share and enhance profitability over time. Our dedicated team is committed to executing these initiatives with precision and passion, ensuring that we not only meet the current challenges but also lay a strong foundation for sustainable growth.

A. RYALS MCMULLIAN
Chairman and CEO

OUR MISSION

TO DELIGHT CONSUMERS WITH DELICIOUS BAKED FOODS.

OUR VISION

WE STRIVE TO BE A BOLD, VISIONARY BAKED FOODS COMPANY WITH THE CONSUMER AT THE CORE OF EVERYTHING WE DO.

FRESH. FORWARD. FLOWERS.

Fresh. Forward. Flowers. reflects our ongoing transformation into a consumer-focused, innovative, and ever-evolving business. As our company continues to progress, we are guided by our mission, vision, and values and a legacy that spans more than a century.

WE ARE PARTNERS

We deliver quality foods to our consumers and the best service to our customers.

BUSINESS: The second-largest producer and marketer of packaged bakery foods in the U.S. Proven ability to grow share in underdeveloped product segments and geographic regions.

MARKET: Retail and foodservice. Dual distribution capability – Fresh bakery foods distributed daily through a DSD network and fresh and frozen products delivered to customers' warehouses nationwide.

WE ARE VISIONARIES

We imagine the delicious, creating the unique food experiences consumers crave.

TOP BRANDS: Nature's Own, Dave's Killer Bread, Canyon Bakehouse, Simple Mills, Wonder, Tastykake. Leading brands in a large and stable consumer goods category.

BROAD PRODUCT RANGE: Baking mixes, bagels, breads, buns, English muffins, rolls, snack items (bars, cakes, cookies, crackers), and tortillas

WE ARE CREATORS

We put insight into action, driving innovation to continuously improve our operations.

BAKERIES: 44 bakeries in 19 states
Executing initiatives to optimize portfolio and network profitability with a focus on managing costs, leveraging data-driven insights, and shifting mix to higher margin branded products.

WE ARE EVOLVING

Entering a new era of growth, we have a clear strategy to expand the power of our brands and the scope of our capabilities.

STRATEGIC PRIORITIES:

Develop Our Team | Invest in our team to drive portfolio optimization through brand growth, innovation, and enhanced capabilities.

Focus on Brands | Pursue targeted innovation and marketing to enhance relevancy and opportunistically grow share.

Prioritize Margins | Orienting asset base to higher margin products, reducing network complexity, and enhancing profitability.

Pursue Smart M&A | Employ a disciplined approach to acquisitions designed to enhance our branded portfolio, improve our margin profile, and broaden our geographic reach.

44 BAKERIES | NATIONWIDE DISTRIBUTION

FLOWERS BAKERIES

WE ARE COMMITTED

Our team is the essential ingredient to our success. Doing things the right way – every day.

EMPLOYEES: Approximately 10,300*

OUR VALUES:

HONESTY & INTEGRITY

We always do what's right, maintaining high standards of ethical conduct.

PASSION

We achieve our goals with energy and enthusiasm.

RESPECT & INCLUSION

We create an inclusive and respectful culture.

HUMILITY

We strive to serve and learn from others as we pursue common goals.

SUSTAINABILITY

We are committed to building a sustainable future for our team, our company, and our communities.

Forward-Looking Statements

Statements contained in this filing and certain other written or oral statements made from time to time by Flowers Foods, Inc. (the “company”, “Flowers Foods”, “Flowers”, “us”, “we”, or “our”) and its representatives that are not historical facts are forward-looking statements as defined in the Private Securities Litigation Reform Act of 1995. Forward-looking statements relate to current expectations regarding our business and our future financial condition and results of operations and are often identified by the use of words and phrases such as “anticipate,” “believe,” “continue,” “could,” “estimate,” “expect,” “intend,” “may,” “plan,” “predict,” “project,” “should,” “will,” “would,” “is likely to,” “is expected to” or “will continue,” or the negative of these terms or other comparable terminology. These forward-looking statements are based upon assumptions we believe are reasonable.

Forward-looking statements are based on current information and are subject to risks and uncertainties that could cause our actual results to differ materially from those projected. Certain factors that may cause actual results, performance, liquidity, and achievements to differ materially from those projected are discussed in this Annual Report on Form 10-K (the “Form 10-K”) and may include, but are not limited to:

- unexpected changes in any of the following: (i) general economic and business conditions; (ii) the competitive setting in which we operate, including advertising or promotional strategies by us or our competitors, as well as changes in consumer demand; (iii) interest rates and other terms available to us on our borrowings; (iv) supply chain conditions and any related impact on energy and raw materials costs and availability and hedging counter-party risks; (v) relationships with or increased costs related to our employees and third-party service providers; (vi) laws and regulations (including environmental and health-related issues and the impacts of tariffs, including retaliatory tariffs); and (vii) accounting standards or tax rates in the markets in which we operate;
- the loss or financial instability of any significant customer(s), including as a result of product recalls or safety concerns related to our products;
- changes in consumer behavior, trends and preferences, including health and whole grain trends and consumer buying habits, the movement toward less expensive store branded products, and the continued reduction of purchases in the fresh packaged bread category;
- the level of success we achieve in developing and introducing new products and entering new markets;
- our ability to implement new technology and customer requirements as required;
- our ability to operate existing, and any new, manufacturing lines according to schedule;
- our ability to implement and achieve our corporate responsibility goals in accordance with regulatory requirements and the expectations of our stakeholders, suppliers, and customers;
- our ability to execute our business strategies which may involve, among other things, (i) the ability to realize the intended benefits of completed, planned or contemplated acquisitions, dispositions or joint ventures, such as the acquisition of Simple Mills, (ii) the deployment of new systems (e.g., our enterprise resource planning (“ERP”) system), distribution channels and technology, and (iii) an enhanced organizational structure (e.g., our sales and supply chain reorganization);
- consolidation within the baking industry and related industries;
- changes in pricing, customer and consumer reaction to pricing actions (including decreased volumes), and the pricing environment among competitors within the industry;
- our ability to adjust pricing to offset, or partially offset, inflationary pressure or tariffs (including retaliatory tariffs) on the cost of our products, including ingredient and packaging costs;
- disruptions in our direct-store-delivery distribution model, including litigation or an adverse ruling by a court or regulatory or governmental body that could affect the independent contractor classifications of the independent distributor partners (“IDPs”), and changes to our direct-store-delivery distribution model in California;
- increasing legal complexity and legal proceedings that we are or may become subject to;
- labor shortages and turnover or increases in employee and employee-related costs;
- the credit, business, and legal risks associated with IDPs and customers, which operate in the highly competitive retail food and foodservice industries;

- any business disruptions due to political instability, pandemics, armed hostilities, incidents of terrorism, natural disasters, labor strikes or work stoppages, technological breakdowns, product contamination, product recalls or safety concerns related to our products, or the responses to or repercussions from any of these or similar events or conditions and our ability to insure against such events;
- the failure of our information technology (“IT”) systems to perform adequately, including any interruptions, intrusions, cyber-attacks or security breaches of such systems or risks associated with the implementation of the upgrade of our ERP system; and
- the potential impact of climate change on the company, including physical and transition risks, our availability or restriction of resources, higher regulatory and compliance costs, reputational risks, and our availability of capital on attractive terms.

The foregoing list of important factors does not include all such factors, nor does it necessarily present them in order of importance. In addition, you should consult other disclosures made by the company (such as in our other filings with the Securities and Exchange Commission (“SEC”) or in company press releases) for other factors that may cause actual results to differ materially from those projected by the company. Refer to Part I, Item 1A., *Risk Factors*, of this Form 10-K for additional information regarding factors that could affect the company’s results of operations, financial condition and liquidity.

We caution you not to place undue reliance on forward-looking statements, as they speak only as of the date made and are inherently uncertain. The company undertakes no obligation to publicly revise or update such statements, except as required by law. You are advised, however, to consult any further public disclosures by the company (such as in our filings with the SEC or in company press releases) on related subjects.

We own or have rights to trademarks or trade names that we use in connection with the operation of our business, including our corporate names, logos and website names. In addition, we own or have the rights to copyrights, trade secrets and other proprietary rights that protect the content of our products and the formulations for such products. Solely for convenience, some of the trademarks, trade names and copyrights referred to in this Form 10-K are listed without the ©, ® and ™ symbols, but we will assert, to the fullest extent under applicable law, our rights to our trademarks, trade names and copyrights.

PART I

Item 1. *Business*

The Company

Flowers Foods, Inc. (which we reference to herein as “we,” “our,” “us,” the “company,” “Flowers” or “Flowers Foods”), founded in 1919 as a Georgia corporation and headquartered in Thomasville, Georgia, is currently the second-largest producer and marketer of packaged bakery foods in the United States (“U.S.”). Our principal products include breads, buns, rolls, snack items (bars, cakes, cookies, and crackers), bagels, English muffins, tortillas, and baking mixes and are sold under a variety of brand names, including *Nature’s Own*, *Dave’s Killer Bread* (“DKB”), *Canyon Bakehouse*, *Simple Mills*, *Wonder*, and *Tastykake*. Our brands are among the best known in the U.S. baking industry. Many of our brands have a major presence in the product categories in which they compete.

Flowers’ strategic priorities include developing our team, focusing on our brands, prioritizing our margins, and proactively seeking out smart, disciplined acquisitions and are described further in the following section. We believe that executing on our strategic priorities will drive future growth and margin expansion and deliver meaningful shareholder value over time.

Simple Mills Acquisition

On February 21, 2025, the company completed the acquisition of 100% of the equity interests of Purposeful Foods Holdings, Inc., the parent company of Simple Mills, Inc. (“Simple Mills”), maker of a premium brand of better-for-you crackers, cookies, snack bars, and baking mixes. The acquisition expands the company’s presence in the better-for-you snacking category, diversifies our category exposure, and enhances the company’s growth and margin prospects. Founded in 2012, Simple Mills is a market-leading natural brand and its products are made with simple ingredients, pioneered from using nutrient-dense nut, seed, and vegetable flours, attracting natural and mainstream consumers alike. Simple Mills’ products are available nationwide across more than 30,000 natural and conventional stores. See Note 6, *Acquisitions*, of Notes to Consolidated Financial Statements of this Form 10-K for additional information.

Current Inflationary Economic Environment and Other Macroeconomic Factors

We continue to monitor the impact of a variety of factors on our business, including the impact of the inflationary economic environment on our costs and the buying patterns of our consumers, supply chain disruptions, including the impacts of tariffs (including retaliatory tariffs), increased labor costs, the conflict between Russia and Ukraine, and the current instability in the Middle East. Our results in Fiscal 2025 were negatively impacted by continued softness in the fresh packaged bread category, most notably for traditional loaf breads, partly due to changes in consumer purchasing patterns and behaviors. The benefit of sales increases, mainly from the Simple Mills acquisition contribution and the additional week in Fiscal 2025 and to a lesser extent sales improvement for *DKB*, *Nature’s Own* Keto, and *Wonder* cake products, was more than offset by higher operating costs.

Supply chain disruptions, including impacts from the imposition of tariffs (including retaliatory tariffs), could continue to negatively impact production volumes due to uncertainty in the global and U.S. supply chain. Although the conflict between Russia and Ukraine and the current instability in the Middle East have not impacted us directly, we are closely monitoring the effects on the broader economy, including on the availability and price of commodities used in or for the production of our products. Disruptions in our operations, related to factors including, but not limited to, the procurement of raw materials and packaging items, transport of our products, and workforce availability, have negatively impacted, and could continue to negatively impact, our operations, results of operations, cash flows, and liquidity.

Higher labor costs negatively impacted our results in Fiscal 2025 and Fiscal 2024 and this trend may continue due to changes in employment rates and additional government regulations and the labor market available to us, among other factors. These challenges may negatively impact the efficiency of our production lines and our ability to operate at, or near, full capacity and could result in increased labor costs, including additional overtime to meet demand and higher wage rates to attract and retain workers. An overall labor shortage, lack of skilled labor, or increased turnover has and could continue to have a negative impact on the company’s operations, results of operations, liquidity, or cash flows.

We believe we have sufficient liquidity to satisfy our cash needs and we continue to execute on our strategic priorities, including the deployment of the upgrade of our ERP system.

For additional discussion on the impact of macroeconomic factors on our business, refer to Part II, Item 7., *Management’s Discussion and Analysis of Financial Condition and Results of Operations*, of this Form 10-K.

Strategic Initiatives

We are a brand-focused company dedicated to the consumer and committed to growing our most profitable brands through innovation, market expansion, and prudent mergers and acquisitions (“M&A”). Our strategic priorities and our long-term goals are as follows:

Strategic Priorities:

- *Develop team:* Capabilities to build brands and create value.
- *Focus on brands:* Enhance relevancy and expand presence. Invest in our brands to align with consumers to maximize our return on investment.
- *Prioritize margins:* Optimize the portfolio and supply chain.
- *Smart M&A:* Disciplined approach to acquisitions that enhance our branded portfolio, improve our margin profile, and broaden our geographic reach.

Long-term Goals:

- Grow sales by 1% to 2% annually (excluding any future acquisitions).
- Grow EBITDA by 4% to 6% annually (excluding any future acquisitions). The company defines EBITDA as earnings before interest, taxes, depreciation and amortization.
- Grow earnings per share by 7% to 9% annually.

A key to our success in achieving our strategic priorities is our talented and dedicated team. We recognize the importance of investing in our people as further discussed in the “Human Capital Resources” section below, which details how we attract, retain, and develop our team. Additionally, we recognize the importance of realigning people and responsibilities in successfully implementing our long-term strategies. This realignment can take the form of organizational changes or providing crucial tools, including investments in our information systems.

A major focus of our long-term strategy is to evolve our sales portfolio to higher margin, value-added branded retail products that we expect will generate top line growth and improve overall profitability. We expect an optimized portfolio will drive share gains by targeting growth segments with new, innovative products. We have established clear roles for the brands and product lines within our portfolio to enable more targeted decision-making on brand investment. Over the past several years, we have completed sales rationalization initiatives resulting in a more streamlined brand and product assortment, and reduced brand portfolio complexity. As the fresh packaged bread category has continued to experience weakness and is expected to remain challenging, we are conducting a comprehensive review to further optimize our brand portfolio. We have also executed strategies to optimize our non-retail and store branded retail sales by exiting certain lower margin business, implementing price increases, and acquiring new customers.

As our sales portfolio continues to evolve, the flexibility of our production and distribution systems allows us to pivot capacity to meet changing demand and we continue to optimize these systems. We believe our flexible bakery system allows us to quickly shift production to high demand products and adjust distribution where needed. For example, we ceased production at our Bailey Street Bakery located in Atlanta Georgia in Fiscal 2025, our Baton Rouge, Louisiana bakery in Fiscal 2024, and our Phoenix, Arizona bakery in Fiscal 2022 to shift production to more efficient bakeries. In Fiscal 2023, we acquired the Papa Pita Bakery business (“Papa Pita”) expanding our production capacity, including for bagels, pitas, and flat breads, the majority of which Papa Pita previously co-manufactured for us, and increasing our direct-store-delivery distribution in the western U.S. Additionally, we are continuing to optimize our distribution system by reducing network complexity through depot consolidation and reducing transport miles.

M&A has always been, and we expect will continue to be, an important part of our long-term growth strategy. We employ a disciplined approach to M&A, seeking out candidates that enhance our branded portfolio, extend our geographic presence, are a strong cultural fit, and add enhanced capabilities to our company. We believe our strong balance sheet and cash flow generation enables us to execute our M&A strategy and, as discussed above, on February 21, 2025, we completed the purchase of Simple Mills, maker of a premium brand of better-for-you cookies, crackers, snack bars, and baking mixes.

Transformation Strategy Initiatives

In the fourth quarter of Fiscal 2025, we began a comprehensive review of our brands, operations, and financial strategy. Although this review is in the early stages, as discussed in the *Impairment of assets* section in Part II, Item 7. *Management’s Discussion and Analysis of Financial Condition and Results of Operations*, it has resulted in the impairment of two regional brands in the fourth quarter of Fiscal 2025. This aligns with our strategy to optimize our brand portfolio and invest in our national brands and key product categories.

In the second half of Fiscal 2020, we launched initiatives to transform our business operations. The primary goals of these initiatives are: (1) enable a more agile business model, empowering the organization by fundamentally redesigning core business processes; (2) embed digital capabilities and transform the way we engage with our consumers, customers and employees; and (3) modernize and simplify our application and technology infrastructure landscape, inclusive of the upgrade of our ERP system.

In February 2023, we announced a restructuring of plant operation responsibilities from the sales function to the supply chain function to improve operational effectiveness, increase profitable sales, and better meet customer requirements. This restructuring has transitioned to digitally enabling these key functions, driving accountability, and improving operational performance and sales execution.

Digital Strategy Initiatives

Our digital strategy initiatives include investments in digital domains of e-commerce, autonomous planning, bakery of the future, digital logistics, and digital sales. In e-commerce, we strive to become a category and market share leader, engage with the consumer through digital platforms and marketplaces, and support our retail partners' omnichannel strategies. The autonomous planning domain encompasses predictive ordering, cost-to-serve modeling, integrated business planning, and supply and demand forecasting, among other areas. Bakery of the future involves transforming our current manufacturing processes and operational visibility to apply industry-leading digital manufacturing tools, such as real-time performance management and visibility, automation of repetitive processes, standardization of processes and procedures, and sensor-based quality monitoring tools to improve consistency and quality. Digital logistics includes real-time operational visibility, improving our routing efficiency, and automating the freight bill-pay audit process. Finally, digital sales is focused on improving our sales execution through improved visibility to in-store activities, streamlined reporting, focusing in-store priorities, and improved collaboration tools across our sales ecosystem.

These digital domains are expected to improve data visibility and efficiencies while automating many of our processes. When fully implemented, we expect this work will further our brand efforts, bring us closer to the consumer, increase operational efficiencies, and deliver higher-quality, real-time insights, which will in turn enable more predictive business decision-making. We transitioned into the implementation phase for the e-commerce, autonomous planning, and bakery of the future domains and selected two bakeries for the pilot program for bakery of the future and autonomous planning in Fiscal 2021. To date, we have rolled out bakery of the future to 36 bakeries, digital logistics to all bakery locations, and autonomous planning and our digital sales tools across our entire sales organization.

ERP Upgrade

This initiative includes upgrading our information system platform and is expected to improve data management and efficiencies while automating many of our processes. We completed the initial planning and road mapping phase of the ERP upgrade at the end of Fiscal 2020. In the first quarter of Fiscal 2021, we transitioned into the design phase and engaged a leading, global consulting firm to assist us in designing and implementing the upgrade of our ERP platform and to serve as the system integrator for the project. We transitioned into the build phase at the beginning of Fiscal 2022 and during the second quarter of Fiscal 2023, we began deploying the ERP upgrade. We have continued the implementation through a phased approach and anticipate the deployment to be completed in Fiscal 2027.

We expect the transformation strategy initiatives to require significant capital investment and expense over the next two years. We currently anticipate the upgrade of our ERP system will cost approximately \$325 million (of which approximately 35% has been or is anticipated to be capitalized) and anticipate the upgrade to be completed in 2027. In the third quarter of Fiscal 2024, we recorded a \$2.3 million asset impairment charge to fully impair certain ERP-related assets that no longer meet our business needs. As of January 3, 2026, we have incurred costs related to the project of approximately \$265 million. See Item 1A., *Risk Factors*, "We may experience difficulties in deploying the upgrade of our ERP system."

Segment

From the beginning of Fiscal 2019 through Fiscal 2024, we managed our business as one operating segment. The company concluded it had one operating segment based on the nature of the products sold by the company, its intertwined production and distribution model, the internal management structure and the information regularly reviewed by the chief executive officer ("CEO"), who is the chief operating decision maker, for the purpose of assessing performance and allocating resources. Concurrent with the acquisition of Simple Mills, the company has identified two operating segments based on how business activities are managed and evaluated, legacy Flowers Foods and Simple Mills. As Simple Mills shares similar economic characteristics with legacy Flowers Foods, we aggregate Simple Mills and legacy Flowers Foods as one operating segment for the purpose of determining our one reportable segment. See Note 2, *Summary of Significant Accounting Policies*, and Note 4, *Segments*, of Notes to Consolidated Financial Statements of this Form 10-K for detailed financial information about our operating segments and one reportable segment.

Brands & Products

We report our sales as Branded Retail and Other. The Other category includes store branded retail, foodservice, restaurant, institutional, vending, thrift stores, and contract manufacturing. In Fiscal 2025, Branded Retail sales represented 65.9% of our total sales.

Our brands are some of the best-known in the U.S. fresh packaged bread industry and with the addition of Simple Mills' products in Fiscal 2025, we have expanded our presence in the better-for-you snacking category and diversified our category exposure. Many of our brands hold leading market positions in the categories in which they compete. We believe having a well-diversified portfolio of brands allows us to be more competitive in the marketplace and appeal to a broader range of consumers. Our principal products are breads, buns, rolls, snack items (bars, cakes, cookies, and crackers), bagels, English muffins, tortillas, and baking mixes. The table below presents the major brands within our diversified brand portfolio:

Strategic Positioning	Key Brands
Mainstream	<i>Wonder, Tastykake, Regional Brands</i>
Premium	<i>Nature's Own, DKB, Canyon Bakehouse, Simple Mills</i>

Brand Highlights

- *Nature's Own* is the best-selling loaf bread in the U.S. (Source: *Circana Total US MultiOutlet+w/Conv L53 Weeks Ending 1/4/26*). *Nature's Own's* sales, at estimated retail, were \$1.5 billion for Fiscal 2025.
- *Nature's Own* Honey Wheat is the #1 Universal Product Code ("UPC") in the U.S. Fresh Packaged Bread category based on dollars and units. In the U.S. Fresh Packaged Bread category, *Nature's Own* Butterbread is the #3 UPC based on units and the #4 UPC based on dollars. (Source: *Circana Total US MultiOutlet+w/Conv L53 Weeks Ending 1/4/26*)
- *DKB* is the #1 selling organic brand in the U.S. and the company's #2 brand, with the top-selling organic brand in four different segments (Loaf, Bagels, Breakfast Bread, and English Muffins). (Source: *Circana Total US MultiOutlet+w/Conv L53 Weeks Ending 1/4/26*). *DKB's* sales, at estimated retail, were \$1.2 billion for Fiscal 2025.
- *Canyon Bakehouse* is the #1 selling gluten-free bread brand in the U.S. (Source: *Circana Total US MultiOutlet+w/Conv L53 Weeks Ending 1/4/26*). *Canyon Bakehouse's* sales, at estimated retail, were \$174 million for Fiscal 2025.
- *Simple Mills*, acquired on February 21, 2025, is a leading brand of better-for-you crackers, cookies, snack bars, and baking mixes, with sales, at estimated retail, of \$283 million for Fiscal 2025. (Source: *Circana Total US MultiOutlet+w/Conv L53 Weeks Ending 1/4/26*)
- *Wonder*, over 100 years old, enjoys 93% brand awareness (Source: *Kantar Brand Health Tracking Study - Summer 2025*). *Wonder's* Classic White loaf is the #2 UPC in the white loaf segment based on dollars and units in the U.S. (Source: *Circana Total US MultiOutlet+w/Conv L53 Weeks Ending 1/4/26*). *Wonder's* sales, at estimated retail, including cake products introduced in Fiscal 2025, were \$569 million for Fiscal 2025.

In Fiscal 2025, we introduced *Nature's Own* Keto multi-grain and higher protein loaf breads as well as new varieties of *Nature's Own* Small Loaf breads, *Wonder* snack cakes, and *DKB* Organic sandwich buns, among other new products. Additionally, we rolled out *DKB* snack bites nationwide. In Fiscal 2024, we introduced *Nature's Own* Keto hamburger and hotdog buns, *Nature's Own* Small Loaf breads, *Wonder* bagels and English muffins, and *DKB* Organic Rolls, among others.

The *DKB* snack bars and snack bites are part of an initiative to extend our presence beyond the traditional bread category and into the snacking category. As discussed above, the Simple Mills Acquisition expanded the company's exposure to the better-for-you snacking segment and diversifies our category exposure. Late in Fiscal 2025, we launched three varieties of *DKB* organic breakfast bars and expanded our line of protein bars, snack bars, and snack bites.

Our brands and products are sold through various channels throughout the U.S. These channels include supermarkets, drugstores, mass merchandisers, discount stores, club stores, natural stores, convenience stores, thrift outlet stores, and foodservice, among others.

Marketing

We support our key brands with an advertising and marketing effort that targets consumers through electronic and in-store coupons, social media (such as Facebook and X), digital media (including e-newsletters to consumers), websites (our brand sites and third-party sites), event and sports marketing, on-package promotional offers and sweepstakes, and print advertising. When

appropriate, we may join other sponsors with promotional tie-ins. We often focus our marketing efforts on specific products and holidays, such as hamburger and hot dog bun sales during Memorial Day, the Fourth of July, and Labor Day, and snack cakes for specific seasons. Additionally, we have made and are continuing to make marketing investments to target e-commerce sales as consumers shift to more online shopping alternatives, such as grocery delivery sites, retailer websites and apps, among others.

Customers

Our top 10 customers in Fiscal 2025 accounted for 57.7% of sales. During Fiscal 2025, our largest customer, Walmart/Sam’s Club, represented 21.5% of the company’s sales. The loss of, or a material negative change in our relationship with, Walmart/Sam’s Club or any other major customer could have a material adverse effect on our business. Walmart/Sam’s Club was the only customer to account for 10% or more of our sales during Fiscal 2025, 2024, and 2023.

Fresh baked foods’ customers include mass merchandisers, supermarkets and other retailers, restaurants, quick-serve chains, food wholesalers, institutions, dollar stores, and vending companies. We also sell returned and surplus product through a system of thrift stores. The company currently operates 221 such stores and reported sales of \$62.2 million during Fiscal 2025 from these outlets.

We also (1) supply national and regional restaurants, institutions and foodservice distributors, and retail in-store bakeries with breads and rolls; (2) sell packaged bakery products to wholesale distributors for ultimate sale to a wide variety of food outlets; and (3) sell packaged snack cakes primarily to customers who distribute them nationwide through multiple channels of distribution, including mass merchandisers, supermarkets, vending outlets and convenience stores. In certain circumstances, we enter into co-packing arrangements with retail customers or other food companies, some of which are competitors. Although we service public health care, military commissaries, and prisons, among other governmental institutions, we do not have any material government contracts.

Distribution

We distribute our products through a direct-store-delivery (“DSD”) distribution system and a warehouse delivery system. The DSD distribution system primarily involves aggregating order levels and delivering products from bakeries to independent distributors for sale and direct delivery to customer stores. The independent distributors are responsible for ordering products, selling products to customers, stocking shelves, maintaining special displays, developing and maintaining good customer relations, ensuring adequate inventory, and removing unsold goods. In certain markets, we utilize a sales employee model to facilitate the distribution of product through our DSD distribution system. The warehouse delivery system involves primarily delivering our products to customers’ warehouses.

The company has sold the majority of the distribution rights to market certain brands within a geographic territory to independent distributors under long-term financing arrangements. Many other independent distributors have opted to obtain their own financing arrangements. Independent distributors, highly motivated by financial incentives from their distribution rights ownership, strive to increase sales within their defined geographic territory by offering outstanding service and merchandising.

Our DSD distribution system is comprised of three types of territories: (1) independent distributor-owned and operated territories (independent distributors own the rights to distribute certain brands of our fresh packaged bakery foods in defined geographic markets); (2) distribution rights that are classified as available for sale in the Consolidated Balance Sheets; and (3) other company operated territories. The table below presents the approximate number of territories used by the company as of January 3, 2026:

Type of territory	Number of territories
Independent distributor-owned and operated territories	4,274
Territories classified as available for sale	133
Other company operated territories	1,365
Total territories	5,772

During Fiscal 2024, the company commenced repurchasing approximately 400 territories in California and converting them to company operated territories mostly as a result of the settlement of litigation as further discussed in Note 23, *Commitments and Contingencies*, of Notes to Consolidated Financial Statements of this Form 10-K. The company completed the repurchases in Fiscal 2025.

Our warehouse distribution system delivers a portion of our packaged bakery snack products from a central distribution facility located near our Crossville, Tennessee snack cake bakery. We believe this centralized distribution system allows us to achieve both production and distribution efficiencies. Products coming from different bakeries are then cross-docked and shipped directly to customers' warehouses nationwide. Our frozen bread and roll products are shipped to various outside freezer facilities for distribution to our customers. Our Simple Mills products are produced by co-manufacturers and shipped to central warehouses for distribution to our customers or pick up by the customer.

Intellectual Property

We own many trademarks, trade names, patents, and licenses. The company also sells products under franchised and licensed trademarks and trade names which we do not own pursuant to contractual arrangements. We consider our trademarks and trade names important to our business since we use them to build strong brand awareness and consumer loyalty.

Raw Materials

Our primary baking ingredients are flour, sweeteners, shortening, yeast and water. We also purchase organic and gluten-free ingredients. We also use paper products, such as corrugated containers, folding cartons, films and plastics to package our bakery foods. We strive to maintain diversified sources for all of our baking ingredients and packaging products. In addition, we are dependent on natural gas or propane as fuel for firing our ovens.

Prices of ingredient and packaging materials fluctuate due to various factors including, but not limited to, government policy and regulation, weather conditions, domestic and international demand, or other unforeseen circumstances, and we monitor these markets closely. Ingredient and packaging costs were volatile in Fiscal 2024 and moderated in Fiscal 2025. We enter into forward purchase agreements and other financial instruments to manage the impact of volatility in certain raw material prices. Any decrease in the availability of these agreements and instruments could increase the price of these raw materials and significantly affect our earnings.

Regulations

As a producer and marketer of food items, our operations are subject to regulation by various federal governmental agencies, including the U.S. Food and Drug Administration, the U.S. Department of Agriculture, the U.S. Federal Trade Commission, the U.S. Environmental Protection Agency, the U.S. Department of Commerce, and the U.S. Department of Labor. We also are subject to the regulations of various state agencies, with respect to production processes, product quality, packaging, labeling, storage, distribution, labor, and local regulations regarding the licensing of bakeries and the enforcement of state standards and facility inspections. Under various statutes and regulations, these federal and state agencies prescribe requirements and establish standards for quality, purity, and labeling. Failure to comply with one or more regulatory requirements could result in a variety of sanctions, including monetary fines or compulsory withdrawal of products from store shelves.

Advertising of our brands is subject to regulation by the Federal Trade Commission, and we are subject to certain health and safety regulations, including those issued under the Occupational Safety and Health Act.

The cost of compliance with such laws and regulations has not had a material adverse effect on the company's business. We believe we are currently in substantial compliance with all material federal, state and local laws and regulations affecting the company and its properties.

Our operations, like those of similar businesses, are subject to various federal, state and local laws and regulations with respect to environmental matters, including air and water quality and underground fuel storage tanks, as well as other regulations intended to protect public health and the environment. The company is not a party to any material proceedings arising under these laws and regulations. We believe compliance with existing environmental laws and regulations will not materially affect the Consolidated Financial Statements or the competitive position of the company. The company is currently in substantial compliance with all material environmental laws and regulations affecting the company and its properties.

Competitive Overview

The U.S. market for fresh and frozen bakery products is estimated at approximately \$55 billion at retail. The fresh packaged bread category is intensely competitive and has experienced volume decreases in recent years. Flowers Foods is currently the second-largest company in the U.S. fresh baking industry based on dollar market share as presented in the following chart (amounts may not compute due to rounding). (Source: *Circana Flowers custom database, 53 weeks ending 1/4/26*; due to a change in methodology and sources, data provided previously may not be comparable to current data):

The current competitive landscape for breads and rolls in the U.S. baking industry consists of Bimbo Bakeries USA (BBU), Flowers Foods, and The Campbell's Company, under the *Pepperidge Farm* brand, along with a number of smaller independent regional bakers, local bakeries, and retailer-owned bakeries.

Some of these smaller regional bakers do not enjoy the competitive advantages of larger operations, including greater brand awareness and economies of scale in purchasing, distribution, production, IT, advertising and marketing. However, size alone is not sufficient to ensure success in our industry. The company faces significant competition from regional and independent bakeries in certain geographic areas.

Competition in the baking industry continues to be driven by a number of factors, including the ability to serve retail and foodservice customers, generational changes in family-owned businesses, and competitors' promotional efforts on branded bread and store brands. Competition typically is based on the ability to target changing consumer preferences, product availability (including through e-commerce channels), product quality, brand loyalty, price, and effective promotions. Customer service, including frequent deliveries to keep store shelves well-stocked, is also a competitive factor.

The company also faces competition from store brands that are produced either by us or our competitors. Store brands (also known as "private label") have been offered by food retailers for decades. With the growth of mass merchandisers like Walmart and the ongoing consolidation of regional supermarkets into larger operations, store brands have become a significant competitor to the company. The store brand share of retail fresh packaged bread in the U.S. accounts for approximately 26% of the dollar sales and approximately 35% of unit sales. Store brand's dollar share had been steadily declining for a number of years prior to Fiscal 2022, however that trend reversed in Fiscal 2022 and expanded in subsequent years through Fiscal 2025. The continued inflationary environment has pressured more consumers to trade down to store brand bakery products.

Human Capital Resources

As of January 3, 2026, Flowers and its subsidiaries had approximately 10,300 employees located throughout the U.S. and approximately 5,500 full-time leased and temporary employees. Approximately 840 employees are covered by collective bargaining agreements and there are no material outstanding labor disputes.

Flowers' legacy of excellence is built on 100+ years of hard work by thousands of Flowers team members. As W.H. Flowers, Jr. said, *“The key to any enterprise or goal is people. People of character, people of integrity, people who don't mind working and taking advantage of their opportunity.”* We continue to strive toward a people-centric legacy by implementing initiatives that enhance the lives of every employee.

Our hiring efforts utilize a variety of channels and include various recruiting intelligence and marketing strategies. Through campus outreach, apprenticeships, and internship and rotational programs, we employ an inclusive recruiting process to attract and retain top talent in a competitive talent market. Most recently, Flowers has increased the number of focus schools and career fairs attended annually, and developed new relationships with Historically Black Colleges and Universities (HBCUs).

A number of our bakeries actively champion second chance employment by recruiting formerly incarcerated individuals who are ready to re-enter the job market. Our flagship Dave's Killer Bread bakery in Milwaukie, Oregon, is one of our biggest advocates for second chance employment – with over 45% of team members hired through the bakery's second chance initiatives.

In addition, Flowers is a long-time supporter of causes that support U.S. veterans and their families. Since 2018, through our *Wonder* and *Tastykake* brands, we have partnered with the United Service Organizations ("USO") to help provide a variety of programs that keep service members and their families connected. In support of these efforts, Flowers' brands fulfilled their multi-year commitment, donating \$3.1 million to the USO through Fiscal 2025, and increased their total pledge to \$3.4 million through 2026. Presently, Flowers employs approximately 475 veterans.

Flowers offers team members competitive wages, benefits, and training opportunities, while also promoting a safe and healthy workplace. We believe it is the company's responsibility to give our team members every opportunity to grow as Flowers employees and as people. The company provides its employees with resources to enhance their skills and careers, including:

- Promoting education and development by investing in our internal Learning Management System and providing a range of formal and informal learning programs designed to help employees continuously develop skills throughout their careers. Programs available at our bakeries include Skillsoft online learning and a Mentor Up Mentoring Program.
- Offering a variety of programs that contribute to our leadership, training and development goals, including the “Flowers Front-Line Leadership Program,” “Lead Now” for leaders at all levels, and “Leading The Flowers Way” for our high potential leaders.
- Encouraging employees to discuss their professional development during annual performance reviews with their supervisors.
- Expanding our goal setting process to include personal development plans (PDPs) as a standard practice. This ensures every employee has a clear roadmap for their career growth, with defined goals and actionable steps to achieve them.
- Offering the Continuous Performance Management module which supports ongoing performance conversations between employees and their managers.
- Offering Career Conversations training for supervisory employees to discuss career pathing and employee development.

To foster our culture of belonging, Flowers deploys annual anti-harassment, anti-discrimination, and inclusiveness training. This content is also provided as part of our onboarding process for new corporate and bakery employees. In addition, all employees are provided opportunities to take additional training for their self-development and career progression.

Flowers offers confidential employee opinion surveys to our entire employee population. These surveys are designed to capture real-life feedback about what it is like to work at Flowers. Insights from the survey inform leadership discussions, people strategies and targeted action plans designed to enhance employee engagement, support talent retention, and align the workforce with business objectives.

Total Rewards

We have a demonstrated history of investing in our workforce by providing competitive wages and benefits. Our benefits package includes:

- comprehensive health insurance coverage to employees working 30 hours or more each week;
- parental leave for all new parents when their families experience a birth, adoption or foster placement;
- adoption reimbursement of up to \$20,000 per employee, per lifetime;
- life insurance that includes accidental death and dismemberment coverage;
- short-term disability to provide wage protection for up to six months;
- college tuition support programs for employees and their dependents; and
- a 401(k) plan (certain union-affiliated employees participate in a company-sponsored pension or multi-employer plan) with generous company contributions.

We believe that because employees drive our success, they should share in that success. In addition to competitive wages and benefits, when annual company goals are met, eligible team members at all levels are rewarded with a bonus.

Item 1A. Risk Factors

You should carefully consider the risks described below, together with the other information included in this report, in considering our business and prospects. The risks and uncertainties described below are not the only ones facing us. These risk factors are not listed in any order of significance. Additional risks and uncertainties not presently known to us, or that we currently deem insignificant, may also impair our business operations. The occurrence of any of the following risks could harm our business, financial condition, liquidity, or results of operations.

Operational Risks

Economic conditions may negatively impact demand for our products, which could adversely impact our sales and operating profit.

The willingness of our customers and consumers to purchase our products may depend in part on economic conditions. Worsening economic conditions or future challenges to economic growth could have a negative impact on consumer demand, which could adversely affect our business. Deterioration of national and global economic conditions could cause consumers to shift purchases to more generic, lower-priced, or other value offerings, or consumers may forego certain purchases altogether during economic downturns and could result in decreased demand in the foodservice business. This economic uncertainty may increase pressure to reduce the prices of some of our products, limit our ability to increase or maintain prices, and reduce sales of higher margin products or shift our product mix to low-margin products.

In addition, changes in tax or interest rates, whether due to recession, efforts to combat inflation, financial and credit market disruptions or other reasons, could negatively impact us.

A disruption or change in the operation of our DSD distribution system could materially and/or negatively affect our results of operations, financial condition and cash flows.

A material negative change in our relationship with the independent distributor partners could negatively affect our business. Such changes could result from litigation or one or more adverse rulings by courts or regulatory or governmental bodies in any of the jurisdictions in which we operate regarding our independent distributorship model, including actions or decisions that could affect the independent contractor classifications of the independent distributor partners, or an adverse judgment against the company for actions taken by the independent distributor partners. These changes could also result from regulatory developments based on the manner in which the U.S. Department of Labor applies the Fair Labor Standards Act. In addition, as a result of California distributor-related litigation, we converted our independent distributor partners distribution model in California to an employment model. Any of these developments could materially and/or negatively affect our financial condition, results of operations and cash flows.

We may not be able to attract or retain the highly skilled people we need for our business.

We depend on the skills and continued service of key personnel, including our experienced management team. In addition, our ability to achieve our strategic and operating goals depends on our ability to attract, recruit, hire, develop, and retain qualified individuals, including individuals with e-commerce, digital marketing, and data analytics capabilities. We compete with other companies both within and outside of our industry for talented personnel, and we may lose key personnel or fail to attract, recruit, hire, develop, and retain other talented personnel. Any such loss, failure or negative perception with respect to these individuals may adversely affect our business or financial results or our ability to meet regulatory reporting requirements. In addition, activities related to identifying, recruiting, hiring, and integrating qualified individuals may require significant time and expense. We may not be able to locate suitable replacements for any key employees who terminate their employment or offer employment to potential replacements on reasonable terms, each of which may adversely affect our business and financial results.

Labor shortages and increased turnover or increases in employee and employee-related costs could have adverse effects on our profitability.

A number of factors may adversely affect the labor force available to us, including high employment levels, federal unemployment subsidies and benefits offered, and other government regulations, which include laws and regulations related to workers' health and safety, wage and hour practices, and immigration. A labor shortage or increased turnover rates within our employee base could lead to increased costs, such as increased overtime to meet demand and increased wage rates to attract and retain employees, and could negatively affect our ability to efficiently operate our bakeries and bread lines or otherwise operate at full capacity. An overall labor shortage, lack of skilled labor, increased turnover or labor inflation could have a material adverse impact on the company's operations, results of operations, liquidity or cash flows.

Additionally, health care and workers' compensation are increasing and will likely continue to do so. Any substantial increase in these costs may have an adverse impact on our profitability. The company records the liabilities related to its benefit plans based on actuarial valuations, which include key assumptions determined by management. Material changes in benefit plan liabilities may occur

in the future due to changes in these assumptions. Future annual amounts could be impacted by various factors, such as changes in the number of plan participants, changes in the discount rate, changes in the expected long-term rate of return, changes in the level of contributions to the plan, and other factors. In addition, legislation or regulations involving labor and employment and employee benefit plans (including employee health care benefits and costs) may impact our operational results.

The costs of maintaining and enhancing the value and awareness of our brands are increasing, which could have an adverse impact on our revenues and profitability.

We rely on the success of our well-recognized brand names and we intend to maintain our strong brand recognition by continuing to devote resources to advertising, marketing and other brand building efforts. Brand value could diminish significantly due to several factors, including consumer perception that we have acted in an irresponsible manner, adverse publicity about our products (whether or not valid), our failure to maintain the quality of our products, the failure of our products to deliver consistently positive consumer experiences, or the products becoming unavailable to consumers. The growing use of social and digital media platforms by consumers and third parties increases the speed and extent that information or misinformation and opinions can be shared. Brand recognition and loyalty can be impacted by the effectiveness of our advertising campaigns, marketing programs and sponsorships, as well as our use of social media. In addition, failure to comply with local or other laws and regulations could also hurt our reputation. Our marketing investments may not prove successful in maintaining or increasing our market share. If we are not able to successfully maintain our brand recognition or were to suffer damage to our reputation or loss of consumer confidence in our products for any of these reasons, our revenues and profitability could be adversely affected. Additionally, a company determination that any brand is no longer expected to contribute to the company's future results or to be utilized in a limited capacity could lead to an impairment of an intangible asset, or an acceleration of amortization due to a reduction in the useful life, and could adversely affect our business, financial condition or results of operations.

Our inability to execute our business strategy could adversely affect our business.

We employ various operating strategies to maintain our position as one of the nation's leading producers and marketers of bakery products available to customers through multiple channels of distribution. In particular, these operating strategies include, among other things, (i) the integration of acquisitions or the acquisition or disposition of assets at presently targeted values, (ii) the deployment of new systems and technology, and (iii) an enhanced organizational structure. Our focus on our long-term goals of being consumer-focused and committed to growing our most profitable brands is dependent on our success in achieving our strategic priorities: (i) develop our team; (ii) focus on brands; (iii) prioritize margins; and (iv) pursue smart M&A. These and related demands on our resources may divert the organization's attention from other business issues. Our success is partly dependent upon properly executing, and realizing cost savings or other benefits from, these often-complex initiatives. Any delay in, or failure to implement, our strategic initiatives could adversely affect our ability to grow margins. If we are unsuccessful in implementing or executing one or more of our business strategies, our business could be adversely affected.

We may be adversely impacted by the failure to successfully realize the expected benefits of acquisitions, divestitures or joint ventures.

From time to time, we undertake acquisitions, divestitures, joint ventures and co-investments. The success of any acquisition, divestiture or joint venture depends on the company's ability to identify opportunities that help us meet our strategic objectives, consummate a transaction on favorable contractual terms, and achieve expected returns and other financial benefits.

Acquisitions, including future acquisitions, require us to efficiently integrate the acquired business or businesses, which involves a significant degree of difficulty, including the following:

- integrating the operations and business cultures of the acquired businesses while carrying on the ongoing operations of the businesses we operated prior to the acquisitions;
- managing a significantly larger company than before consummation of the acquisitions;
- the possibility of faulty assumptions underlying our expectations regarding the prospects of the acquired businesses;
- coordinating a greater number of diverse businesses and businesses located in a greater number of geographic locations;
- attracting and retaining the necessary personnel associated with the acquisitions;
- creating uniform standards, controls, procedures, policies and information systems and controlling the costs associated with such matters; and
- expectations about the performance of acquired trademarks and brands and the fair value of such trademarks and brands.

Divestitures have operational risks that may include impairment charges. Divestitures also present unique financial and operational risks, including diverting management attention from the existing core business, separating personnel and financial data and other systems, and adversely affecting existing business relationships with suppliers and customers.

Co-investments with third parties through partnership, joint ventures, or other entities may involve non-controlling, illiquid interests and limited decision-making authority. Investments in partnerships, joint ventures, or other entities may, under certain circumstances, involve risks not present were a third-party not involved, including the possibility that our joint venture partners might become bankrupt, fail to fund their share of required capital contributions, make poor business decisions, or block or delay necessary decisions which can lead to potential impairment recognition. Disputes between us and our joint venture partners may result in litigation or arbitration that would increase our expenses. In addition, we may in certain circumstances be liable for the actions of our joint venture partners.

We have had, and may have in the future, situations where acquisitions, divestitures or joint ventures are not successfully implemented or completed, or the expected benefits of such acquisitions or divestitures are not otherwise realized, which has, and may in the future, negatively impacted the company's business, results of operations or financial condition.

Disruption in our supply chain or distribution capabilities from political instability, armed hostilities, incidents of terrorism, natural disasters, weather, inferior product or ingredient supply, or labor strikes could have an adverse effect on our business, financial condition and results of operations.

Our ability to make, move and sell products is critical to our success. Damage or disruption to our manufacturing or distribution capabilities, or the manufacturing or distribution capabilities of our suppliers, due to weather, including any potential effects of climate change, natural disaster, fire or explosion, terrorism, pandemics, inferior product or ingredient supply, labor strikes or work stoppages, or adverse outcomes in litigation involving our independent distributor model, could impair our ability to make, move or sell our products. Moreover, terrorist activity, armed conflict or political instability, including any escalation of hostility arising out of the conflict between Russia and the Ukraine and the current instability in the Middle East, or natural disasters that may occur within or outside the U.S. may disrupt manufacturing, labor, and other business operations. Failure to take adequate steps to mitigate the likelihood or potential impact of such events and disruption to our manufacturing or distribution capabilities, or to effectively manage such events if they occur, could adversely affect our business, financial conditions and results of operations.

The third-party vendor management processes may not be appropriately designed to reduce risks related to the delivery of goods, supplies and services.

As part of a concerted effort to achieve cost savings and efficiencies, we have entered into agreements with third-party vendors for the delivery of goods, supplies and services, including IT services. If we do not select quality vendors, appropriately review vendor contracts and monitor these vendors' performance (including their ability to protect our customer, consumer or other confidential data), or if any of these third-parties do not perform according to the terms of the agreements, we may not be able to achieve the expected cost savings, we may have to incur additional costs to correct errors made by such third-party vendors or our reputation could be harmed by any failure to perform.

Loss of one or more of our independent contract manufacturers could adversely affect our business.

We periodically enter into arrangements with independent contract manufacturers, or co-manufacturers, of products. In some cases, a co-manufacturer may produce all of our requirements for a particular product or brand. Our future ability to enter into co-manufacturing arrangements is not guaranteed. If we lose or need to change one or more co-manufacturers or fail to retain co-manufacturers for newly acquired or developed products or brands, production of our products may be delayed or postponed and/or the availability of some of our products may be reduced or eliminated, which could adversely affect our business, financial condition or results of operations.

Changes in tariffs and other trade disruptions may impact our business, results of operations and financial condition, depending on future developments, which are highly uncertain and are difficult to predict.

The extent to which recently announced tariffs (including retaliatory tariffs) and other trade disruptions (such as embargoes, sanctions and export controls) may impact our business, results of operations and financial condition will depend on future developments, which are highly uncertain and are difficult to predict. Such tariffs, trade disruptions and future developments may impact the consumer, our workforce and operations, as well as the workforce, operations and financial prospects of our customers, vendors and suppliers. There is considerable uncertainty regarding the extent to which tariffs and/or other trade disruptions (such as embargoes, sanctions and export controls) will be enacted and the duration for which enacted tariffs and/or other trade disruptions will be in place and such developments could adversely impact our production costs, customer demand and our relationships with

customers and suppliers. Some of the impacts our business may experience as a result of tariffs and other trade disruptions include, but are not limited to, increases of the costs of the ingredients, packaging and other materials necessary to produce, distribute and sell our products, and an unfavorable shift in sales mix away from our Branded Retail products, due to a change in consumer buying patterns as a result of increased prices in the economy as a whole. In addition, our compliance with any such newly enacted tariffs and/or other trade disruptions could increase our cost of doing business, restrict our ability to operate our business or execute our strategies, and could result in fines and penalties or reputational harm if we are found to not be in full compliance. Any of these events could exacerbate the other risks and uncertainties described herein, or in other reports filed with the SEC from time to time, and could materially adversely affect our business, results of operations and financial condition.

Technology Risks

We may be adversely impacted if our IT systems fail to perform adequately, including with respect to cybersecurity issues.

The efficient operation of our business depends on our IT systems. We rely on our IT systems to effectively manage our business data, communications, supply chain, order entry and fulfillment, and other business processes. The failure of our IT systems (including those provided to us by third-parties) to perform as we anticipate could disrupt our business and could result in billing, collecting and ordering errors, processing inefficiencies, and the loss of sales and customers, causing our business and results of operations to suffer.

In addition, our IT systems (including those provided to us by third parties), and the IT systems of our third-party business partners, may be vulnerable to damage or interruption from circumstances beyond our control, including fire, natural disasters, systems failures, security breaches or intrusions (including theft of customer, consumer or other confidential data), and cyber incidents. Cyber-attacks and other cyber incidents are occurring more frequently in the United States and are becoming more sophisticated with a wide range of expertise and motives. Such cyber-attacks and cyber incidents can take many forms, including extortion, denial of service, employee or personnel failures, or social engineering through phishing, ransomware or malware. Cybersecurity threat actors also may attempt to exploit vulnerabilities through software including software that is commonly used by companies in cloud-based services and bundled software. In addition, the risk of cyber-attacks has increased in connection with the military conflict between Russia and Ukraine, the current instability in the Middle East, and the resulting geopolitical conflicts. In light of those and other geopolitical events, nation-state actors or their supporters may launch retaliatory cyber-attacks, and may attempt to cause supply chain and other third-party service provider disruptions, or take other geopolitically motivated retaliatory actions that may disrupt our business operations, result in data compromise, or both. These circumstances increase the likelihood of cyber-attacks and/or security breaches. In addition, the rapid evolution and increased adoption of artificial intelligence (“AI”) and machine learning technologies may intensify our cybersecurity risks and make it more difficult to anticipate and implement protective measures to recognize, detect, and prevent the occurrence of any of the cyber events described above. Further, the technology and techniques used in cyber-attacks are constantly evolving and the pace and extent of that evolution may accelerate with the use of emerging technologies including AI and machine learning.

There can be no assurance that the policies, protocols, and practices that we follow to address cybersecurity, including our controls or procedures, will be fully implemented, complied with or effective in protecting our systems and information. We may incur significant costs in protecting or remediating cyber-attacks or other cyber incidents. If we are unable to prevent physical and electronic break-ins, cyber-attacks and other information security breaches, we may suffer financial and reputational damage, operational disruptions, be subject to litigation, civil or criminal investigations, regulatory intervention or incur costs related to remediation, payment of ransom or penalties, including as result of unauthorized disclosure of confidential information belonging to us or to our partners, customers, suppliers or employees.

We may experience difficulties in deploying the upgrade of our ERP system.

We are in the midst of deploying an upgrade to our ERP system to a more robust platform. The upgrade of the ERP system is designed to accurately maintain our financial records, enhance our operational functionality and provide timely information to our management team related to the operations of the business. The design and implementation of the upgrade to the ERP system has required, and continues to require, an investment of significant personnel and financial resources, including substantial expenditures for outside consultants, system hardware and software in addition to other expenses in connection with the transformation of our financial and operating processes. During the second quarter of Fiscal 2023, we began deploying the ERP upgrade. The deployment is anticipated to be completed in Fiscal 2027. We may not be able to deploy the ERP system upgrade successfully without experiencing delays, increased costs and other difficulties, including potential design defects, miscalculations, testing requirements, and the diversion of management’s attention from day-to-day business operations. If we are unable to deploy the ERP system upgrade as planned, the effectiveness of our internal control over financial reporting could be adversely affected, our ability to assess those controls adequately could be delayed, and our financial condition, results of operations and cash flows could be negatively impacted.

We use, and may continue to expand our use of, AI in our business, and challenges with properly managing its use could result in reputational harm, competitive harm, and legal liability, and adversely affect our business operations.

We may leverage AI, including generative AI, in our product development, operations, and software programming. Our competitors or other third parties may incorporate AI into their operational processes more quickly or more successfully than we do, which could impair our ability to compete effectively and adversely affect our results of operations.

In addition, there are significant risks involved in developing and deploying AI and there can be no assurance that the usage of AI will enhance our products or services or be beneficial to our business, including our efficiency or profitability. For example, our AI-related efforts, particularly those related to generative AI, subject us to risks related to accuracy, intellectual property infringement or misappropriation, data privacy, and cybersecurity, among others. It is also uncertain how various laws related to online services, intermediary liability, and other issues will apply to content generated by AI. AI also presents emerging ethical issues, and if our use of AI becomes controversial, we may experience brand or reputational harm, competitive harm, or legal liability. The rapid evolution of AI, including the regulation of AI by government or other regulatory agencies, will require significant resources to develop, test and maintain our platforms, offerings, services, and features to implement AI ethically and minimize any unintended harmful impacts.

Industry Risks

Increases in costs and/or shortages of raw materials, fuels and utilities could adversely impact our profitability.

Raw materials, such as flour, sweeteners, shortening, yeast, water, and eggs, which are used in our bakery products, are subject to price fluctuations. The cost of these inputs may fluctuate widely due to foreign and domestic government policies and regulations (including tariffs), inflation, weather conditions, domestic and international demand, availability due to supply chain conditions, livestock disease (for example, avian influenza) or other unforeseen circumstances. The global economy has been negatively impacted by the military conflict between Russia and Ukraine and the current instability in the Middle East. Both are fast-moving and uncertain. Global grain markets have exhibited increased volatility as sanctions have been imposed on Russia by the United States, the United Kingdom, the European Union, and others in response to Russia's invasion of Ukraine. Furthermore, the current instability in the Middle East may impact oil production capacity, oil prices, and cause disruptions in global supply chains and shipping routes. While we do not expect our operations to be directly impacted by this conflict and instability at this time, changes in global grain and commodity flows and increased supply chain costs could impact the markets in which we operate, which may in turn negatively impact our business, results of operations, supply chain and financial condition. Any substantial change in the prices or availability of raw materials may have an adverse impact on our profitability. We enter into forward purchase agreements and other derivative financial instruments from time to time to manage the impact of such volatility in raw materials prices; however, these strategies may not be adequate to overcome increases in market prices or availability. Our failure to enter into hedging or fixed price arrangements or any decrease in the availability or increase in the cost of these agreements and instruments could increase the price of these raw materials and significantly affect our earnings.

In addition, we are dependent upon natural gas or propane for firing ovens. The independent distributors and third-party transportation companies are dependent upon gasoline and diesel for their vehicles. The cost of these fuels may fluctuate widely due to economic and political conditions, government policy and regulation, war or other conflicts, or other unforeseen circumstances. Substantial future increases in prices for, or shortages of, these fuels could have a material adverse effect on our profitability, financial condition or results of operations. There can be no assurance that we can cover these potential cost increases through future pricing actions. Also, as a result of these pricing actions, consumers could purchase less or move from purchasing higher-margin products to lower-margin products.

Inflation may adversely affect us by increasing our costs of production, materials, and labor. In an inflationary environment, such as the current economic environment, depending on the market conditions of the baking industry, we may be unable to raise the prices of our products enough to keep up with the rate of inflation, which would reduce our profit margins, and continued inflationary pressures could impact our business, financial condition, and results of operations.

Competition could adversely impact revenues and profitability.

The U.S. bakery industry is highly competitive. Our principal competitors in these categories all have substantial financial, marketing, and other resources. In most product categories, we compete not only with other widely advertised branded products, but also with store branded products that are generally sold at lower prices. Competition is based on product availability, product quality, price, effective promotions, and the ability to target changing consumer preferences.

Competitor and customer pressures require that we timely and effectively respond to changes in relevant markets, including changes to distribution channels and technological developments. Substantial growth in e-commerce has encouraged the entry of new competitors and business models, intensifying competition by simplifying distribution and lowering barriers to entry. The expanding

presence of e-commerce retailers has impacted, and may continue to impact, consumer preferences and market dynamics, which in turn may negatively affect our sales or profits. Failure to effectively and timely assess new or developing trends, technological advancements (including advancements such as AI and machine learning, which may become critical in understanding consumer preferences in the future) or changes in distribution methods could negatively impact demand for our products, our operating results, achievement of our strategic and financial goals and our ability to capitalize on new revenue or value-producing opportunities.

We experience price pressure from time to time due to competitors' promotional activity and other pricing efforts. This pricing pressure is particularly strong during adverse economic periods and periods of high inflation. Increased competition could result in reduced sales, margins, profits and market share.

Product removals, damaged product or safety concerns could adversely impact our results of operations.

We may be required to recall certain of our products should they be mislabeled, contaminated, spoiled, tampered with or damaged. We may become involved in lawsuits and legal proceedings alleging that the consumption of any of our products causes or caused injury, illness or death. Any such product removal, damaged product or an adverse result in any litigation related to such a product removal or damaged product could have a material adverse effect on our operating and financial results in future periods, depending on the costs of the product removal from the market, the destruction of product inventory, diversion of management time and attention, contractual and other claims made by customers that we supply, loss of key customers, competitive reaction and consumer attitudes. Even if a product liability, consumer fraud or other claim is unsuccessful or without merit, the negative publicity surrounding such assertions regarding our products could adversely affect our reputation and brand image. We also could be adversely affected if our customers or consumers in our principal markets lose confidence in the safety and quality of our products.

During fiscal years 2018 through 2023, we have been required, and may be required in future periods, to remove certain of our products from the market should they be mislabeled, contaminated, spoiled, tampered with or damaged, including as a result of inferior ingredients provided by any of our suppliers.

Consolidation in the retail and foodservice industries could adversely affect our sales and profitability.

We expect consolidations among our retail and foodservice customers to continue. If this trend continues and our retail and foodservice customers continue to grow larger due to consolidation in their respective industries, they may demand lower pricing and increased promotional programs. In addition, these pressures may restrict our ability to increase prices, including in response to commodity and other cost increases. Our margins and profits could decrease if a reduction in prices or increased costs are not counterbalanced with increased sales volume.

Inability to anticipate or respond to changes in consumer preferences may result in decreased demand for our products, which could have an adverse impact on our future growth and operating results.

The fresh packaged bread category has experienced volume declines in recent years reflecting, among other factors, shifts in consumer behavior and preferences. Our success depends in part on our ability to respond to current market trends and to anticipate the tastes and dietary habits of consumers, including concerns of consumers regarding nutrition, health and wellness, obesity, product attributes, ingredients, and packaging. Similarly, demand for our products could be negatively affected by consumer concerns or perceptions regarding the health effects of specific ingredients such as, but not limited to, sodium, trans fats, sugar, processed wheat, or other product ingredients or attributes. Also, certain weight loss drugs and glucagon-like peptide 1 (GLP-1) agonists, which may suppress a person's appetite, may impact demand for our products. The introduction of new products and product extensions requires significant development and marketing investment. If we fail to anticipate, identify, or react to changes in consumer preferences, or if we fail to introduce new and improved products on a timely basis, we could experience reduced demand for our products, which could cause our sales, profitability, financial condition, and operating results to suffer.

We rely on several large customers for a significant portion of sales and the loss of one of our large customers or their decision to give higher priority to other brands could adversely affect our business, financial condition or results of operations.

We have several large customers that account for a significant portion of sales, and the loss of one of our large customers could adversely affect our financial condition and results of operations. Our top ten customers accounted for 57.7% of sales during Fiscal 2025. Our largest customer, Walmart/Sam's Club, accounted for 21.5% during this period. These customers do not typically enter long-term sales contracts, and instead make purchase decisions based on a combination of price, product quality, consumer demand, and customer service performance. At any time, there is a risk that our customers will give higher priority to their own products or to the products of our competitors, resulting in less shelf space for our products. Additionally, our customers may face financial or other difficulties that may impact their operations and their purchases from us. Disputes with significant suppliers could also adversely affect our ability to supply products to our customers. If our sales to one or more of these customers are reduced, this reduction may adversely affect our business, financial condition or results of operations.

Our large customers may impose requirements on us that may adversely affect our results of operations.

From time to time, our large customers may re-evaluate or refine their business practices and impose new or revised requirements on us, the distributors, and the customers' other suppliers. The growth of large mass merchandisers, supercenters and dollar stores, together with changes in consumer shopping patterns, have produced large, sophisticated customers with increased buying power and negotiating strength. Current trends among retailers and foodservice customers include fostering high levels of competition among suppliers, demanding new products or increased promotional programs, requiring suppliers to maintain or reduce product prices, reducing shelf space for our products, and requiring product delivery with shorter lead times. These business changes may involve inventory practices, logistics, or other aspects of the customer-supplier relationship. Compliance with requirements imposed by large customers may be costly and may have an adverse effect on our margins and profitability. However, if we fail to meet a large customer's demands, we could lose that customer's business, which also could adversely affect our sales and results of operations.

Legal and Regulatory Risks

Government regulation, including labeling or warning requirements, could adversely impact our results of operations and financial condition.

As a producer and marketer of food items, our production processes, product quality, packaging, labeling, storage, and distribution, and the safety of food products and the health and safety of our employees, are subject to regulation by various federal, state and local government entities and agencies. In addition, the marketing and labeling of food products has come under increased scrutiny in recent years, and the food industry has been subject to an increasing number of legal proceedings and claims relating to alleged false or deceptive marketing and labeling under federal, state or local laws or regulations. Uncertainty regarding labeling standards has led to customer confusion and legal challenges. The imposition or proposed imposition of additional product labeling or warning requirements could reduce overall consumption of our products, lead to negative publicity (whether based in scientific fact or not) or leave consumers with the perception (whether or not valid) that our products do not meet their health and wellness needs. Such factors could adversely affect our sales and results of operations.

In addition, our operations are subject to extensive and increasingly stringent regulations administered by the Environmental Protection Agency related to the discharge of materials into the environment and the handling and disposition of waste. Failure to comply with these regulations can have serious consequences, including civil and administrative penalties and negative publicity. Changes in applicable laws or regulations or evolving interpretations thereof, including increased government regulations to limit carbon dioxide and other greenhouse gas emissions as a result of concern over climate change, may result in increased compliance costs, capital expenditures, and other financial obligations for us, which could affect our profitability or impede the production or distribution of our products, and affect our sales.

Compliance with federal, state and local laws and regulations is costly and time consuming. Failure to comply with, or violations of, applicable laws and the regulatory requirements of one or more of these entities and agencies could subject us to civil remedies, including fines, injunctions, recalls or seizures, as well as potential criminal sanctions, any of which could result in increased operating costs and adversely affect our results of operations and financial condition. Legal proceedings or claims related to our marketing could damage our reputation and/or adversely affect our business or financial results.

Climate change, or legal, regulatory, or market measures to address climate change, may negatively affect our business and operations.

There is growing concern that carbon dioxide and other greenhouse gases in the atmosphere may have an adverse impact on global temperatures, weather patterns, and the frequency and severity of extreme weather and natural disasters. In the event that such climate change has a negative effect on agricultural productivity, we may be subject to decreased availability or less favorable pricing for certain commodities that are necessary for our products, such as corn and wheat. Adverse weather conditions and natural disasters can reduce crop size and crop quality, which in turn could reduce our supplies of raw materials, lower recoveries of usable raw materials, increase the prices of our raw materials, increase our cost of transporting and storing raw materials, or disrupt our production schedules.

We may also be subjected to decreased availability or less favorable pricing for water as a result of climate change, which could impact our production and distribution operations. In addition, natural disasters and extreme weather conditions may disrupt the productivity of our facilities or the operation of our supply chain. The increasing concern over climate change also may result in more regional, federal, and/or global legal and regulatory requirements to reduce or mitigate the effects of greenhouse gases. In the event that such regulation is enacted and is more aggressive than the sustainability measures that we are currently undertaking to monitor our emissions and improve our energy efficiency, we may experience significant increases in our costs of operation and delivery. In particular, increasing regulation of fuel emissions could substantially increase the distribution and supply chain costs associated with our products. As a result, climate change could negatively affect our business and operations.

Additionally, as concerns about climate change and other environmental issues continue to increase, we may be required to comply with new laws and regulations which may result in increased/not yet identified compliance costs, the scale of which is to be evaluated. We continue to evaluate the possible impact of such new laws and regulations.

We are subject to increasing legal complexity and could be party to litigation that may adversely affect our business.

Increasing legal complexity may continue to affect our operations and results in material ways. We are or could be subject to legal proceedings that may adversely affect our business, including class actions, administrative proceedings, government investigations, securities laws, employment and personal injury claims, disputes with current or former suppliers, claims by current or former distributors, and intellectual property claims (including claims that we infringed another party's trademarks, copyrights, or patents). Inconsistent standards imposed by governmental authorities can adversely affect our business and increase our exposure to litigation. Litigation involving our independent distributor model and the independent contractor classification of the independent distributors, as well as litigation related to disclosure made by us in connection therewith, if determined adversely, could increase costs, negatively impact our business prospects and the business prospects of our distributors and subject us to incremental liability for their actions. We are also subject to the legal and compliance risks associated with privacy, data collection, protection and management, in particular as it relates to information we collect when we provide products to customers.

Although we have various insurance programs in place that, subject to their terms and conditions, are intended to address certain costs associated with these events, the potential liabilities associated with these litigation matters, or those that could arise in the future, could be excluded from coverage or, if covered, could exceed the coverage provided by such programs. In addition, insurance carriers may seek to rescind or deny coverage with respect to pending or future claims or lawsuits. If we do not have sufficient coverage under our policies, or if coverage is denied, we may be required to make material payments to settle litigation or satisfy any judgment. Any of these consequences could adversely affect our financial condition, results of operations and cash flows.

Executive Offices

The address and telephone number of our principal executive offices are 1919 Flowers Circle, Thomasville, Georgia 31757, (229) 226-9110.

Information about our Executive Officers

The following table sets forth certain information regarding the persons who currently serve as the executive officers of Flowers Foods.

EXECUTIVE OFFICERS

Name, Age and Office	Business Experience
A. Ryals McMullian Age 56 Chairman and Chief Executive Officer	Mr. McMullian serves as chairman and chief executive officer of Flowers. He was elected as chairman of the board of directors effective May 25, 2023 and has served as chief executive officer since May 2019. Previously, Mr. McMullian served as president and chief executive officer from May 2019 to August 2023. He served as chief operating officer from July 2018 until May 2019 and as chief strategy officer from May 2017 to July 2018. Prior to those appointments, Mr. McMullian served as vice president of mergers and acquisitions and deputy general counsel from 2015 until 2017, vice president and associate general counsel from 2011 until 2015, and as associate general counsel from 2003, when he joined the company, until 2011.
D. Anthony Scaglione Age 53 Chief Financial Officer	Mr. Scaglione joined the company as chief financial officer (“CFO”) on January 1, 2026. Previously, he served as chief financial officer of Total Wine & More, a privately held retailer specializing in wine, spirits, and beer, from September 2024 to March 2025. He also served as executive vice president and chief financial officer of ODP Corporation, a global B2B office equipment and services company, from July 2020 to September 2024. Prior to joining ODP Corporation, he was executive vice president and chief financial officer of ABM Industries Inc. (“ABM”), a global services company, from 2015 to July 2020. Prior to joining ABM in 2009, Mr. Scaglione held executive finance positions at CA Technologies from 2005 to 2009 and served as a manager with Ernst & Young from 2001 to 2005.
Heeth Varnedoe IV Age 59 President and Chief Operating Officer	Mr. Varnedoe was named president and chief operating officer effective September 2023. Previously, he served as chief operating officer from January 2023 to August 2023. He served as chief transformation officer from December 2020 until January 2023, senior vice president of DSD Regions/Sales from August 2017 until December 2020, and president of Flowers’ Phoenix, Arizona bakery from January 2016 to August 2017. Mr. Varnedoe joined Flowers in 1990 and held a number of positions before leaving the company in 2000 to pursue other business interests. He rejoined Flowers in 2012.
Terry S. Thomas Age 56 Chief Growth Officer	Mr. Thomas joined Flowers as chief growth officer in September 2023. Prior to joining the company, Mr. Thomas served as global chief customer officer of Unilever, a global food, personal care, and household products company, from January 2022 to July 2023, and executive vice president, chief customer officer of Unilever from July 2019 to July 2023. During his career with Unilever, he was named senior vice president of customer development in 2013 and senior vice president of customer development, U.S. grocery channel, DSD & natural channel in 2018. Prior to joining Unilever, Mr. Thomas worked for PepsiCo, Inc. for 13 years, serving as vice president and general manager of various business channels, including small format, global convenience, gas, drug, dollar, and super regional grocery. Mr. Thomas also held management positions at the Coca-Cola Company, Clorox Company, and The Procter & Gamble Company. From August 2020 to August 2023, Mr. Thomas served on Flowers’ board of directors as an independent director.
Stephanie B. Tillman Age 55 Chief Legal Counsel	Ms. Tillman was named chief legal counsel and corporate secretary effective January 2020. Previously, she served as vice president, chief compliance officer, and deputy general counsel from April 2011 to January 2020. Prior to that, Ms. Tillman served in various roles in the legal department since joining the company in 1995.
Cindy L. Cox Age 59 Chief Human Resources Officer	Ms. Cox joined Flowers as chief human resources officer in February 2023. Before joining Flowers, she served as vice president of human resources for the Refrigeration segment of Carrier Corporation, the leading global provider of healthy, safe, sustainable, and intelligent building and cold chain solutions (“Carrier”), since July 2017. During her 27-year tenure with Carrier and Pratt & Whitney, she held multiple human resources roles of increasing scale and responsibility.
H. Mark Courtney Age 65 Chief Brand Officer	Mr. Courtney was named chief brand officer in July 2020. He previously served as president of the Fresh Packaged Bread Business Unit from May 2019 to July 2020, senior vice president of retail accounts from May 2017 to May 2019, and senior vice president of sales from June 2008 to May 2017. Prior to that, Mr. Courtney served in various sales positions since joining the company in 1983.

Name, Age and Office	Business Experience
Tom Winters Age 62 Chief Supply Chain Officer	Mr. Winters joined Flowers as chief supply chain officer in April 2022. Before joining Flowers, he served as senior vice president of supply chain at PepsiCo, Inc., an American multinational food, snack, and beverage corporation, overseeing supply chain functions for two of the company's North American divisions. During his 19-year tenure at PepsiCo, he also held a number of operations and production roles with responsibility for the management of internal plants, warehouses, and contract manufacturers. He began his career with The Proctor & Gamble Company in 1988, serving in a number of operational leadership roles at production facilities in the U.S. and Puerto Rico until joining PepsiCo in 2003.
David M. Roach Age 56 Chief DSD Operations Officer	Mr. Roach was named chief DSD operations officer in January 2026. He previously served as chief strategic projects officer from August 2022 to January 2026, president of cake operations from July 2020 until August 2022, and president of the Snacking/Specialty Business Unit from May 2017 to July 2020. Prior to that, Mr. Roach served in various sales and management positions since joining the company in 1992.
Mark Chaffin Age 55 Chief Information Officer	Mr. Chaffin was named chief information officer (“CIO”) in February 2020 after serving four months in an interim capacity. Prior to joining Flowers, Mr. Chaffin was a partner in the Southeast practice of Fortium Partners, a provider of technology leadership services, from 2019 until joining Flowers. He also served as CIO at SGSCO, a global package and brand design and marketing company, from 2015 to 2019 and as CIO for Acosta Sales and Marketing from 2007 to 2015.

Item 1B. *Unresolved Staff Comments*

None

Item 1C. *Cybersecurity*

Protecting the confidentiality, integrity, and availability of our information systems is critical to our business operations, brands, and stakeholders. We maintain an enterprise cybersecurity program with processes to assess, identify, and manage material risks from cybersecurity threats. These processes are integrated into our enterprise risk management (“ERM”) framework and address risks that could arise from our own operations as well as incidents at third-party service providers or partners

Risk Management and Strategy. Our cybersecurity program is aligned to industry-recognized frameworks (including the NIST Cybersecurity Framework) and is designed to evolve as threats and our business change. However, this does not mean that we will meet, or maintain, any particular technical standard, specification, framework, or requirement in the future, but rather we use the NIST Cybersecurity Framework and other standards as a guide to help us identify, assess and manage cybersecurity risks relevant to our business. Key elements include:

- **Threat identification and prevention:** Layered technical and administrative controls informed by internal/external threat intelligence and periodic vulnerability assessments and penetration testing conducted with qualified third parties.
- **Incident preparedness:** A documented Computer Security Incident Response Plan (“CSIRP”) that establishes an organizational framework and guidelines to assist the company in identifying, responding to, and recovering from computer security incidents both at the company and its third-party service providers in connection with incidents that may impact the company, including the security incident management team (the “SIM Team”), a legal team (the “Legal Team”) and the computer security incident response team (the “CSIRT”) and regular tabletop exercises involving cross-functional stakeholders to validate readiness.
- **Training and awareness:** Mandatory training for employees and contractors, phishing simulations, and user-friendly reporting tools for suspected phishing or security issues.
- **Third-party risk:** Risk-based due diligence and contractual requirements for selected vendors and service providers and ongoing performance monitoring proportionate to the services provided.

We also periodically benchmark elements of our program and may engage independent experts to assess specific controls or processes as part of our continuous improvement efforts. In addition, we maintain cyber insurance coverage designed to help mitigate potential financial impacts of certain cybersecurity incidents. However, there is no guarantee that such coverage will be sufficient to address costs, liabilities and damages we may incur in connection with a cybersecurity incident or that such coverage will continue to be available on commercially reasonable terms or at all.

Governance. The company's board of directors (the "Board" or "Board of Directors") oversees the company's Information Security program, which is approved annually. The audit committee is tasked with oversight of certain risk issues, including cybersecurity, and regularly reports its activities to the Board of Directors. As described in its charter, the audit committee of the Board of Directors oversees risks related to information technology security and regularly reviews and discusses with the VP of Information Security & Compliance and other members of management the company's information technology security risk exposures, including (a) the potential impact of those exposures on the company's business, financial results, operations and reputation, (b) the steps that management has taken to monitor and mitigate such exposures, (c) the company's information governance policies and programs, and (d) legislative and regulatory developments that could materially impact the company's privacy and data risk exposure. Management's execution of the cybersecurity program is led by our Vice President of Information Security & Compliance, who reports directly to the company's chief financial officer. The VP of Information Security & Compliance has responsibility for information security strategy and operation and managing and assessing material risks from cybersecurity threats. This individual has a variety of IT security skills, experiences and professional expertise, obtained through work experience and information security certifications and education. The VP of Information Security & Compliance regularly reports to the audit committee regarding policies and processes for assessing and managing risk associated with information technology and cybersecurity, as well as material cybersecurity incidents.

In consultation with the VP of Information Security & Compliance, each of the SIM Team, the Legal Team, and the CSIRT, has a discrete set of responsibilities and obligations under the CSIRP. The CSIRT is a broad, cross-functional team of management stakeholders assigned with coordinating, developing, and managing the company's response to computer security incidents when activated. The CSIRP provides, when activated, the CSIRT will lead all aspects of incident response, including the engagement of outside counsel and other third-party resources, such as an external incident response team, forensic resources, a crisis management or public relations firm, or notification service providers.

If the CSIRT is activated, incidents are escalated to a subcommittee of our Disclosure Committee, comprised of senior executives and leaders throughout the company, for materiality assessment and disclosure determinations consistent with applicable SEC requirements.

For incidents where the CSIRT is not activated, either the SIM Team or the Legal Team, depending on the circumstances, is expected to lead and manage the incident response.

Impacts of Cybersecurity Threats. To date, we do not believe that any risks from cybersecurity threats, including as a result of any previous cybersecurity incidents, have materially affected, or are reasonably likely to materially affect, our business strategy, results of operations, or financial condition. We continue to monitor the evolving threat environment, including ransomware, third-party incidents, and risks to operational technology systems, and we may experience cybersecurity events in the future that could have a material impact.

Cautionary Note. We do not disclose specific technical information about our security architecture, control configurations, or vulnerabilities where such detail could impede our ability to respond to threats or could be used by threat actors to cause harm. Our disclosures are designed to provide decision-useful information to investors while maintaining appropriate security.

Item 2. Properties

Our principal executive offices are company owned and located in Thomasville, Georgia. The company also leases properties that are used for shared services functions and our IT group and owns several properties for our corporate offices. The company also has an additional shared services center in Phoenix, Arizona.

We operate 44 bakeries across the continental U.S. Each of the listed bakeries is company owned except for Modesto, California and Philadelphia, Pennsylvania. We believe that our bakeries have adequate production utilization and can meet the current operational requirements for the operation of the business. As discussed in Item 1., *Business*, of this Form 10-K, the company has restructured its plant operation responsibilities from the sales function to the supply chain function. Additionally, across the continental U.S. in the markets we serve, we own approximately 140 warehouse/distribution centers and lease approximately 500 warehouse/distribution centers.

The table below sets forth the production and sales operations in our bakeries:

Alabama	Kansas	Tennessee
Birmingham (P)	Lenexa (PS)	Cleveland (P)
Montgomery (P)	Kentucky	Crossville (PS)*
Tuscaloosa (P)	Bardstown (P)	Knoxville (P)
Arizona	London (PS)*	Texas
Mesa (PS)*	Louisiana	Denton (P)
Tolleson (P)	Lafayette (P)	El Paso (PS)
Arkansas	New Orleans (PS)	Houston (P)
Batesville (PS)	Maine	Houston (PS)
Texarkana (P)	Lewiston (P)	San Antonio (PS)
California	Lewiston (PS)	Tyler (PS)
Modesto (Leased) (P)	Nevada	Utah
Colorado	Henderson (PS)	West Jordan (P)
Johnstown (P)	North Carolina	Virginia
Florida	Goldsboro (PS)	Lynchburg (P)
Bradenton (P)	Jamestown (P)	Norfolk (PS)
Jacksonville (P)	Newton (P)	
Lakeland (P)	Oregon	
Miami (P)	Milwaukie (PS)*	
Georgia	Pennsylvania	
Savannah (P)	Oxford (PS)	
Suwanee (P)	Philadelphia (Leased) (PS)	
Thomasville (PS)		
Tucker (P)		
Villa Rica (P)		

P - Production Only

PS - Production and Sales

*Only thrift store sales

We believe our facilities are well-maintained and adequate, that they are being appropriately utilized and that they have sufficient production utilization for their present intended purposes. Utilization is actual labor time as a percent of available hours of production in a week (based on 120 hours/week for three shifts). On a consolidated basis during Fiscal 2025, our average quarterly production utilization ranged from 90% to 99% across all bakeries. During heightened periods of demand, the company can improve utilization by streamlining production with longer production runs and fewer differentiated products produced. Production utilization is not materially different when a sales facility is also located at the bakery.

Item 3. Legal Proceedings

For a description of all material pending legal proceedings, See Note 23, *Commitments and Contingencies*, of Notes to Consolidated Financial Statements of this Form 10-K.

Item 4. Mine Safety Disclosures

Not Applicable

PART II

Item 5. Market for the Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Market Information

Shares of the company's common stock are quoted on the New York Stock Exchange (the "NYSE") under the symbol "FLO."

Holders

As of February 20, 2026, there were approximately 2,982 holders of record of the company's common stock.

Dividends

The payment of dividends is subject to the discretion of the company's Board. For Fiscal 2025 and Fiscal 2024, we paid cash dividends on common stock totaling \$0.9825 and \$0.9500 per share, respectively. While we intend to continue paying dividends on our common stock, the declaration of cash dividends is at the discretion of the Board, considered in the context of, among other things, general business conditions, our financial results, contractual, legal and regulatory restrictions regarding dividend payments and any other factors the Board may consider relevant.

Purchases of Equity Securities by the Issuer

As originally announced on December 19, 2002, and subsequently increased, our Board of Directors had approved a plan that authorized share repurchases of up to 74.6 million shares. On May 26, 2022, the company announced that the Board of Directors increased the company's share repurchase authorization by 20.0 million shares. Under the share repurchase plan, the company may repurchase its common stock in open market or privately negotiated transactions or under an accelerated share repurchase program at such times and at such prices as determined to be in the company's best interest. These repurchases may be commenced or suspended without prior notice depending on then-existing business or market conditions and other factors. The company did not purchase any shares of its common stock in the fourth quarter of Fiscal 2025. From the inception of the plan through January 3, 2026, 73.3 million shares have been repurchased, at a cost of \$761.5 million. At the close of the company's fourth quarter on January 3, 2026, 21.3 million shares remained under the existing authorization.

For information on securities authorized for issuance under the company's compensation plans, see Item 12, *Security Ownership of Certain Beneficial Owners and Management and Related Stockholders Matters*.

Stock Performance Graph

The chart below is a comparison of the cumulative total return (assuming the reinvestment of all dividends paid) of our common stock, Standard & Poor's 500 Index, Standard & Poor's 500 Packaged Foods and Meats Index, and Standard & Poor's MidCap 400 Index for the period January 2, 2021 through January 3, 2026, the last day of our 2025 fiscal year.

	January 2, 2021	January 1, 2022	December 31, 2022	December 30, 2023	December 28, 2024	January 3, 2026
FLOWERS FOODS INC	100.00	125.63	135.65	110.38	104.62	59.02
S&P 500 INDEX	100.00	128.71	105.40	133.10	168.91	196.57
S&P 500 PACKAGED FOODS & MEATS INDEX	100.00	113.08	123.68	114.34	108.83	97.03
S&P MIDCAP 400 INDEX	100.00	124.76	108.47	126.29	144.63	156.76

Companies in the S&P 500 Index, the S&P 500 Packaged Foods and Meats Index, and the S&P MidCap 400 Index are weighted by market capitalization and indexed to \$100 at January 2, 2021. Flowers Foods' share price is also indexed to \$100 at January 2, 2021.

Item 6. [Reserved]

Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations

The following discussion should be read in conjunction with Item 1., *Business*, and the Consolidated Financial Statements and accompanying Notes to Consolidated Financial Statements included in this Form 10-K. The following information contains forward-looking statements which involve certain risks and uncertainties. See Forward-Looking Statements at the beginning of this Form 10-K. Any reference to sales refers to net sales inclusive of allowances and deductions against gross sales for variable consideration and consideration payable to customers.

Management’s Discussion and Analysis of Financial Condition and Results of Operations (“MD&A”) is segregated into four sections, including:

- *Executive overview* — provides a summary of our operating performance and cash flows, industry trends, and our strategic initiatives.
- *Critical accounting estimates* — describes the accounting areas where management makes critical estimates to report our financial condition and results of operations.
- *Results of operations* — an analysis of the company’s consolidated results of operations for Fiscal 2025 compared to Fiscal 2024 as presented in the Consolidated Financial Statements. Refer to the Annual Report on Form 10-K for the fiscal year ended December 28, 2024 for a discussion of the results of operations for Fiscal 2024 compared to Fiscal 2023.
- *Liquidity, capital resources and financial position* — analyzes cash flow, contractual obligations, and certain other matters affecting the company’s financial position.

MATTERS AFFECTING COMPARABILITY

The company operates on a 52-53 week fiscal year ending the Saturday nearest December 31. Fiscal 2025 consisted of 53 weeks and Fiscal 2024 consisted of 52 weeks. Fiscal 2026 will consist of 52 weeks. Furthermore, comparative results from quarter to quarter are impacted by the company’s fiscal reporting calendar. Internal financial results and key performance indicators are reported on a weekly basis to ensure the same number of Saturdays and Sundays in comparable months to allow for consistent four-week progression analysis. This results in our first quarter consisting of sixteen weeks while the remaining three quarters have twelve weeks (except in cases where there is an extra week every five or six years in the fourth quarter). Accordingly, interim results may not be indicative of subsequent interim period results, or comparable to prior or subsequent interim period results, due to differences in the lengths of the interim periods.

Additionally, detailed below are expense items affecting comparability that will provide additional context while reading this discussion:

	<u>Fiscal 2025</u>	<u>Fiscal 2024</u>	<u>Footnote</u>
	<u>53 weeks</u>	<u>52 weeks</u>	<u>Disclosure</u>
	(Amounts in thousands)		
Business process improvement costs	\$ 3,368	\$ 4,529	Note 2
Restructuring charges	6,083	7,403	Note 5
Restructuring-related implementation costs	19,529	2,979	Note 5
Plant closure costs and impairment of assets	7,397	10,310	Note 2
Impairment of intangible assets	135,981	—	Note 2, 10
Acquisition and integration-related costs	17,904	2,008	Note 6
Loss on inferior ingredient	2,657	—	Note 2
Legal settlements and related costs	902	3,800	Note 23
Pension plan settlement loss	—	241	Note 21
	<u>\$ 193,821</u>	<u>\$ 31,270</u>	

Business process improvement costs related to the transformation strategy initiatives. In the second half of Fiscal 2020, we launched initiatives to transform our business, including an upgrade to our information system, as well as investments in e-commerce, autonomous planning, and our “bakery of the future” initiatives. These initiatives are further discussed in Item 1., *Business*, of this Form 10-K. Implementation of the ERP upgrade is anticipated to be completed in Fiscal 2027. The expensed portion of costs incurred related to these initiatives, which was primarily consulting costs, was \$3.4 million in Fiscal 2025 and \$4.5 million in Fiscal 2024, and is reflected in the selling, distribution, and administrative expenses line item of the Consolidated Statements of Income.

Restructuring charges and related implementation costs. During the first quarter of Fiscal 2025, we began a review of our cost-to-serve focused on improving efficiencies and identifying cost reduction opportunities. Based on this review, we announced a restructuring program in the third quarter of Fiscal 2025 and incurred costs for employee termination benefits related to a reduction-in-force ("RIF") of \$5.5 million and made payments of \$4.8 million during Fiscal 2025. The RIF charges are included in the restructuring charges line item of the Consolidated Statements of Income. In the fourth quarter of Fiscal 2025, we began a comprehensive review of our brands, operations, and financial strategy. Although this review is in the early stages, as discussed in the *Impairment of intangible assets* section below, it resulted in the impairment of two regional brands in the fourth quarter of Fiscal 2025. This aligns with our strategy to optimize our brand portfolio and invest in our national brands and key product categories. Additionally, during Fiscal 2025, the company incurred \$19.5 million of consulting costs to implement these transformative programs and these costs are included in the selling, distribution, and administrative expenses line item of the Consolidated Statements of Income. We anticipate additional restructuring charges and related costs in subsequent quarters.

In April 2024, the company announced a cost savings program to improve operational performance, which included employee termination benefits associated with a reduction-in-force ("RIF") and other expense optimization initiatives. During Fiscal 2024, the company incurred RIF costs of \$7.4 million and made payments of \$7.3 million. The company incurred final RIF charges of \$0.6 million and made the final payments of \$0.7 million in the first quarter of Fiscal 2025. The company also incurred consulting costs associated with implementing the restructuring program in Fiscal 2024 which are included in the selling, distribution, and administrative expenses line item of the Consolidated Statements of Income.

Plant closure costs and impairment of assets. On February 12, 2025, the company announced the closure of its Bailey Street Bakery located in Atlanta, Georgia. The bakery produced bread and bun products and ceased production on April 16, 2025. This bakery closure is part of our strategy to optimize capacity within our supply chain. Closure costs included equipment asset impairment charges and equipment relocation costs of \$6.1 million and severance costs of \$1.3 million and were recognized in the first quarter of Fiscal 2025. In the second quarter of Fiscal 2025, the company classified the bakery as held for sale. These costs and the costs below are included as a separate line item of the Consolidated Statements of Income.

On July 18, 2024, the company announced the closure of its Baton Rouge, Louisiana bakery. The bakery produced bun products and ceased production on September 19, 2024. This bakery closure is part of our strategy to optimize capacity within our supply chain. The facility continues to be used as a distribution center. The company recognized severance costs of \$1.1 million and asset impairment and equipment relocation charges of \$2.4 million in Fiscal 2024. Additionally, in Fiscal 2024, the company recorded charges totaling \$2.7 million to fully impair certain ERP-related software and other equipment, and recognized a recovery of \$1.3 million related to the sale of equipment that had been previously written off in Fiscal 2022 as part of the Phoenix, Arizona bakery closure. In Fiscal 2024, the company also recorded asset impairment charges of \$1.4 million to write off certain cake distribution territories classified as held for sale that the company no longer intends to sell and \$4.0 million related to its investment in an unconsolidated affiliate, Base Culture.

Impairment of intangible assets. In the fourth quarter of Fiscal 2025, concurrent with the company's annual planning process, the company performed an assessment of its finite-lived brands and determined two of its regional brands were impaired based on their current and expected future performance. As a result of this assessment, the company recorded an impairment charge of \$136.0 million. The company intends to continue to use these two trademarks for the foreseeable future but on a more limited basis, including eliminating certain stock-keeping-units, as it intends to focus on growing its national brands. These costs are included as a separate line item of the Consolidated Statements of Income.

Acquisition and integration-related costs. On February 21, 2025, the company completed the acquisition of Simple Mills, maker of a premium brand of better-for-you crackers, cookies, snack bars, and baking mixes, for total consideration of approximately \$848.6 million. The goodwill, taxes, and certain other assets and liabilities are still under review. The company funded the cash consideration and related acquisition fees and expenses with the net proceeds of the Notes (as defined below) offerings completed on February 14, 2025. We incurred acquisition and integration-related costs as detailed in the table above and these costs are recorded in the selling, distribution, and administrative expenses line item of the Consolidated Statements of Income.

Loss on inferior ingredients. In Fiscal 2025, the company recognized \$2.7 million of identifiable and measurable costs associated with product losses. These product losses resulted from inferior coconut sugar and cashew flour used in certain of Simple Mills' products due to tiny fragments of metal present in the ingredients and from the presence of gluten in certain of Canyon Bakehouse's gluten-free products. We are not currently able to estimate any future anticipated losses and we continue to seek recovery of all losses through appropriate means. These costs are included as a separate line item of the Consolidated Statements of Income.

Legal settlements and related costs. In the first and second quarters of Fiscal 2025, we reached agreements to settle certain distributor-related litigation for total settlement payments, inclusive of plaintiffs' attorney fees, of \$2.1 million. In the third quarter of Fiscal 2023, we reached an agreement to settle certain distributor-related litigation for a settlement payment, inclusive of plaintiffs' attorney fees, of \$55.0 million which was paid in the second quarter of Fiscal 2024. The settlement also required a phased repurchase of approximately 350 distribution territories in California and the company previously estimated this cost, along with the cost to repurchase approximately 50 other California distribution territories that are not part of the settlement, to be approximately \$80.2 million. The repurchases of the distribution rights commenced at the end of the first quarter of Fiscal 2024 and were completed early in the second quarter of Fiscal 2025 for a total cost of \$79.0 million. The company recognized an adjustment to the repurchase liability of \$1.2 million in the first quarter of Fiscal 2025.

In the third and fourth quarters of Fiscal 2024, we reached agreements to settle certain distributor-related litigation in the aggregate amount of \$2.2 million, inclusive of plaintiffs' attorney fees. Additionally, in the fourth quarter of Fiscal 2024, we reached an agreement to settle certain non-distributor-related litigation in the amount of \$1.6 million.

All amounts related to legal settlements and related costs are recorded in the selling, distribution, and administrative expenses line item of the Consolidated Statements of Income and there were no amounts accrued as of January 3, 2026.

Pension plan settlement loss. Retired and terminated vested pension plan participants not yet receiving their benefit payments have the option to receive their benefit as a single lump sum payment. In the fourth quarter of Fiscal 2024, a settlement charge of \$0.2 million was triggered as a result of lump sum distributions paid in Fiscal 2024 and this amount is included in the other components of net periodic pension and postretirement benefit plans credit line item of the Consolidated Statements of Income.

EXECUTIVE OVERVIEW

We are the second-largest producer and marketer of packaged bakery foods in the U.S. with Fiscal 2025 sales of \$5.3 billion. We operate in the highly competitive fresh bakery market and the acquisition of Simple Mills, completed on February 21, 2025, expands our presence in the better-for-you snacking category. Our product offerings include a wide range of fresh breads, buns, rolls, snack items (bars, cakes, cookies, and crackers), bagels, English muffins, tortillas and baking mixes, as well as frozen breads and rolls, which we produce at 44 plants in 19 states. Our products are sold under leading brands such as *Nature's Own*, *DKB*, *Canyon Bakehouse*, *Simple Mills*, *Wonder*, and *Tastykake*. See Item 1., *Business*, of this Form 10-K for additional information regarding our customers and brands, business strategies, strengths and core competencies, and competition and risks.

Impact of the Inflationary Economic Environment and Other Macroeconomic Factors on Our Business

We continue to monitor the impact of a variety of factors on our business, including the impact of the inflationary economic environment on our costs and the buying patterns of our consumers, supply chain disruptions, including the impacts of tariffs (including retaliatory tariffs), increased labor costs, the conflict between Russia and Ukraine, and the current instability in the Middle East, as further discussed in Item 1., *Business*, of this Form 10-K.

Summary of Operating Results, Cash Flows and Financial Condition:

Sales increased 3.0% in Fiscal 2025 compared to Fiscal 2024 due to the acquisition contribution (excluding the 53rd week) of 4.1% and the benefit of the additional week of 1.7%, partially offset by volume declines of 2.0% and negative price/mix of 0.8%. Branded Retail sales increased 6.2% due to the acquisition contribution (excluding the 53rd week) of 6.4%. Sales in the Other sales category decreased 2.7%. Both sales categories experienced negative price/mix and softer volumes due to a challenging consumer environment which was partially offset by the benefit of the additional week. Weakness in both the fresh packaged bread and cake categories negatively impacted our sales.

Income from operations for Fiscal 2025 was \$174.0 million compared to \$348.3 million in Fiscal 2024. The decrease resulted primarily from the impairment of intangible assets of \$136.0 million, greater outside purchases of product due to the Simple Mills acquisition, increased workforce-related costs, higher rent expenses, and greater restructuring-related implementation costs and acquisition and integration-related costs. These higher costs were partially offset by lower distributor distribution fees and ingredient costs.

Net income was \$83.8 million for Fiscal 2025 compared to \$248.1 million in the prior year. The decrease year over year resulted primarily from lower income from operations, as described above, increased interest expense from funding the acquisition, and a higher effective tax rate.

In Fiscal 2025, we generated net cash flows from operations of \$446.2 million, paid \$791.9 million of the total consideration of approximately \$848.6 million for the Simple Mills acquisition, and invested \$127.1 million in capital expenditures (inclusive of \$3.4 million for the ongoing ERP upgrade). Additionally, we increased our indebtedness by \$739.9 million and paid \$209.3 million in dividends to our shareholders. Our cash and cash equivalents balance as of January 3, 2026 was \$12.1 million. In Fiscal 2025, we entered into a \$500.0 million five-year senior unsecured revolving credit facility (the "new credit facility") which refinanced and replaced our existing credit facility (the "previous credit facility"). We also issued \$500.0 million aggregate principal amount of 5.750% Senior Notes (the "2035 Notes") and \$300.0 million aggregate principal amount of 6.200% Senior Notes (the "2055 Notes"). Furthermore, we amended the accounts receivable repurchase facility (the "repurchase facility") to, among other things, extend the scheduled facility expiration date to April 14, 2027.

In Fiscal 2024, we generated net cash flows from operations of \$412.7 million and invested \$132.1 million in capital expenditures (inclusive of \$6.0 million for the ongoing ERP upgrade). Additionally, we made \$22.7 million in stock repurchases and paid \$203.0 million in dividends to our shareholders in Fiscal 2024.

Refer to the Capital Structure section below for additional information on the company's financial condition.

CRITICAL ACCOUNTING ESTIMATES

The company's discussion and analysis of its results of operations and financial condition are based upon the Consolidated Financial Statements of the company, which have been prepared in accordance with generally accepted accounting principles in the U.S. The preparation of these financial statements requires the company to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of the revenues, expenses, and cash flows during the reporting period. On an ongoing basis, the company evaluates its estimates, including those related to customer programs and incentives, bad debts, raw materials, inventories, long-lived assets, leased assets, intangible assets, income taxes, restructuring, pensions and other post-retirement benefits, and contingencies and litigation. The company bases its estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The selection and disclosure of the company's critical accounting estimates have been discussed with the company's audit committee. Note 2, *Summary of Significant Accounting Policies*, of Notes to Consolidated Financial Statements of this Form 10-K includes a summary of the significant accounting policies and methods used in the preparation of the Consolidated Financial Statements. The following table lists, in no particular order of importance, areas of critical assumptions and estimates used in the preparation of the Consolidated Financial Statements. Additional detail can be found in the following notes:

Critical Accounting Estimate	Note
Revenue recognition	—
Derivative financial instruments	11
Business combinations	6
Long-lived assets	10
Goodwill	10
Leases	14
Self-insurance reserves	23
Income tax expense and accruals	22
Postretirement plans	21
Stock-based compensation	19
Commitments and contingencies	23

Revenue Recognition. Revenue is recognized when obligations under the terms of a contract with our customers are satisfied. Revenue is measured as the amount of consideration we expect to receive in exchange for transferring goods. Revenues are recognized net of variable consideration provisions such as for returns, volume discounts and sales promotion expenses that result in uncertainty about the company's ability to collect the amount. The company estimates the amount of variable consideration to be included in the transaction price at contract inception based on one of two approaches: the expected value approach (the "EV" approach) or the most-likely amount (the "MLA") approach. The EV approach identifies possible outcomes of the contract and the probabilities of those outcomes. The MLA approach is used in cases when the company expects to be entitled to only one of the two possible outcomes. The company applies the approach consistently for similar types of contracts and updates the estimated transaction price at each reporting date. Consideration payable to a customer is recognized at the time control transfers and is a reduction to revenue. Estimates are made based on historical experience and other factors.

Derivative Financial Instruments. The company’s cost of certain raw materials is highly correlated to underlying commodities markets. Raw materials, such as our baking ingredients, experience price fluctuations. If actual market conditions become significantly different than those anticipated, raw material prices could increase significantly, adversely affecting our results of operations. We enter into forward purchase agreements and other derivative financial instruments qualifying for hedge accounting to manage the impact of volatility in raw material prices. The company measures the fair value of its derivative portfolio using fair value as the price that would be received to sell an asset or paid to transfer a liability in the principal market for that asset or liability. When quoted market prices for identical assets or liabilities are not available, the company bases fair value on internally developed models that use current market observable inputs, such as exchange-quoted futures prices and yield curves. Refer to Item 7A., *Quantitative and Qualitative Disclosures About Market Risk*, of this Form 10-K for additional information about our derivative financial instruments, including sensitivity analyses of the company’s potential exposure to commodity price risk.

Business Combinations. The company’s acquisitions of businesses are accounted for in accordance with ASC 805, “Business Combinations.” The company recognizes the identifiable assets acquired, the liabilities assumed, and any noncontrolling interests in an acquired business at their fair values as of the date of acquisition. Goodwill is measured as the excess of the consideration transferred, also measured at fair value, over the net of the acquisition date fair values of the identifiable assets acquired and liabilities assumed. The acquisition method of accounting requires us to make significant estimates and assumptions regarding the fair values of the elements of a business combination as of the date of acquisition, including the fair values of identifiable intangible assets, property, plant, and equipment, deferred tax asset valuation allowances, liabilities including those related to debt, pensions and other postretirement plans, uncertain tax positions, contingent consideration, and contingencies. This method also requires us to refine these estimates over a measurement period not to exceed one year to reflect new information obtained about facts and circumstances that existed as of the acquisition date that, if known, would have affected the measurement of the amounts recognized as of that date. If we are required to adjust provisional amounts that we have recorded for the fair values of assets and liabilities in connection with acquisitions, these adjustments could have a material impact on our financial condition and results of operations.

Significant estimates and assumptions in estimating the fair value of customer relationships, trademarks, non-compete agreements, distributor relationships, and other identifiable intangible assets include future cash flows that the company expects to generate from the acquired assets, discount rate, customer attrition rate, and long-term revenue growth projections. Projecting discounted future cash flows requires the company to make significant estimates regarding projected revenues, projected earnings before interest, taxes, depreciation, and amortization margins, discount rates, royalty rate and customer attrition rates. If the subsequent actual results and updated projections of the underlying business activity change compared with the assumptions and projections used to develop these values, the company could record impairment charges. In addition, the company has estimated the economic lives of certain acquired assets and these lives are used to calculate depreciation on property, plant, and equipment and amortization expense on definite-lived intangible assets. If the estimates of the economic lives change, depreciation or amortization expenses could be increased or decreased, or the acquired asset could become impaired.

For leases acquired in a business combination, the company measures the lease liability at the present value of the remaining lease payments, as if the acquired lease were a new lease of the company at the acquisition date. When the implicit rate in the acquired lease is not readily determinable, the company calculates the lease liabilities using discount rates based upon the company’s applicable incremental borrowing rate. An assessment of the certainty associated with the exercise of any lease renewal, termination, and purchase options included in the acquired lease contracts is also performed. The company measures the right-of-use asset at the same amount as the lease liability as adjusted to reflect favorable or unfavorable terms of the lease when compared with market terms.

Impairment of Long-Lived, Intangible, and Other Assets. Assumptions and estimates used in the evaluation of potential impairment can result in adjustments affecting the carrying values of long-lived, intangible, and other assets and the recognition of impairment expense in the company’s consolidated financial statements. The company evaluates its long-lived assets (property, plant and equipment), definite-lived intangible assets, and other assets (including right-of-use lease assets, notes receivable, and equity) for impairment whenever indicators of impairment exist, or when it commits to sell the asset. If the sum of the undiscounted expected future cash flows from a long-lived asset or definite-lived intangible asset group is less than the carrying value of that asset group, an asset impairment charge is recognized. Key assumptions and estimates used in the projection of expected future cash flows generally include price levels, sales growth, profit margins and asset life. Future adverse changes, such as decisions to discontinue or significantly reduce the use of certain brands, in market conditions or poor operating results of these underlying assets could result in losses or an inability to recover the carrying value of the asset that may not be reflected in the asset’s current carrying value, thereby possibly requiring impairment charges in the future. The amount of an impairment charge, if any, is calculated as the excess of the asset’s carrying value over its fair value, generally represented by the discounted future cash flows from that asset or, in the case of assets the company evaluates for sale, estimated sale proceeds less costs to sell. The company takes into consideration historical data and experience together with all other relevant information available when estimating the fair values of its assets. However, fair values that could be realized in actual transactions may differ from the estimates used to evaluate impairment. In addition, changes in the assumptions and estimates may result in a different conclusion regarding impairment. Impairment charges recorded in Fiscal 2025 and Fiscal 2024 are discussed above in the “Matters Affecting Comparability” section.

Impairment of Goodwill. The company assesses goodwill for impairment annually during the fourth quarter, or from time to time when warranted by the facts and circumstances surrounding individual reporting units or the company as a whole. The company completed its most recent annual goodwill impairment testing during the fourth quarter of Fiscal 2025 and analyzed certain qualitative and quantitative factors in determining whether a goodwill impairment existed. Flowers has concluded it has two operating segments and two reporting units, legacy Flowers Foods and Simple Mills. As Simple Mills shares similar economic characteristics with legacy Flowers Foods, we aggregate Simple Mills and legacy Flowers Foods as one operating segment for the purpose of determining our one reportable segment. We have elected not to perform the qualitative approach, but instead perform a quantitative analysis by comparing the fair value of each of the reporting units with which the goodwill is associated to the carrying amount of the respective reporting unit. If the fair value is less than the carrying value, the goodwill is written down to the extent the carrying amount exceeds the fair value.

When performing a quantitative analysis, the company estimates the fair value of its reporting units using a weighted average of the income and market approaches. Under the income approach, the company uses a discounted cash flow model based on projections of future years' operating results and associated cash flows. The company's assessments reflected a number of significant management assumptions and estimates including the: (a) weighted average cost of capital; (b) forecasted sales growth rates; (c) forecasted EBITDA margins; and (d) market multiples (not applicable to the income approach). Changes in these assumptions could materially impact the company's conclusions. Based on its assessments, the company concluded that there was no impairment of goodwill for either of its reporting units.

The company's assessments, whether qualitative or quantitative, incorporate management's expectations for the future, including forecasted growth rates and/or margin improvements. Therefore, should there be changes in the relevant facts and circumstances and/or expectations, management's conclusions regarding goodwill impairment may change as well.

In considering the level of uncertainty regarding the potential for goodwill impairment, management has concluded that any such impairment would, in most cases, likely be the result of adverse changes in more than one assumption. Management considers the assumptions used to be its best estimates across a range of possible outcomes based on available evidence at the time of the assessment. Other than in the Simple Mills reporting unit there is no specific singular event or single change in circumstances management has identified that it believes could reasonably result in a change to the expected future results in the legacy Flowers Foods reporting unit that would be significant enough to result in goodwill impairment. In the case of Simple Mills, the lower differential between the fair value and carrying value of the reporting unit is due to the acquisition (in February 2025), at which time the majority of assets and liabilities acquired were recorded at fair value. In management's opinion, a change of such magnitude would more likely be the result of changes to some combination of the factors identified above, a general deterioration in competitive position, significant unexpected changes in customer preferences, an inability to pass through significant raw material cost increases, and other such items as identified in "Item 1A. Risk Factors" in this Annual Report on Form 10-K.

Although no reporting units failed the annual impairment test, in management's opinion, the goodwill balance of the Simple Mills reporting unit is at risk of impairment in the near term if the reporting unit's operation does not perform in line with management's expectations, or if there is a negative change in the long-term financial outlook for the reporting unit or in other factors such as the particular discount rates used. Total goodwill associated with the Simple Mills reporting units was \$367.9 million at January 3, 2026.

Leases. The company's leases consist of the following types of assets: bakeries, corporate office space, warehouses, bakery equipment, office equipment, transportation, and IT equipment. The company uses the applicable incremental borrowing rate at lease commencement to perform the lease classification tests on lease components and to measure the lease liabilities and right-of-use assets in situations when discount rates implicit in leases cannot be readily determined.

Self-Insurance Reserves. We are self-insured for various levels of general liability, auto liability, workers' compensation, and employee medical and dental coverage. Insurance reserves are calculated on a combination of an undiscounted basis based on actual claims data and estimates of incurred but not reported claims developed utilizing historical claims trends. Projected settlements of incurred but not reported claims are estimated based on pending claims, historical trends, industry trends related to expected losses and actual reported losses, and key assumptions, including loss development factors and expected loss rates. Though the company does not expect them to do so, actual settlements and claims could differ materially from those estimated. Material differences in actual settlements and claims could have an adverse effect on our financial condition and results of operations.

Income Tax Expense and Accruals. The annual tax rate is based on our income, statutory tax rates, and tax planning opportunities available to us in the various jurisdictions in which we operate. Changes in statutory rates and tax laws in jurisdictions in which we operate may have a material effect on the annual tax rate. The effect of these changes, if any, would be recognized as a discrete item upon enactment.

Deferred income taxes arise from temporary differences between the tax and financial statement recognition of revenues and expenses. Deferred tax assets and liabilities are measured based on the enacted tax rates that will apply in the years in which the temporary differences are expected to be recovered or paid.

Our income tax expense, deferred tax assets and liabilities, and reserve for uncertain tax benefits reflect our best assessment of future taxes to be paid in the jurisdictions in which we operate. The company records a valuation allowance to reduce its deferred tax assets if we believe it is more likely than not that some or all of the deferred assets will not be realized. While the company considers future taxable income and ongoing prudent and feasible tax strategies in assessing the need for a valuation allowance, when and if these estimates and assumptions change, the company has and may be required in the future to adjust its valuation allowance, which could result in a charge to, or an increase in, income in the period such determination is made.

Periodically, we face audits from federal and state tax authorities, which can result in challenges regarding the timing and amount of income or deductions. We provide reserves for potential exposures when we consider it more likely than not that a taxing authority may take a sustainable position on a matter contrary to our position. We evaluate these reserves on a quarterly basis to ensure that they have been appropriately adjusted for events, including audit settlements that may impact the ultimate payment of such potential exposures. While the ultimate outcome of audits cannot be predicted with certainty, we do not currently believe that current or future audits will have a material adverse effect on our consolidated financial condition or results of operations. The company is no longer subject to federal examination for years prior to Fiscal 2022, and with limited exceptions, for years prior to 2021 in state jurisdictions.

Postretirement Plans. The company sponsors a defined benefit pension plan for union employees, the Flowers Foods, Inc. Retirement Plan No. 2 ("Plan No. 2"), and a frozen nonqualified plan covering former Tasty executives. The company records pension costs and benefit obligations related to its defined benefit plans based on actuarial valuations. These valuations reflect key assumptions determined by management, including the discount rate, expected long-term rate of return on plan assets and mortality.

We use a spot rate approach (granular method) to estimate the service cost and interest cost components of benefit cost by applying the specific spot rates along the yield curve to the relevant projected cash flows, as we believe this provides the best estimate of service and interest costs.

The pension plan's investment committee, which consists of certain members of management, establishes investment guidelines and regularly monitors the performance of the plan's assets. The investment committee is responsible for executing these strategies and investing the pension assets in accordance with ERISA and fiduciary standards. The investment objective of the pension plan is to preserve the plan's capital and maximize investment earnings within acceptable levels of risk and volatility. The investment committee meets on a regular basis with its investment advisors to review the performance of the plan's assets. Based upon performance and other measures and recommendations from its investment advisors, the investment committee rebalances the plan's assets to the targeted allocation when considered appropriate. For the details of our pension plan assets, see Note 21, *Postretirement Plans*, of Notes to Consolidated Financial Statements of this Form 10-K.

In developing the expected long-term rate of return on plan assets at each measurement date, the company considers the plan assets' historical actual returns, targeted asset allocations, and the anticipated future economic environment and long-term performance of the individual asset classes, based on the company's investment strategy. While appropriate consideration is given to recent and historical investment performance, the assumption represents management's best estimate of the long-term prospective return. Further, pension costs do not include an explicit expense assumption, and therefore the return on assets rate reflects the long-term expected return, net of expenses. Based on these factors, the long-term rate of return assumption for Plan No. 2 is set at 5.3% for Fiscal 2026.

The company utilizes the Society of Actuaries' ("SOA") published mortality tables and improvement scales in developing their best estimates of mortality. In October 2019, the SOA published its final report on their "standard" mortality table ("Pri-2012"). For purposes of measuring pension benefit obligations of Plan No. 2, the company used the Pri-2012 base table with blue collar adjustment, and 117.1% multiplier, and a projection scale of MP-2021. No other collar adjustments are applied for any other plans. In addition, contingent annuitant mortality rates are applied for surviving spouses after the death of the original retiree.

The company determines the fair value of substantially all of its plans' assets utilizing market quotes rather than developing "smoothed" values, "market related" values, or other modeling techniques. Plan asset gains or losses in a given year are included with other actuarial gains and losses due to remeasurement of the plans' projected benefit obligations ("PBO"). If the total unrecognized gain or loss exceeds 10% of the larger of (i) the PBO or (ii) the market value of plan assets, the excess of the total unrecognized gain or loss is amortized over the expected average remaining service period of active covered employees (or average future lifetime of participants if the plan is inactive or frozen). Prior service cost or credit, which represents the effect on plan liabilities due to plan amendments, is amortized over the average remaining service period of active covered employees (or average future lifetime if the plan is inactive or frozen).

In Fiscal 2026, the company does not expect to make any cash contributions to Plan No. 2 and expects to pay \$0.2 million in pension benefits from corporate assets to its nonqualified plan.

Stock-based compensation. Stock-based compensation expense for all share-based payment awards granted is determined based on the grant date fair value. The company recognizes these compensation costs net of an estimated forfeiture rate, and recognizes compensation cost only for those shares expected to vest on a straight-line basis over the requisite service period of the award, which is generally the vesting term of the share-based payment award.

We grant performance stock awards that separately have a market and performance condition. The expense computed for the total shareholder return shares (“TSR”) is fixed and recognized on a straight-line basis over the vesting period. The expense computed for the return on invested capital (“ROIC”) shares can change depending on the expected attainment of performance condition goals. The expense for the ROIC shares can be within a range of 0% to 125% of the target for awards granted in Fiscal 2023 and earlier and 0% to 150% for awards granted subsequent to Fiscal 2023. There is a possibility that this expense component will change in subsequent quarters depending on how the company performs relative to the ROIC target. Additionally, there are time-based stock awards that generally vest over a period of three years using the straight-line attribution method. See Note 19, *Stock-Based Compensation*, of Notes to Consolidated Financial Statements of this Form 10-K for additional information. In early Fiscal 2026, the company granted stock awards to certain employees. The company expects stock-based compensation expense for Fiscal 2026 will be approximately \$4.0 million to \$6.0 million higher than Fiscal 2025. This estimate is inclusive of an additional \$2.5 million to \$3.0 million of expense anticipated to be recognized in the first quarter of Fiscal 2026 due to the payout for the Fiscal 2024 grant currently trending at 150% of target since the grant date. Additionally, the company anticipates a shortfall of approximately \$5.0 million to \$7.0 million on the vesting of stock-based compensation awards that will vest in Fiscal 2026.

Commitments and contingencies. The company and its subsidiaries from time to time are parties to, or targets of, lawsuits, claims, investigations and proceedings, including personal injury, commercial, contract, environmental, antitrust, product liability, health and safety and employment matters, including lawsuits related to the independent distributors, which are being handled and defended in the ordinary course of business. Loss contingencies are recorded at the time it is probable an asset is impaired or a liability has been incurred and the amount can be reasonably estimated. For litigation claims, the company considers the degree of probability of an unfavorable outcome and the ability to make a reasonable estimate of the loss. Losses are recorded in the selling, distribution, and administrative expenses line item of the Consolidated Statements of Income.

RESULTS OF OPERATIONS

Consolidated Results - Fiscal 2025 compared to Fiscal 2024

The company’s results of operations, expressed as a percentage of sales, are set forth below for Fiscal 2025 and Fiscal 2024:

			Percentage of Sales		Increase (Decrease)	
	Fiscal 2025	Fiscal 2024	Fiscal 2025	Fiscal 2024	Dollars	%
	53 weeks	52 weeks	53 weeks	52 weeks		
	(Amounts in thousands, except percentages)					
Net sales	\$ 5,256,479	\$ 5,103,487	100.0	100.0	\$ 152,992	3.0
Materials, supplies, labor and other production costs (exclusive of depreciation and amortization shown separately below)	2,687,585	2,577,220	51.1	50.5	110,365	4.3
Selling, distribution, and administrative expenses	2,075,368	2,001,052	39.5	39.2	74,316	3.7
Restructuring charges	6,083	7,403	0.1	0.1	(1,320)	(17.8)
Plant closure costs and impairment of assets	7,397	10,310	0.1	0.2	(2,913)	(28.3)
Impairment of intangible assets	135,981	—	2.6	—	135,981	100.0
Loss on inferior ingredients	2,657	—	0.1	—	2,657	100.0
Depreciation and amortization	167,427	159,210	3.2	3.1	8,217	5.2
Income from operations	173,981	348,292	3.3	6.8	(174,311)	(50.0)
Other components of net periodic pension and postretirement benefit plans credit	(381)	(273)	(0.0)	(0.0)	(108)	39.6
Interest expense, net	59,294	19,623	1.1	0.4	39,671	202.2
Income before income taxes	115,068	328,942	2.2	6.4	(213,874)	(65.0)
Income tax expense	31,243	80,826	0.6	1.6	(49,583)	(61.3)
Net income	\$ 83,825	\$ 248,116	1.6	4.9	\$ (164,291)	(66.2)
Comprehensive income	\$ 75,868	\$ 254,325	1.4	5.0	\$ (178,457)	(70.2)

Percentages may not add due to rounding.

Sales

	Fiscal 2025		Fiscal 2024		% Change
	53 weeks		52 weeks		
	\$	%	\$	%	
	(Amounts in thousands)		(Amounts in thousands)		
Branded Retail	\$ 3,462,854	65.9	\$ 3,259,267	63.9	6.2
Other	1,793,625	34.1	1,844,220	36.1	(2.7)
Total	\$ 5,256,479	100.0	\$ 5,103,487	100.0	3.0

(The table above presents certain sales by category that have been reclassified from amounts previously reported to conform to the current period presentation.)

The change in sales was attributable to the following:

Percentage point change in sales attributed to:	Branded Retail	Other	Total
	Favorable (Unfavorable)		
Pricing/Mix ^{^*}	(0.5)	(1.7)	(0.8)
Volume*	(1.5)	(2.6)	(2.0)
Acquisition (excluding the impact of Week 53)	6.4	—	4.1
Week 53	1.8	1.6	1.7
Total percentage point change in net sales	6.2	(2.7)	3.0

[^] Includes sales reductions from variable consideration and payments to customers.

* Computations above are calculated as follows (the Total column is consolidated and is not adding the Branded Retail and Other columns):

Price/Mix \$ = Current fiscal year units x change in price per unit

Price/Mix % = Price/Mix \$ ÷ Prior fiscal year Net Sales \$

Volume \$ = Prior fiscal year price per unit x change in units

Volume % = Volume \$ ÷ Prior fiscal year Net Sales \$

The company disaggregates its sales into two categories, Branded Retail and Other. These categories align with our brand-focused strategy to drive above-market growth via innovation and focusing on higher margin products. The Other category includes store branded retail and non-retail sales (foodservice, restaurant, institutional, vending, thrift stores, and contract manufacturing).

Sales increased year over year due to the Simple Mills acquisition contribution and the benefit of the extra week in Fiscal 2025 partially offset by softer volumes and negative price/mix in both sales categories. Weakness in the fresh packaged bread category, particularly for traditional loaf breads, and, to a lesser extent, in the away-from-home market largely resulted in the volume declines. Lower store branded sales also contributed to the volume declines. The overall negative price/mix was partially offset by improvements in our foodservice price/mix from executing our portfolio optimization strategies beginning in the second quarter of the prior year. Additionally, we implemented price increases on certain branded retail products in the fourth quarter of Fiscal 2025. Due to the challenging consumer environment, our promotional activity increased year over year, targeting differentiated products.

We anticipate our Fiscal 2026 sales will be lower than Fiscal 2025 due to the additional week in Fiscal 2025 and continued weakness in the fresh packaged bread category. The sales benefit from the Simple Mills acquisition contribution (acquired on February 21, 2025), growth in more differentiated products, including Simple Mills' products, and the benefit of price increases implemented in the fourth quarter of Fiscal 2025 are anticipated to partially offset the sales decrease.

Branded Retail Sales

Branded Retail sales increased 6.2% compared to the prior year due to the Simple Mills acquisition contribution and the benefit of the additional week, partially offset by volume declines and unfavorable price/mix. Volumes were negatively impacted by weakness in the fresh packaged bread category with the largest declines in sales of traditional loaf products. Volume growth in organic, Keto, and cake items partially offset the decrease. The company introduced *Wonder* cake in the first quarter of Fiscal 2025. Other recent product introductions include *Nature's Own* protein loaf, small loaves, and Keto buns and multi-grain loaf as well as, *DKB* sandwich rolls and snack bites, and *Wonder* bagels and English muffins. Price/mix was unfavorable primarily due to increased targeted promotional activity and, to a lesser extent, a shift in mix to greater branded retail cake sales and the addition of smaller loaf sizes.

The Simple Mills acquisition has increased our investment in the better-for-you category and their branded snack items, combined with the *DKB* organic snack bars and bites, further diversifies our exposure beyond the fresh packaged breads and buns category. The *DKB* snack bites were rolled out nationally during Fiscal 2025, and at the end of Fiscal 2025, we introduced three varieties of *DKB* organic breakfast bars and expanded our line of protein bars, snack bars, and snack bites.

Other Sales

Sales in the Other category decreased 2.7% due to softer volumes for both store branded retail and non-retail sales and unfavorable price/mix, partially offset by the benefit of the additional week. Store branded retail sales decreased due to softer volumes, most notably for cake items, and to a lesser extent negative price/mix, net of the benefit of the additional week. Our non-retail sales experienced softer volumes for foodservice and institutional sales, partly offset by growth in contract manufacturing. Foodservice price/mix improved from optimization of that business subsequent to the first quarter of Fiscal 2024, but was offset by negative price mix for other non-retail sales.

Materials, Supplies, Labor, and Other Production Costs (exclusive of depreciation and amortization shown separately; as a percent of sales)

Line item component	Fiscal 2025 % of sales	Fiscal 2024 % of sales	Change as a % of sales
Ingredients and packaging	28.0	29.4	(1.4)
Workforce-related costs	14.5	14.6	(0.1)
Other	8.6	6.5	2.1
Total	<u>51.1</u>	<u>50.5</u>	<u>0.6</u>

The increase in materials, supplies, labor and other production costs as a percent of sales year over year primarily resulted from greater outside purchases of product (sales with no associated ingredient costs) and lower sales price/mix, partially offset by lower ingredient costs. Lower production volumes also contributed to the increase and we expect this trend to continue due to weakness in the fresh packaged bread category. Outside purchases of product, which are included in the Other line item in the table above, largely relate to purchases of Simple Mills products, all of which are co-manufactured, and to a lesser extent certain *DKB* and other products. We expect a continued increase in outside purchases of product due to anticipated growth in sales of Simple Mills' products combined with the acquisition impact. Ingredient costs decreased as a percent of sales due to higher outside purchases of product and lower pricing for commodities, mainly flour and organic ingredients. The benefit was partially offset by higher costs for other ingredients such as cocoa and eggs, the impact of tariffs, and lower sales price/mix. Tariffs are expected to impact our costs more in Fiscal 2026 due to the timing of implementation in Fiscal 2025. We continue to monitor all trade agreements and impacts that might affect the costs of our raw materials.

Prices of ingredient and packaging materials fluctuate due to various factors including, but not limited to, government policy and regulation (including tariffs), weather conditions, domestic and international demand, availability due to supply conditions, including livestock disease, or other unforeseen circumstances, and we monitor these markets closely. Ingredient and packaging costs experienced less volatility in Fiscal 2025 as compared to Fiscal 2024 but are anticipated to remain volatile in Fiscal 2026. We use eggs in several of our products and have been, and could continue to be, adversely impacted by increased costs and/or reduced availability of supply as a result of the avian influenza. We enter into forward purchase agreements and other financial instruments to manage the impact of volatility in certain raw material prices. Any decrease in the availability of these agreements and instruments could increase the cost of these raw materials and significantly affect our earnings.

Selling, Distribution, and Administrative Expenses (as a percent of sales)

Line item component	Fiscal 2025 % of sales	Fiscal 2024 % of sales	Change as a % of sales
Workforce-related costs	13.1	12.1	1.0
Distributor distribution fees	11.8	13.3	(1.5)
Other	14.6	13.8	0.8
Total	<u>39.5</u>	<u>39.2</u>	<u>0.3</u>

Workforce-related costs increased as a percent of sales year over year primarily due to a shift away from distributor distribution fees and wage inflation on lower sales price/mix. The benefits of cost savings programs and reduced incentive compensation costs partially offset the increase. Distributor distribution fees decreased as a percent of sales primarily from a smaller portion of our sales

being made through IDPs mostly resulting from the company converting to an employee-based model in California and due to distributing Simple Mills' products via a warehouse-delivery system. The California conversion was completed early in the second quarter of Fiscal 2025. The increase in the Other line item in the table above mostly relates to higher acquisition and integration-related expenses, greater restructuring-related implementation costs, and increased vehicle rent expenses associated with the California conversion. See the “Matters Affecting Comparability” section above for a discussion of the acquisition and integration-related expenses and restructuring-related implementation costs.

Restructuring Charges, Plant Closure Costs and Impairment of Assets, Impairment of Intangible Assets, and Loss on Inferior Ingredients

Refer to the discussion in the “Matters Affecting Comparability” section above regarding these items.

Depreciation and Amortization Expense

Depreciation and amortization expense increased in dollars and as a percent of sales year over year primarily due to amortization expense associated with the finite-lived intangible assets acquired in the Simple Mills acquisition.

Income from Operations

Income from operations decreased as a percent of sales compared to the prior year primarily due to the impairment of intangible assets and, to a lesser extent, unfavorable sales price/mix, greater outside purchases of product, higher selling, distribution, and administrative costs, as described above, and lower production volumes. Lower ingredient costs partially offset the decrease.

Net Interest Expense

Net interest expense increased in dollars and as a percent of sales as compared to the prior year due to the issuance of the Notes (as defined below) on February 14, 2025 to fund the Simple Mills acquisition and related fees and expenses. The company anticipates interest expense will increase in Fiscal 2026 as compared to Fiscal 2025 due to the Notes issued in the first quarter of Fiscal 2025.

Income Tax Expense

The effective tax rate for Fiscal 2025 was 27.2% compared to 24.6% in the prior year. The increase in the rate was primarily due to a shortfall tax expense on stock-based compensation. For the periods presented, the primary differences in the effective rate relate to state income taxes, shortfalls in the current year period on the vesting of stock-based compensation awards, impacts in the current year period for non-deductible acquisition costs, and benefits recognized from tax credits.

During Fiscal 2025, new tax legislation was enacted under the One Big Beautiful Bill Act (the “Act”). The Act did not have a material impact on the effective tax rate for Fiscal 2025 and there is no anticipated material impact on the effective tax rate in future periods.

Comprehensive Income

The decrease in comprehensive income year over year resulted primarily from decreased net income, and to a much lesser extent, changes in the fair value of derivatives.

LIQUIDITY, CAPITAL RESOURCES, AND FINANCIAL POSITION

Strategy

We believe our ability to consistently generate cash flows from operating activities to meet our liquidity needs is one of our key financial strengths. Furthermore, we strive to maintain a conservative financial position as we believe it allows us flexibility to make investments and acquisitions and is a strategic competitive advantage. Currently, our liquidity needs arise primarily from working capital requirements, capital expenditures, and obligated debt repayments. We believe we currently have access to available funds and financing sources to meet our short and long-term capital requirements. The company’s strategy for use of its excess cash flows includes:

- implementing our strategic priorities, including our transformation strategy initiatives;
- paying dividends to our shareholders;

- maintaining a conservative financial position;
- making strategic acquisitions; and
- repurchasing shares of our common stock.

Although there has been no material adverse impact on the company's results of operations, liquidity or cash flows in Fiscal 2025, volatility in global and U.S. economic environments, including as a result of, among other things, the inflationary economic environment, supply chain disruptions, tariffs (including retaliatory tariffs), increased labor shortages, the conflict between Russia and Ukraine, and the current instability in the Middle East, could significantly impact our ability to generate future cash flows. We continue to evaluate these various potential business risks, which include the possibility of future economic downturns that could shift consumer demand away from our Branded Retail products to store branded products, supply chain disruptions that have impacted, and could continue to impact, the procurement and cost of raw materials and packaging items (including the impacts of tariffs and retaliatory tariffs), the workforce available to us, among other risks.

The macroeconomic-related factors discussed above remain fluid and the future impact on our business, results of operations, liquidity or capital resources cannot be reasonably estimated with any degree of certainty. In the event of a significant reduction in revenues, we would have additional alternatives to maintain liquidity, including the availability on our debt facilities, capital expenditure reductions, adjustments to our capital allocation policy, and cost reductions. Although we do not currently anticipate a need, we also believe that we could access the capital markets to raise additional funds. We believe that we have sufficient liquidity on hand to continue business operations during the volatile global and U.S. economic environments. As of January 3, 2026, we had total available liquidity of \$633.7 million, consisting of cash on hand and the available balances under the new credit facility and the repurchase facility. Although the Act does not impact the company's effective federal tax rate, we anticipate reduced federal tax payments to continue into Fiscal 2026 due to the impact of the Act. As of January 3, 2026, the company has a \$25.7 million federal income tax receivable.

We expect the transformation strategy initiatives will require significant capital investment and expense over the next two years. We currently anticipate the upgrade of our ERP system will cost approximately \$325 million (of which approximately 35% has been or is anticipated to be capitalized) and anticipate the upgrade to be completed in Fiscal 2027. Previously, these costs were estimated to be \$350 million. The decrease in the estimated cost is a result of anticipated greater reliance on internal resources for the bakery deployments. As of January 3, 2026, we have incurred costs related to the project of approximately \$265 million. In Fiscal 2026, we expect costs for the upgrade of our ERP system (a portion of which may be expensed as incurred, capitalized, recognized as a cloud computing arrangement, or recognized as a prepaid service contract) to be approximately \$30 million to \$37 million. The estimate is higher than costs incurred in Fiscal 2025 due to a significant increase in the number of planned deployments. See Item 1A., *Risk Factors*, "We may experience difficulties in deploying the upgrade of our ERP system."

The company leases certain property and equipment under various financing and operating lease arrangements. Most of the operating leases provide the company with the option, after the initial lease term, to purchase the property at the then fair value, renew the lease at the then fair value, or return the property. The financing leases provide the company with the option to purchase the property at a fixed price at the end of the lease term. The company believes the use of leases as a financing alternative places the company in a more favorable position to fulfill its long-term strategy for the use of its cash flow. See Note 14, *Leases*, of Notes to Consolidated Financial Statements of this Form 10-K for detailed financial information regarding the company's lease arrangements.

Key items impacting our liquidity, capital resources and financial position in Fiscal 2025 and Fiscal 2024:

Fiscal 2025:

- Generated \$446.2 million of net cash from operating activities.
- Completed the Simple Mills acquisition on February 21, 2025 and paid \$791.9 million, which is net of cash acquired, of the total consideration of approximately \$848.6 million in Fiscal 2025.
- Paid dividends to our shareholders of \$209.3 million.
- Invested in our business through capital expenditures of \$127.1 million (inclusive of \$3.4 million of capital expenditures, including amounts recognized in accounts payable at year end, for the ERP upgrade).
- Repurchased \$5.5 million of our common stock.
- Incurred business process improvement costs of \$3.4 million related to the ongoing transformation strategy initiatives (exclusive of capitalized or deferred costs).

Fiscal 2024:

- Generated \$412.7 million of net cash from operating activities.
- Paid dividends to our shareholders of \$203.0 million.
- Invested in our business through capital expenditures of \$132.1 million (inclusive of \$6.0 million of capital expenditures, including amounts recognized in accounts payable at year end, for the ERP upgrade).
- Repurchased \$22.7 million of our common stock.
- Incurred business process improvement costs of \$4.5 million related to the ongoing transformation strategy initiatives (exclusive of capitalized or deferred costs).

Liquidity Discussion

Flowers Foods' cash and cash equivalents were \$12.1 million at January 3, 2026 and \$5.0 million at December 28, 2024. The cash and cash equivalents were derived from the activities presented in the table below (amounts in thousands):

<u>Cash flow component</u>	<u>Fiscal 2025</u>	<u>Fiscal 2024</u>
Cash flows provided by operating activities	\$ 446,203	\$ 412,664
Cash disbursed for investing activities	(943,155)	(172,669)
Cash provided by (disbursed for) financing activities	504,047	(257,517)
Total change in cash	<u>\$ 7,095</u>	<u>\$ (17,522)</u>

Cash Flows Provided by Operating Activities. Net cash provided by operating activities included the following items for non-cash adjustments to net income (amounts in thousands):

	<u>Fiscal 2025</u>	<u>Fiscal 2024</u>
Depreciation and amortization	\$ 167,427	\$ 159,210
Impairment of assets	141,476	10,310
Stock-based compensation	32,310	29,743
Allowances for accounts receivable	7,429	8,304
Deferred income taxes	14,159	30,954
Loss reclassified from accumulated comprehensive income to net income	816	1,457
Other non-cash items	7,204	6,014
Net non-cash adjustment to net income	<u>\$ 370,821</u>	<u>\$ 245,992</u>

- Refer to the *Plant closure costs and impairment of assets* and *Impairment of intangible assets* discussions in the “Matters Affecting Comparability” section above regarding the impairment of assets.
- For Fiscal 2025, the deferred income tax activity reflects the impact of the federal tax legislation enacted in July 2025 under the Act allowing initial year 100% bonus depreciation and the partial deduction of research and development expenses previously capitalized under Internal Revenue Code Section 174. Other deferred income tax activity during Fiscal 2025 includes the impact of Federal net operating loss utilization and the impact of trademark impairments. Additionally, for both fiscal years, the deferred income tax activity was composed of changes in temporary differences year over year, including the impact of the vesting of stock equity awards, the impact of payments for a previously accrued legal settlement for the repurchase of distribution rights, and activity related to the capitalization of research and development expenses as defined under Internal Revenue Code Section 174.
- Other non-cash items include non-cash interest expense for the amortization of debt discounts and deferred financing costs, activity in the allowances for inventory obsolescence, and gains or losses on the sale of assets.

Net cash for working capital requirements included the following items (amounts in thousands):

	<u>Fiscal 2025</u>	<u>Fiscal 2024</u>
Changes in accounts receivable	\$ (4,954)	\$ (4,515)
Changes in inventories	(15,422)	8,227
Changes in hedging activities, net	3,209	(639)
Changes in other assets and accrued liabilities	(31,479)	(24,873)
Changes in accounts payable	40,203	(59,644)
Net changes in working capital	<u>\$ (8,443)</u>	<u>\$ (81,444)</u>

- Changes in accounts receivable were mainly attributable to changes in sales period over period. Changes in inventories resulted primarily from volatility in input costs. Changes in accounts payable for the current year were mainly attributable to optimizing vendor payment terms and volatility in input prices, and changes for the prior year were mainly due to volatility in input prices.
- Hedging activities change due to market movements that affect the fair value and the associated required collateral of positions and the timing and recognition of deferred gains or losses. We expect these changes will continue to occur as part of our hedging program, though the degree and financial impact cannot be currently estimated.
- The change in other assets primarily resulted from changes in income tax receivable balances in each respective period. Changes in accruals for legal settlements, employee compensation, interest, and insurance primarily resulted in the change in other accrued liabilities. In Fiscal 2025, the company accrued \$2.1 million in legal settlements and made payments of \$3.8 million, of which \$1.7 million had been accrued for in the prior year. In Fiscal 2024, we accrued \$3.8 million of legal settlements and paid \$57.1 million of legal settlements, of which \$55.0 million had been accrued for in Fiscal 2023. We anticipate making payments of approximately \$31.2 million, including our share of employment taxes, in performance-based cash awards under our cash incentive plans in the first quarter of Fiscal 2026. During Fiscal 2025 and Fiscal 2024, we paid \$53.8 million and \$31.9 million, respectively, including our share of employment taxes, in performance-based cash awards under our bonus plans. An additional \$1.4 million and \$1.9 million were paid in Fiscal 2025 and Fiscal 2024, respectively, for our share of employment taxes on the vesting of employee restricted stock awards in each respective year.
- The company did not make any cash contributions to its defined benefit pension plans in Fiscal 2025 or Fiscal 2024 and at this time, we do not expect to make any voluntary cash contributions to our pension plans in Fiscal 2026. We expect to pay \$0.2 million in nonqualified pension benefits from corporate assets in Fiscal 2026. The company believes its cash flow and balance sheet will allow it to fund future pension needs without adversely affecting the business strategy of the company.

Cash Flows Disbursed for Investing Activities. The table below presents net cash disbursed for investing activities (amounts in thousands):

	<u>Fiscal 2025</u>	<u>Fiscal 2024</u>
Purchase of property, plant, and equipment	\$ (127,113)	\$ (132,088)
Repurchases of independent distributor distribution rights, net of principal payments from notes receivable	(26,924)	(43,466)
Acquisition of business	(791,928)	—
Proceeds from insurance settlement	1,389	—
Proceeds from sale of property, plant and equipment	616	2,140
Other	805	745
Net cash disbursed for investing activities	<u>\$ (943,155)</u>	<u>\$ (172,669)</u>

- The repurchases of the California distribution rights contributed to most of the change in the repurchases of distribution rights, net of principal payments from notes receivable. The company completed the California repurchases early in the second quarter of Fiscal 2025.
- As discussed in the "Executive Overview" section above, on February 21, 2025, we completed the Simple Mills acquisition for total cash consideration of approximately \$848.6 million of which \$791.9 million, which is net of cash acquired, was paid in Fiscal 2025. The determination of the final purchase price is pending post-close purchase price adjustments.

Cash Flows Provided by (Disbursed for) Financing Activities. The table below presents net cash provided by (disbursed for) financing activities (amounts in thousands):

	<u>Fiscal 2025</u>	<u>Fiscal 2024</u>
Dividends paid, including dividends on share-based payment awards	\$ (209,306)	\$ (203,033)
Payment of financing fees	(10,120)	(190)
Stock repurchases	(5,499)	(22,703)
Change in bank overdrafts	(10,824)	(3,721)
Net change in debt obligations	739,880	(27,800)
Payments on financing leases	(84)	(70)
Net cash provided by (disbursed for) financing activities	<u>\$ 504,047</u>	<u>\$ (257,517)</u>

- Our annual dividend rate increased from \$0.96 per share in Fiscal 2024 to \$0.99 per share in Fiscal 2025. While there are no requirements to increase our dividend rate, we have shown a historical trend to do so.
- In the Fiscal 2025, we paid financing fees associated with issuing the Notes (as defined below), refinancing and replacing the previous credit facility with the new credit facility, and amending the repurchase facility. In the prior year, we paid financing costs associated with amending the repurchase facility.
- Stock repurchase decisions are made based on our stock price, our belief of relative value, and our cash projections at any given time. See Note 18, *Stockholders' Equity*, of Notes to Consolidated Financial Statements of this Form 10-K for additional information. A portion of these shares were acquired to satisfy employees' tax withholding and payment obligations in connection with the vesting of restricted stock awards, which are repurchased by the company based on the fair market value on the vesting date.
- Changes in debt obligations primarily related to issuing the Notes to fund the Simple Mills acquisition in the first quarter of Fiscal 2025. See the discussion below under the "Capital Structure" section for additional details regarding changes in debt obligations.

Capital Structure

Long-term debt and right-of-use lease obligations and stockholders' equity were as follows as of January 3, 2026 and December 28, 2024. For a detailed description of our debt and right-of-use lease obligations and information regarding our distributor arrangements, deferred compensation, and guarantees and indemnification obligations, see Note 14, *Leases*, and Note 15, *Debt and Other Commitments*, of Notes to Consolidated Financial Statements of this Form 10-K:

	<u>Interest Rate at January 3, 2026</u>	<u>Final Maturity</u>	<u>Balance at</u>		<u>Fixed or Variable Rate</u>
			<u>January 3, 2026</u>	<u>December 28, 2024</u>	
			(Amounts in thousands)		
2026 notes	3.500%	2026	\$ 399,575	\$ 398,992	Fixed Rate
2031 notes	2.400%	2031	496,193	495,452	Fixed Rate
2035 notes	5.750%	2035	494,776	—	Fixed Rate
2055 notes	6.200%	2055	294,588	—	Fixed Rate
New credit facility	6.875%	2030	5,000	—	Variable Rate
Previous credit facility			—	2,200	Variable Rate
Accounts receivable repurchase facility	4.541%	2027	65,000	125,000	Variable Rate
Right-of-use lease obligations		2036	325,075	322,989	
			<u>2,080,207</u>	<u>1,344,633</u>	
Less: Current maturities of long-term debt and right-of-use lease obligations			<u>(473,353)</u>	<u>(68,524)</u>	
Long-term debt and right-of-use lease obligations			<u>\$ 1,606,854</u>	<u>\$ 1,276,109</u>	

Total stockholders' equity was as follows at January 3, 2026 and December 28, 2024:

	Balance at	
	January 3, 2026	December 28, 2024
	(Amounts in thousands)	
Total stockholders' equity	\$ 1,303,487	\$ 1,410,114

As of January 3, 2026, the 2026 notes are classified within the current maturities of long-term debt and will mature during the third quarter of Fiscal 2026 on October 1, 2026. As detailed in the table below, the company currently has sufficient availability under the repurchase facility and new credit facility to repay the 2026 notes upon maturity. Amounts available for withdrawal under the repurchase facility are determined as the lesser of the total facility limit and a formula derived amount based on qualifying trade receivables. If the company were to draw down amounts in excess of paying off the 2026 notes, we may have a different amount available for withdrawal than is presented in the table below.

The repurchase facility and the credit facility are generally used for short-term liquidity needs. The interest rate for the new credit facility shown in the table above reflects a swingline borrowing. Swingline borrowings are typically repaid or converted to a SOFR loan within five business days. At January 3, 2026, the interest rate on a SOFR loan would have been 4.825%.

The following table details the amounts available under the repurchase facility, new credit facility, and previous credit facility as of January 3, 2026 and the highest and lowest balances outstanding under these arrangements during Fiscal 2025:

Facility	Amount Available for Withdrawal at January 3, 2026	Highest Balance in Fiscal 2025	Lowest Balance in Fiscal 2025
	(Amounts in thousands)		
Accounts receivable repurchase facility (1)	\$ 135,000	\$ 155,000	\$ 50,000
New credit facility (2)	486,600	18,600	—
Previous credit facility	— *	2,200	—
	<u>\$ 621,600</u>		

* The previous credit facility was refinanced and replaced by the new credit facility on February 5, 2025.

- (1) Amount excludes a provision in the repurchase facility agreement which allows the company to request up to \$50.0 million in additional commitment.
- (2) Amount excludes a provision in the credit facility agreement which allows the company to request an additional \$200.0 million in additional revolving commitments.

Amounts outstanding under the credit facility can vary daily. Changes in the gross borrowings and repayments can be caused by cash flow activity from operations, capital expenditures, acquisitions, dividends, share repurchases, and tax payments, as well as derivative transactions which are part of the company's overall risk management strategy as discussed in Note 11, *Derivative Financial Instruments*, of Notes to Consolidated Financial Statements of this Form 10-K. During Fiscal 2025, the company borrowed \$69.1 million in revolving borrowings under the new credit facility and previous credit facility combined and repaid \$66.3 million in revolving borrowings. The amount available under the new credit facility is reduced by \$8.4 million for letters of credit.

The repurchase facility and the new credit facility are variable rate debt and provide us the greatest direct exposure to changing interest rates. In periods of rising interest rates, the cost of using these facilities increases, resulting in greater interest expense.

Restrictive financial covenants for our borrowings include such ratios as a minimum interest coverage ratio and a maximum leverage ratio. Our debt may also contain certain customary representations and warranties, affirmative and negative covenants, and events of default. The company believes that, given its current cash position, its cash flow from operating activities and its available credit capacity, it can comply with the current terms of the debt agreements and can meet its presently foreseeable financial requirements. As of January 3, 2026 and December 28, 2024, the company was in compliance with all restrictive covenants under our debt agreements.

In connection with entering into the Agreement and Plan of Merger to acquire Simple Mills, the company entered into a commitment letter, pursuant to which, among other things, Royal Bank of Canada committed to provide debt financing for the consummation of the Simple Mills acquisition, consisting of a \$795.0 million 364-day term loan facility (the "Term Loan Facility"), on the terms and subject to the conditions set forth in the commitment letter. In lieu of borrowing under the Term Loan Facility, the company issued the 2035 Notes and the 2055 Notes, on February 14, 2025, and terminated the outstanding commitments in respect of the Term Loan Facility. The company recognized costs of \$3.6 million associated with the Term Loan Facility in the first quarter of Fiscal 2025 and these costs are included in the selling, distribution, and administrative expenses line item of the Consolidated Statements of Income.

On February 5, 2025, we entered into the new credit facility, a \$500.0 million senior unsecured revolving credit facility pursuant to a Credit Agreement (the "2025 Revolving Credit Agreement"), dated as of February 5, 2025, with certain financial institutions party thereto as lenders and Wells Fargo Bank, National Association, as administrative agent. The new credit facility refinances and replaces the previous credit facility entered into pursuant to the amended and restated credit agreement, dated as of October 24, 2003, with the lenders party thereto and Deutsche Bank Trust Company Americas, as administrative agent (as amended, restated, modified or supplemented from time to time). The maturity date of the previous credit agreement was July 30, 2026. No borrowings were outstanding under the amended and restated credit agreement upon its termination.

The new credit facility has an initial maturity date of February 5, 2030. Under the new credit facility, up to \$50.0 million of availability may be drawn in the form of letters of credit and up to \$50.0 million of availability may be drawn in the form of swingline loans. The new credit facility also includes an incremental facility whereby the Company may increase the commitments to up to \$700.0 million if certain conditions are met.

Borrowings under the new credit facility bear interest, at the option of the company, based on the Secured Overnight Financing Rate ("SOFR") or the "base rate" plus, in each case, an applicable margin. The applicable margin is determined by reference to a pricing grid set forth in the 2025 Revolving Credit Agreement based on the company's leverage and debt rating, ranging from a maximum of 1.525% in the case of SOFR-based loans and 0.525% in the case of base rate loans to a minimum of 0.815% in the case of SOFR-based loans and 0.00% in the case of base rate loans, based upon the company's then applicable leverage ratio and debt rating. In addition, the new credit facility bears an additional facility fee on the full amount of the commitments, also determined by reference to the pricing grid, and ranging from a maximum of 0.225% to a minimum of 0.06%, based upon the company's then applicable leverage ratio and debt rating.

On February 14, 2025, the company issued the 2035 Notes and the 2055 Notes (together, the "Notes"), pursuant to the Indenture, dated as of April 3, 2012 (the "Base Indenture"), by and between the company, as issuer, and Computershare Trust Company, N.A. (as successor to Wells Fargo Bank, National Association), as trustee, as amended and supplemented from time to time, including without limitation, pursuant to an Officer's Certificate, dated February 14, 2025 (together with the Base Indenture, the "Indenture"), establishing the specific terms and forms of the Notes, each as a new series of securities under the Indenture, and appointing Regions Bank to serve as series trustee with respect to the Notes. The company used the net proceeds of the offering, together with cash on hand, (i) to fund the cash consideration for the Simple Mills acquisition, (ii) to pay fees and expenses related to the Simple Mills acquisition and the offering, and (iii) for general corporate purposes.

On April 14, 2025, the company amended the repurchase facility to, among other things, extend the scheduled facility expiration date to from April 14, 2026 to April 14, 2027 and add a provision that permits the company to request up to \$50.0 million in additional commitment, for a total of up to \$250.0 million, subject to the satisfaction of certain customary conditions of the facility.

The company intends to maintain its balanced capital deployment model, along with a commitment to its investment grade debt rating.

Special Purpose Entities. At January 3, 2026 and December 28, 2024, the company did not have any relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance or special purpose entities, which are established to facilitate off-balance sheet arrangements or other contractually narrow or limited purposes.

Guarantees. In the event the company ceases to utilize the independent distribution form of doing business or exits a geographic market, the company is contractually required to purchase the distribution rights from the independent distributors.

Stock Repurchase Plan. Previously, our Board had approved a plan that authorized share repurchases of up to 74.6 million shares of the company's common stock. On May 26, 2022, the company announced that the Board increased the company's share repurchase authorization by 20.0 million shares. At the close of the company's fourth quarter on January 3, 2026, 21.3 million shares remained under the existing authorization. Under the share repurchase plan, the company may repurchase its common stock in open market or privately negotiated transactions or under an accelerated repurchase program at such times and at such prices as determined to be in the company's best interest. These purchases may be commenced or suspended without prior notice depending on then-existing business or market conditions and other factors.

During Fiscal 2025, 286,980 shares of the company's common stock were repurchased under the plan at a cost of \$5.5 million and during Fiscal 2024, 992,233 shares were repurchased under the plan at a cost of \$22.7 million. From the inception of the plan through January 3, 2026, 73.3 million shares have been repurchased, at a cost of \$761.5 million. No repurchases of the company's common stock were made during the fourth quarter of Fiscal 2025.

New Accounting Pronouncements Not Yet Adopted

See Note 3, *Recent Accounting Pronouncements*, of Notes to Consolidated Financial Statements of this Form 10-K regarding this information.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

The company uses derivative financial instruments as part of an overall strategy to manage market risk. The company uses forwards, futures, swaps, and option contracts to hedge existing or future exposure to changes in interest rates and commodity prices. The company does not enter into these derivative financial instruments for trading or speculative purposes. If actual market conditions are less favorable than those anticipated, interest rates and commodity prices could increase significantly, adversely affecting our interest costs and the margins from the sale of our products.

Commodity Price Risk

The company enters into commodity forward, futures, option, and swap contracts for wheat and, to a lesser extent, other commodities in an effort to provide a predictable and consistent commodity price and thereby reduce the impact of market volatility in its raw material and packaging prices. As of January 3, 2026, the company's hedge portfolio contained commodity derivatives with a fair value (liability) of \$(0.5) million and is based on quoted market prices, all of which relates to instruments that will be utilized in Fiscal 2026.

A sensitivity analysis has been prepared to quantify the company's potential exposure to commodity price risk with respect to its derivative portfolio. Based on the company's derivative portfolio as of January 3, 2026, a hypothetical ten percent change in commodity prices would increase or decrease the fair value of the derivative portfolio by \$2.5 million. The analysis disregards changes in the exposures inherent in the underlying hedged items; however, the company expects that any increase or decrease in the fair value of the portfolio would be substantially offset by increases or decreases in raw material and packaging prices.

Item 8. Financial Statements and Supplementary Data

Refer to the Index to Consolidated Financial Statements and the Financial Statement Schedule for the required information.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures**Management's Evaluation of Disclosure Controls and Procedures:**

We have established and maintain a system of disclosure controls and procedures that are designed to ensure that material information relating to the company, which is required to be timely disclosed by us in reports that we file or submit under the Securities Exchange Act of 1934 ("Exchange Act"), is accumulated and communicated to management in a timely fashion and is recorded, processed, summarized and reported within the time periods specified by the SEC's rules and forms. An evaluation of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Exchange Act) was performed as of the end of the period covered by this annual report. This evaluation was performed under the supervision and with the participation of management, including both our CEO and our CFO.

Based upon that evaluation, both our CEO and our CFO have concluded that these disclosure controls and procedures were effective as of the end of the period covered by this annual report.

Management's Report on Internal Control Over Financial Reporting:

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rule 13a-15(f) under the Exchange Act. Under the supervision and with the participation of our management, including our CEO and our CFO, we conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in "Internal Control — Integrated Framework (2013)" issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on our evaluation our management concluded that our internal control over financial reporting was effective as of January 3, 2026.

Management has excluded Simple Mills from its assessment of internal control over financial reporting as of January 3, 2026 because it was acquired by the company in a purchase business combination during Fiscal 2025. Simple Mills is a wholly-owned subsidiary whose total assets and revenues excluded from management's assessment and our audit of internal control over financial reporting represent 22.7% and 4.7%, respectively, of the related consolidated financial statement amounts as of and for the year ended January 3, 2026. The effectiveness of our internal control over financial reporting as of January 3, 2026 has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in its report which is included herein.

Changes in Internal Control Over Financial Reporting:

There were no changes in our internal control over financial reporting that occurred during our last fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Item 9B. Other Information

None of the company's directors or officers adopted, modified, or terminated a "Rule 10b5-1 trading arrangement" or a "non-rule 10b5-1 trading arrangement," as each term is defined in Item 408 of Regulation S-K, during the company's fiscal quarter ended January 3, 2026.

Item 9C. Disclosure Regarding Foreign Jurisdictions that Prevent Inspections

None.

PART III

Item 10. *Directors, Executive Officers and Corporate Governance*

The information required by this item with respect to directors of the company set forth under the caption “Corporate Governance and Board Matters — Director-Nominees” and the information set forth under the captions “Corporate Governance and Board Matters — The Board and Its Committees,” “Corporate Governance and Board Matters — Relationships Among Certain Directors,” “Audit Committee Matters — Audit Committee Report,” and “Share Ownership — Delinquent Section 16(a) Reports” in the company’s definitive proxy statement for the 2026 Annual Meeting of Shareholders expected to be filed with the SEC in April 2026 (the “proxy”) are incorporated herein by reference. The information required by this item with respect to executive officers of the company is set forth in Part I of this Form 10-K.

We have adopted the Flowers Foods, Inc. Code of Conduct (the “Code of Conduct”), which includes the code previously referred to as the Flowers Foods, Inc. Code of Business Conduct and Ethics for Officers and Members of the Board of Directors (collectively, “Code of Conduct”), and which applies to all of our employees, directors and officers. The Code of Conduct is publicly available on our website at www.flowersfoods.com in the “CORPORATE GOVERNANCE” section of the “INVESTORS” tab. If we make any substantive amendments to our Code of Conduct or we grant any waiver, including any implicit waiver, from a provision of the Code of Conduct, we intend to disclose the nature of the amendment or waiver on our website at the same location. Alternatively, we may elect to disclose the amendment or waiver in a current report on Form 8-K filed with the SEC.

We have adopted insider trading policies and procedures governing the purchase, sale, and other dispositions of company securities by directors, officers and employees - and in certain instances, by the company itself - that we believe are reasonably designed to promote compliance with insider trading laws, rules and regulations and applicable listing standards. The foregoing summary of our insider trading policies and procedures is qualified by reference to the Flowers Foods, Inc. Insider Trading Policy filed as Exhibit 19.1 to our Annual Report on Form 10-K for the fiscal year ended December 28, 2024 and incorporated herein by reference.

Our Chairman and CEO certified to the NYSE on June 3, 2025 pursuant to Section 303A.12 of the NYSE’s listing standards, that he was not aware of any violation by Flowers Foods of the NYSE’s corporate governance listing standards as of that date.

Item 11. *Executive Compensation*

The information required by this item is incorporated herein by reference to the information set forth under the captions “Corporate Governance and Board Matters — Director Compensation” and “Executive Compensation” in the proxy.

Item 12. *Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters*

The following chart sets forth the amounts of securities authorized for issuance under the company’s compensation plans as of January 3, 2026.

Plan Category	Number of Securities to be Issued Upon Exercise of Outstanding Options, Warrants and Rights (1)	Weighted Average Exercise Price of Outstanding Options, Warrants and Rights (2)	Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans (Excluding Securities Reflected in Column(a) (3)
	(a)	(b)	(c)
Equity compensation plans approved by security holders	4,722,178	\$ —	6,181,894
Equity compensation plans not approved by security holders	—	—	—
Total	4,722,178	\$ —	6,181,894

- (1) Includes 1,792,584 outstanding time-based restricted stock units and 2,929,594 outstanding performance-based awards. The performance-based awards assume outstanding awards vest at the maximum potential number of shares issuable and may overstate potential dilution.

- (2) Time-based restricted stock units and performance-based awards are not considered in the weighted average exercise price as these awards have no exercise price.
- (3) Assumes all unvested awards are issuable at the maximum potential number of shares issuable and may overstate potential dilution.

Under the company's 2014 Omnibus Equity and Incentive Compensation Plan (the "Omnibus Plan"), the Board is authorized to grant a variety of stock-based awards, including stock options, restricted stock and deferred stock, to its directors and certain of its employees. The number of securities set forth in column (c) above reflects securities available for issuance as stock options, restricted stock and deferred stock under the company's compensation plans. The number of shares originally available under the Omnibus Plan was 8,000,000 shares. On May 25, 2023, the company amended and restated the Omnibus Plan to register an additional 9,340,000 shares of common stock. The Omnibus Plan replaced the Flowers Foods' 2001 Equity and Performance Incentive Plan, as amended and restated as of April 1, 2009 ("EPIP"), the Stock Appreciation Rights Plan, and the Annual Executive Bonus Plan. As a result, no additional shares will be issued under the EPIP. There are 50,597 deferred shares outstanding under the EPIP that will be issued at the end of the deferral period. See Note 19, *Stock-Based Compensation*, of Notes to Consolidated Financial Statements of this Form 10-K for additional information on equity compensation plans.

The remaining information required by this item is incorporated herein by reference to the information set forth under the caption "Share Ownership — Security Ownership of Certain Beneficial Owners and Management" in the proxy.

Item 13. *Certain Relationships and Related Transactions, and Director Independence*

The information required by this item is incorporated herein by reference to the information set forth under the captions "Corporate Governance and Board Matters — Transactions with Management and Others" and "Corporate Governance and Board Matters — Director Independence" in the proxy.

Item 14. *Principal Accountant Fees and Services*

The information required by this item is incorporated herein by reference to the information set forth under the caption "Audit Committee Matters — Proposal 3 Ratification of the Appointment of PricewaterhouseCoopers LLP as the Company's Independent Registered Public Accounting Firm — Fiscal 2025 and Fiscal 2024 Audit Firm Fee Summary" in the proxy.

PART IV

Item 15. Exhibits and Financial Statement Schedules

(a) *List of documents filed as part of this report.*

1. *Financial Statements of the Registrant*

Report of Independent Registered Public Accounting Firm.

Consolidated Balance Sheets at January 3, 2026 and December 28, 2024.

Consolidated Statements of Income for Fiscal 2025, Fiscal 2024, and Fiscal 2023.

Consolidated Statements of Comprehensive Income for Fiscal 2025, Fiscal 2024, and Fiscal 2023.

Consolidated Statements of Changes in Stockholders' Equity for Fiscal 2025, Fiscal 2024, and Fiscal 2023.

Consolidated Statements of Cash Flows for Fiscal 2025, Fiscal 2024, and Fiscal 2023.

Notes to Consolidated Financial Statements.

2. *Exhibits.* The following documents are filed as exhibits hereto:

EXHIBIT INDEX

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders of Flowers Foods, Inc.

Opinions on the Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated balance sheets of Flowers Foods, Inc. and its subsidiaries (the "Company") as of January 3, 2026 and December 28, 2024, and the related consolidated statements of income, of comprehensive income, of changes in stockholders' equity and of cash flows for each of the three years in the period ended January 3, 2026, including the related notes (collectively referred to as the "consolidated financial statements"). We also have audited the Company's internal control over financial reporting as of January 3, 2026, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of January 3, 2026 and December 28, 2024, and the results of its operations and its cash flows for each of the three years in the period ended January 3, 2026 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of January 3, 2026, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the COSO.

Basis for Opinions

The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control over Financial Reporting appearing under Item 9A. Our responsibility is to express opinions on the Company's consolidated financial statements and on the Company's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

As described in Management's Report on Internal Control over Financial Reporting, management has excluded Simple Mills, from its assessment of internal control over financial reporting as of January 3, 2026 because it was acquired by the Company in a purchase business combination during 2025. We have also excluded Simple Mills from our audit of internal control over financial reporting. Simple Mills is a wholly-owned subsidiary whose total assets and total net sales excluded from management's assessment and our audit of internal control over financial reporting represent 22.7% and 4.7%, respectively, of the related consolidated financial statement amounts as of and for the year ended January 3, 2026.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Critical Audit Matters

The critical audit matters communicated below are matters arising from the current period audit of the consolidated financial statements that were communicated or required to be communicated to the audit committee and that (i) relate to accounts or disclosures that are material to the consolidated financial statements and (ii) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.

Acquisition of Simple Mills – Valuation of Customer Relationships and A Certain Indefinite-Lived Trademark

As described in Notes 2 and 6 to the consolidated financial statements, on February 21, 2025, the Company completed the acquisition of 100% of the equity interests of Purposeful Foods Holdings, Inc., the parent company of Simple Mills, for total consideration of approximately \$848.6 million. Of the acquired intangible assets, \$177.8 million of customer relationships and \$355.4 million of indefinite-lived trademarks were recorded, of which a significant portion related to a certain indefinite-lived trademark. Management uses the multi-period excess earnings method to value the finite-lived intangible assets and the relief-from-royalty method to value indefinite-lived intangible assets. Fair value is estimated using the future gross, discounted cash flows associated with the asset using the following five significant assumptions: (a) discount rate; (b) forecasted sales growth rates; (c) forecasted EBITDA margins (not applicable to the relief-from-royalty method); (d) assumed royalty rate (not applicable to the multi-period excess earnings method); and (e) customer attrition rate (not applicable to the relief-from-royalty method).

The principal considerations for our determination that performing procedures relating to the valuation of customer relationships and a certain indefinite-lived trademark acquired in the acquisition of Simple Mills is a critical audit matter are (i) the significant judgment by management when developing the fair value estimate of the customer relationships and a certain indefinite-lived trademark acquired; (ii) a high degree of auditor judgment, subjectivity, and effort in performing procedures and evaluating management's significant assumptions related to the discount rate, forecasted sales growth rates, forecasted EBITDA margins and customer attrition rate for the customer relationships and the discount rate, forecasted sales growth rates and assumed royalty rate for a certain indefinite-lived trademark; and (iii) the audit effort involved the use of professionals with specialized skill and knowledge.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to the acquisition accounting, including controls over the valuation of the customer relationships and a certain indefinite-lived trademark acquired. These procedures also included, among others (i) reading the purchase agreement; (ii) testing management's process for developing the fair value estimate of the customer relationships and a certain indefinite-lived trademark acquired; (iii) evaluating the appropriateness of the multi-period excess earnings and relief-from-royalty methods used by management; (iv) testing the completeness and accuracy of the underlying data used in the multi-period excess earnings and relief-from-royalty methods; and (v) evaluating the reasonableness of the significant assumptions used by management related to the discount rate, forecasted sales growth rates, forecasted EBITDA margins and customer attrition rate for the customer relationships and the discount rate, forecasted sales growth rates and assumed royalty rate for a certain indefinite-lived trademark. Evaluating management's assumptions related to the forecasted sales growth rates and forecasted EBITDA margins involved considering (i) the current and past performance of the Simple Mills business; (ii) the consistency with external market and industry data; and (iii) whether the assumptions were consistent with evidence obtained in other areas of the audit. Professionals with specialized skill and knowledge were used to assist in evaluating (i) the appropriateness of the multi-period excess earnings and relief-from-royalty methods and (ii) the reasonableness of the discount rate, customer attrition rate and assumed royalty rate assumptions.

Annual Goodwill Impairment Assessment – Simple Mills Reporting Unit

As described in Notes 2 and 10 to the consolidated financial statements, the Company's consolidated goodwill balance was \$1,047.8 million as of January 3, 2026, and the goodwill associated with the Simple Mills reporting unit was \$367.9 million. Management assesses goodwill for impairment annually during the fourth quarter, or from time to time when warranted by the facts and circumstances surrounding individual reporting units or the Company as a whole. Management completed the Company's most recent annual goodwill impairment testing during the fourth quarter. Management performed a quantitative analysis by comparing the fair value of each of the reporting units with which the goodwill is associated to the carrying amount of the respective reporting unit. Management estimated the fair value of the Company's reporting units using a weighted average of the income and market approaches. Under the income approach, management uses a discounted cash flow model based on projections of future years' operating results and associated cash flows. Management's assessments reflected a number of significant assumptions and estimates including the: (a) weighted average cost of capital; (b) forecasted sales growth rates; (c) forecasted EBITDA margins; and (d) market multiples (not applicable to the income approach).

The principal considerations for our determination that performing procedures relating to the annual goodwill impairment assessment of the Simple Mills reporting unit is a critical audit matter are (i) the significant judgment by management when developing the fair value estimate of the Simple Mills reporting unit; (ii) a high degree of auditor judgment, subjectivity, and effort in performing procedures and evaluating management's significant assumptions related to the weighted average cost of capital, forecasted sales growth rates, forecasted EBITDA margins and market multiples; and (iii) the audit effort involved the use of professionals with specialized skill and knowledge.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to the annual goodwill impairment assessment, including controls over the valuation of the Simple Mills reporting unit. These procedures also included, among others (i) testing management's process for developing the fair value estimate of the Simple Mills reporting unit; (ii) evaluating

the appropriateness of the income and market approaches used by management; (iii) testing the completeness and accuracy of the underlying data used in the income and market approaches; and (iv) evaluating the reasonableness of the significant assumptions used by management related to the weighted average cost of capital, forecasted sales growth rates, forecasted EBITDA margins and market multiples. Evaluating management's assumptions related to forecasted sales growth rates and forecasted EBITDA margins involved considering (i) the current and past performance of the Simple Mills reporting unit; (ii) the consistency with external market and industry data; and (iii) whether the assumptions were consistent with evidence obtained in other areas of the audit. Professionals with specialized skill and knowledge were used to assist in evaluating (i) the appropriateness of the income and market approaches and (ii) the reasonableness of the weighted average cost of capital, forecasted sales growth rate, and market multiple assumptions.

Revenue Recognition

As described in Note 2 to the consolidated financial statements, revenue is recognized when obligations under the terms of a contract with customers are satisfied. Revenue is measured as the amount of consideration the Company expects to receive in exchange for transferring goods. A performance obligation is a promise in a contract to transfer a distinct product to a customer. A contract's transaction price is allocated to each distinct performance obligation and recognized as revenue when, or as, the performance obligation is satisfied, which typically occurs when products are delivered. Revenues are recognized net of variable consideration provisions such as for returns, volume discounts and sales promotion expenses that result in uncertainty about the Company's ability to collect the amount. Consideration payable to a customer is recognized at the later of either when the Company recognizes revenue for the transfer of the related good or when the Company pays or promises to pay the consideration. A reduction to revenue is recognized at the time control transfers to the customer since the payment to the customer is made before the contract is recognized and the performance obligation is satisfied. The Company's consolidated net sales were \$5,256.5 million for the year ended January 3, 2026.

The principal consideration for our determination that performing procedures relating to revenue recognition is a critical audit matter is a high degree of auditor effort in performing procedures related to the Company's revenue recognition.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to the revenue recognition process. These procedures also included, among others (i) testing revenue recognized for a sample of revenue transactions by obtaining and inspecting source documents, such as purchase orders, invoices, proof of delivery, and cash receipts; (ii) testing a sample of reductions to revenue, including variable consideration provisions and consideration payable to customers, by obtaining and inspecting source documents, which included support for the nature of the consideration, amount, and agreement with the customer; and (iii) testing a sample of outstanding customer invoice balances as of January 3, 2026 by obtaining and inspecting source documents, such as invoices, proof of delivery, and subsequent cash receipts.

FLOWERS FOODS, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 1. Basis of Presentation

General. The accompanying Consolidated Financial Statements of Flowers Foods, Inc. (the “company”, “Flowers Foods”, “Flowers”, “us”, “we”, or “our”) have been prepared by the company’s management in accordance with generally accepted accounting principles in the United States of America (“GAAP”).

Reporting Segment. The company has identified two operating segments based on how business activities are managed and evaluated, legacy Flowers Foods and Simple Mills. Simple Mills qualifies as an operating segment as it meets the criteria of being a business and has discrete financial information available that is regularly reviewed by the chief executive officer (the “CEO”), who is the chief operating decision maker (the “CODM”), to assess the performance and allocate resources. As Simple Mills shares similar economic characteristics with legacy Flowers Foods, we aggregate Simple Mills and legacy Flowers Foods as one operating segment for the purpose of determining our one reportable segment.

Note 2. Summary of Significant Accounting Policies

Basis of Consolidation. The Consolidated Financial Statements include the accounts of the company and its wholly-owned subsidiaries. Intercompany transactions and balances are eliminated in consolidation.

Use of Estimates. The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Fiscal Year End. Our fiscal year ends on the Saturday nearest December 31, resulting in a 53rd reporting week every five or six years. Fiscal 2025 was a 53-week year, and the next 53-week year will be Fiscal 2031. Our internal financial results and key performance indicators are reported on a weekly calendar basis to ensure the same numbers of Saturdays and Sundays in comparable months and to allow for a consistent four-week progression analysis. The company has elected the first quarter to report the extra four-week period. As such, our quarters are divided as follows:

Quarter	Number of Weeks
First Quarter	Sixteen
Second Quarter	Twelve
Third Quarter	Twelve
Fourth Quarter	Twelve (or Thirteen in fiscal years with an extra week)

Accordingly, interim results may not be indicative of subsequent interim period results, or comparable to prior or subsequent interim period results, due to differences in the lengths of the interim periods.

Revenue Recognition. Revenue is recognized when obligations under the terms of a contract with our customers are satisfied. Revenue is measured as the amount of consideration we expect to receive in exchange for transferring goods. A performance obligation is a promise in a contract to transfer a distinct product to a customer. A contract’s transaction price is allocated to each distinct performance obligation and recognized as revenue when, or as, the performance obligation is satisfied, which typically occurs when products are delivered. Amounts billed and due from our customers are recognized as accounts receivable in the Consolidated Balance Sheets and require payment on a short-term basis.

Variable Consideration

Revenues are recognized net of variable consideration provisions such as for returns, volume discounts and sales promotion expenses that result in uncertainty about the company’s ability to collect the amount. The company estimates the amount of variable consideration to be included in the transaction price at contract inception based on one of two approaches: the expected value (the “EV”) approach or the most-likely amount (the “MLA”) approach. The EV approach identifies possible outcomes of the contract and the probabilities of those outcomes. The MLA approach is used in cases when the company expects to be entitled to only one of the two possible outcomes. The company applies the approach consistently for similar types of contracts and updates the estimated transaction price at each reporting date. Contracts that contain different types of variable consideration may require the use of one, or both, of the approaches to estimate the variable consideration for a single contract. After estimating the variable consideration, the

company includes the estimated variable consideration in the transaction price to the extent that it is probable that a significant reversal in the amount of cumulative revenue recognized will not occur. The company assesses the likelihood of a future reversal of revenue and how significant the reversal is to total consideration.

Consideration Payable to Customers

Consideration payable to a customer is recognized at the later of either when the company recognizes revenue for the transfer of the related good or when the company pays or promises to pay the consideration. A reduction to revenue is recognized at the time control transfers to the customer since the payment to the customer is made before the contract is recognized and the performance obligation is satisfied. The company accounts for consideration payable to a customer as a reduction of the transaction price. Payments when the company does receive a distinct good is allocated to the fair value of the good or service. The amount not allocated to the fair value is recorded as a reduction to revenue. The fair value of a good or service is recorded the same as any other purchases from suppliers.

Revenue Streams

The company's production facilities deliver products to independent distributor partners ("IDPs"), who sell and deliver those products to outlets of retail accounts that are within the IDPs' defined geographic territory. The IDPs sell products using either scan-based trading ("SBT") technology, authorized charge tickets, or cash sales.

SBT technology allows the retailer to take ownership of our products when the consumer purchases the products rather than at the time they are delivered to the retailer. Control of the inventory does not transfer upon delivery to the retailer because the company controls the risks and rights until the product is scanned at the reseller's register. Each of the company's products is considered distinct because the resellers expect each item to be a performance obligation. The company's performance obligations are satisfied at the point in time when the end consumer purchases the product because each product is considered a separate performance obligation. Consequently, revenue is recognized at a point in time for each scanned item. The company has concluded that we are the principal for SBT sales.

In Fiscal 2025, 2024, and 2023, the company recorded \$2.6 billion, \$2.6 billion, and \$2.5 billion, respectively, in sales through SBT.

SBT is utilized primarily in certain national and regional retail accounts ("SBT Outlet"). Generally, revenue is not recognized by the company upon delivery of our products by the company to the IDP or upon delivery of our products by the IDP to an SBT Outlet, but when our products are purchased by the end consumer. Product inventory in the SBT Outlet is reflected as inventory on the Consolidated Balance Sheets.

The IDP performs a physical inventory of products at each SBT Outlet weekly and reports the results to the company. The inventory data submitted by the IDP for each SBT Outlet is compared with the product delivery data. Product delivered to a SBT Outlet that is not recorded as inventory in the product delivery data has been purchased by the consumer/customer of the SBT Outlet and is recorded as sales revenue by the company.

Non-SBT sales are classified as either authorized charge sales or cash sales. The company provides marketing support to the IDP for authorized charge sales but does not provide marketing support to the IDP for cash sales. Marketing support includes providing a dedicated account representative, resolving complaints, and accepting responsibility for product quality which collectively define how to manage the relationship. Revenue is recognized at a point in time for non-SBT sales.

The company retains inventory risk, establishes negotiated special pricing, and fulfills the contractual obligations for authorized charge sales. The company is the principal, the IDP is the agent, and the reseller is the customer. Revenue is recognized for authorized charge sales when the product is delivered to the customer because the company has satisfied its performance obligations.

Cash sales occur when the IDP is the end customer. The IDP maintains accounts receivable, inventory and fulfillment risk for cash sales. The IDP also controls pricing for the resale of cash sale products. The company is the principal and the IDP is the customer, and an agent relationship does not exist. The discount paid to the IDP for cash sales is recorded as a reduction to revenue. Revenue is recognized for cash sales when the company's products are delivered to the IDP because the company has satisfied its performance obligations.

Certain sales are under contracts and include a formal ordering system. Orders are placed primarily using purchase orders (“PO”) or electronic data interchange information. Each PO, together with the applicable master supply agreement, is determined to be a separate contract. Product is delivered via contract carriers engaged by either the company or the customer with shipping terms provided in the PO.

Each unit sold, for all product categories, is a separate performance obligation. Each unit is considered distinct because the customer can benefit from each unit by selling each one separately to the end consumer. Additionally, each unit is separately identifiable in the PO. Products are delivered either freight-on-board (“FOB”) shipping or destination. The company’s right to payment is at the time our products are obtained from our warehouse for FOB shipping deliveries. The right to payment for FOB destination deliveries occurs after the products are delivered to the customer. Revenue is recognized at a point in time when control transfers. The company pays commissions to brokers who obtain contracts with customers. Commissions are paid on the total value of the contract, which is determined at contract inception and is based on expected future activity. Broker commissions will not extend beyond a one-year term because each product is considered a separate order in the PO.

Other Revenue Components

Shipping and handling costs associated with outbound freight after control over a product has transferred to a customer are accounted for as a fulfillment cost and are included in our selling, distribution, and administrative expenses line item on the Consolidated Statements of Income.

The company recognizes the incremental costs of obtaining contracts as an expense when incurred if the amortization period of the assets that the company otherwise would have recognized is one year or less. These costs are included in our selling, distribution, and administrative expenses line item on the Consolidated Statements of Income.

Our sales channels are Branded Retail and Other. The Other channel includes store branded retail, foodservice, restaurants, institutional, vending, thrift stores, and contract manufacturing. The company does not disaggregate revenue by geographic region, customer type, or contract type. All revenues are recognized at a point in time. Net sales by sales channel are as follows for Fiscal 2025, 2024, and 2023 (amounts in thousands):

	<u>Fiscal 2025</u>	<u>Fiscal 2024</u>	<u>Fiscal 2023</u>
Branded Retail	\$ 3,462,854	\$ 3,259,267	\$ 3,264,742
Other	1,793,625	1,844,220	1,826,088
Total	<u>\$ 5,256,479</u>	<u>\$ 5,103,487</u>	<u>\$ 5,090,830</u>

(The table above presents certain sales by category that have been reclassified from amounts previously reported to conform to the current period presentation.)

Cash and Cash Equivalents. The company considers deposits in banks, certificates of deposits, and short-term investments with original maturities of three months or less, and highly liquid investments that are readily convertible to known amounts of cash to be cash and cash equivalents.

Accounts and Notes Receivable. Accounts and notes receivable consist of trade receivables, current portions of distributor notes receivable, and miscellaneous receivables. The company recognizes an allowance for credit losses related to its accounts and notes receivable to present the net amount expected to be collected as of the balance sheet date. The company estimates this allowance based on historical data such as days sales outstanding trends, previous write-offs of balances, and weekly reviews of aged trial balances, among others. Accounts and notes receivable balances are written off when deemed uncollectible and are recognized as a deduction from the allowance for credit losses. The write-offs represent the amounts that are used to reduce the gross accounts and notes receivable at the time the balance due from the customer is written-off. Expected recoveries, not to exceed the amount previously written off, are considered in determining the reserve balance at the balance sheet date. Activity in the allowance for doubtful accounts is as follows (amounts in thousands):

	<u>Beginning Balance</u>	<u>Charged to Expense</u>	<u>Write-Offs and Other</u>	<u>Ending Balance</u>
Fiscal 2025	\$ 17,922	\$ 7,429	\$ (7,220)	\$ 18,131
Fiscal 2024	\$ 33,386	\$ 8,304	\$ (23,768)	\$ 17,922
Fiscal 2023	\$ 18,764	\$ 8,412	\$ 6,210	\$ 33,386

The company recorded a reserve of \$14.9 million during the third quarter of Fiscal 2023 for the distributor notes receivable as part of a legal settlement. Changes in the write-offs and other column reflect the company's application of the reserve during Fiscal 2025 and Fiscal 2024. The charge for this allowance was recorded as a legal expense and is recognized as 'Other' in the column of the table above. The expense column is specific to bad debt expense. There was no reserve and \$2.4 million of reserve for the distributor notes receivable as of January 3, 2026 and December 28, 2024, respectively. See Note 23, *Commitments and Contingencies*, for additional information.

Activity in the allowance for trade accounts receivable credit losses for Fiscal 2025, 2024 and 2023 was as follows (amounts in thousands):

	Beginning Balance	Charged to Expense	Write-Offs and Other	Recoveries and other	Ending Balance
Fiscal 2025	\$ 2,463	\$ 992	\$ (1,965)	\$ 1,630	\$ 3,120
Fiscal 2024	\$ 2,070	\$ 2,095	\$ (1,035)	\$ (667)	\$ 2,463
Fiscal 2023	\$ 2,188	\$ 3,089	\$ (2,635)	\$ (572)	\$ 2,070

The amounts charged to expense for bad debts in the table above, inclusive of other non-trade accounts receivable amounts, are reported as adjustments to reconcile net income to net cash provided by operating activities in the Consolidated Statements of Cash Flows. Walmart/Sam's Club is our only customer with a balance greater than 10% of outstanding trade receivables. Their percentage of trade receivables was 18.2% and 18.4%, on a consolidated basis, as of January 3, 2026, and December 28, 2024, respectively. No other customer accounted for greater than 10% of the company's outstanding receivables.

Concentration of Credit Risk. The company performs periodic credit evaluations and grants credit to customers, who are primarily in the grocery and foodservice markets, and generally does not require collateral. Our top 10 customers in Fiscal 2025, 2024, and 2023 accounted for 57.7%, 56.7% and 55.5% of net sales, respectively. Our largest customer's, Walmart/Sam's Club, weighted percent of net sales for Fiscal 2025, 2024, and 2023 was as follows:

	Percent of Net Sales
Fiscal 2025	21.5%
Fiscal 2024	22.4%
Fiscal 2023	22.3%

Walmart/Sam's Club is the only customer to account for greater than 10% of the company's net sales.

Inventories. Inventories at January 3, 2026 and December 28, 2024 are valued at net realizable value. Costs for raw materials and packaging are recorded at moving average cost. Finished goods inventories cost is determined using standard cost, which approximates the first-in, first-out method.

The company will write down inventory to net realizable value for estimated unmarketable inventory equal to the difference between the cost of the inventory and the estimated net realizable value for situations when the inventory is impaired by damage, deterioration, or obsolescence.

Activity in the inventory reserve allowance is as follows (amounts in thousands):

	Beginning Balance	Charged to Expense	Write-Offs and Other	Ending Balance
Fiscal 2025	\$ 58	\$ 5,115	\$ (5,106)	\$ 67
Fiscal 2024	\$ 696	\$ 4,367	\$ (5,005)	\$ 58
Fiscal 2023	\$ 1,036	\$ 2,376	\$ (2,716)	\$ 696

The amounts charged to expense for inventory loss in the table above are reported as adjustments to reconcile net income to net cash provided by operating activities in the Consolidated Statements of Cash Flows. The write-offs and other column represents the amounts that are used to reduce gross inventories.

Shipping Costs. Shipping costs are included in the selling, distribution, and administrative expenses line item of the Consolidated Statements of Income. For Fiscal 2025, 2024, and 2023, shipping costs were \$1,109.8 million, \$1,181.0 million, and \$1,215.4 million, respectively, including the costs paid to IDPs.

Spare Parts and Supplies. The company maintains inventories of spare parts and supplies, which are used for repairs and maintenance of its machinery and equipment. These spare parts and supplies allow the company to react quickly in the event of a mechanical breakdown. These parts are valued using the moving average method and are expensed as the part is used. Periodic physical inventories of the parts are performed, and the value of the parts is adjusted for any obsolescence or difference from the physical inventory count.

Assets Held for Sale. Assets to be sold are classified as held for sale in the period all the required criteria are met. The company generally has three types of assets classified as held for sale. These include distribution rights, plants and depots/warehouses, and other equipment. See Note 9, *Assets Held for Sale*, for these amounts by classification.

The company voluntarily repurchases distribution rights from and sells distribution rights to IDPs from time to time. At the time the company purchases distribution rights from an IDP, the fair value purchase price of the distribution right is recorded as “Assets Held for Sale”. Upon the sale of the distribution rights to a new IDP, the new distributor franchisee/owner may choose how he/she desires to finance the purchase of the business. If the new distributor chooses to use optional financing via a company-related entity, a note receivable of up to ten years is recorded for the financed amount with a corresponding credit to assets held for sale to relieve the carrying amount of the territory. Any difference between the selling price of the business and the distribution rights’ carrying value, if any, is recorded as a gain or a loss in selling, distribution, and administrative expenses because the company considers the IDP activity a cost of distribution. This gain is recognized over the term of the outstanding notes receivable as payments are received from the IDP. In instances where a distribution right is sold for less than its carrying value, a loss is recorded at the date of sale and any impairment of a distribution right held for sale is recorded at such time when the impairment occurs. The deferred gains were \$6.6 million and \$7.8 million at January 3, 2026 and December 28, 2024, respectively, and are recorded in other short and long-term liabilities on the Consolidated Balance Sheets. The company recorded net gains (losses) of \$0.6 million during Fiscal 2025, \$(0.6) million during Fiscal 2024 and \$2.5 million during Fiscal 2023 (exclusive of \$65.3 million of repurchase obligations of distribution rights related to a legal settlement) related to the sale of distribution rights as a component of selling, distribution, and administrative expenses. See Note 23, *Commitments and Contingencies*, for details on the settlement.

Property, Plant and Equipment and Depreciation. Property, plant and equipment is recognized at cost. Depreciation expense is computed using the straight-line method over the estimated useful lives of the depreciable assets.

The table below presents the range of estimated useful lives by property, plant and equipment class.

Asset Class	Useful life term (years)	
	Low	High
Buildings	10	40
Machinery and equipment	3	15
Furniture, fixtures and transportation equipment	3	12

Property recorded as leasehold improvements is amortized over the shorter of the lease term or the estimated useful life of the leased property.

Depreciation expense, excluding amortization of right-of-use financing leases, for Fiscal 2025, 2024, and 2023 was as follows (amounts in thousands):

	Depreciation expense
Fiscal 2025	\$ 128,412
Fiscal 2024	\$ 127,577
Fiscal 2023	\$ 117,788

The company had no capitalized interest during Fiscal 2025, 2024, and 2023. The cost of maintenance and repairs is charged to expense as incurred. Upon disposal or retirement, the cost and accumulated depreciation of assets are eliminated from the respective accounts. Any gain or loss is reflected in the company’s Consolidated Statements of Income and is included in adjustments to reconcile net income to net cash provided by operating activities on the other line item in the Consolidated Statements of Cash Flows.

Leases. The company’s leases consist of the following types of assets: bakeries, corporate office space, warehouses, bakery equipment, transportation equipment, and IT equipment (debt is discussed separately in Note 15, *Debt and Other Commitments*).

Real estate and equipment contracts occasionally contain multiple lease and non-lease components. Generally, non-lease components represent maintenance and utility related charges, and are primarily minor to the overall value of applicable contracts. These contracts also contain fixed payments with stated rent escalation clauses or fixed payments based on an index such as consumer price index ("CPI"). Additionally, some contracts contain tenant improvement allowances, rent holidays, lease premiums, and contingent rent provisions (which are treated as variable lease payments). Building and/or office space leases generally require the company to pay for common area maintenance (CAM), insurance, and taxes that are not included in the base rental payments, with the majority of these leases treated as net leases, and the remainder treated as gross or modified gross leases.

The lease term for real estate leases primarily ranges from one to 22 years, with a few leases that are month to month, and accounted for as short-term leases. See discussion on short-term leases below. The term of bakery equipment leases primarily ranges from less than a year up to five years. Transportation equipment generally has terms of less than one year up to seven years. Certain equipment (i.e., equipment subject to management contracts) and IT equipment leases have terms shorter than a year and are accounted for as short-term leases. See discussion on short-term leases below.

These contracts may contain renewal options for periods of one month up to 10 years at fixed percentages of market pricing, with some that are reasonably certain of exercise. For those contracts that contain leases, the company recognizes renewal options as part of right-of-use assets and lease liabilities. All other renewal and termination options are not reasonably certain of exercise or occurrence as of January 3, 2026.

These contracts may also contain right of first offer purchase options, along with expansion options that are not reasonably certain of exercise. Additionally, these contracts do not contain residual value guarantees, and there are no other restrictions or covenants in the contracts.

For these real estate contracts, the company's exclusive use of specified real estate for a specific term and for consideration resulted in the company treating these contracts as leases.

For those contracts that contain leases of buildings and land, the company has elected to not separate land components from leases of specified property, plant, and equipment, as it was determined to have no effect on lease classification for any lease component, and the amounts recognized for the land lease components would have been immaterial.

These contracts may also contain end-term purchase options, whereby the company may purchase the assets for stated pricing at the lesser of fair market value or a percentage of original asset cost. Yet, these purchase options were determined to not be reasonably certain of exercise or occurrence as of January 3, 2026. Additionally, these contracts do not contain residual value guarantees, and there are no other restrictions or covenants in the contracts.

The company's ability to make those decisions that most effect the economic benefits derived from the use of the equipment, accompanied by receiving substantially all outputs and utility from the use of the equipment resulted in the company accounting for these contracts as leases.

These leases are classified as operating leases because real estate leases do not transfer ownership at the end of the lease term, assets are not of such a specialized nature that real estate would not have alternative uses to lessors at the end of the lease term, lease terms do not represent a major part of the total useful life of real estate, and the present value of lease payments do not represent substantially all the fair value of leased assets at commencement.

Short-term leases

The company has also entered into short-term leases of certain real estate assets, along with IT equipment, and various equipment used for short-term bakery needs through equipment placement or service contracts that require purchase of consumables. These leases extend for periods of one to 12 months. Lease term and amounts of payments are generally fixed. There are no purchase options present, however, there generally are renewals that could extend lease terms for additional periods. Generally, renewal options, as they cannot be unilaterally exercised, are not reasonably certain of exercise, do not contain residual value guarantees, and there are no other restrictions or covenants in the leases.

Therefore, the company recognizes lease payments from these short-term leases and variable payments on the Consolidated Statements of Income in the period in which obligation for those payments have been incurred.

Modifications and reassessments

During Fiscal 2025 and 2024, the company elected certain renewal options that were not previously certain of exercise. Election of these renewal options resulted in reassessment of lease terms for the applicable leases.

The company included the renewal periods in measurement of lease terms for the applicable leases. Given that rental payments in the renewal periods were fixed, the company also remeasured the lease payments, and reallocated remaining contract consideration to the lease components within the applicable real estate leases. Although the triggering events did not result in changes to lease classification (i.e., all remained operating leases), they did affect the measurement of lease liabilities, right-of-use assets (“ROU assets”), and amounts recognized as lease expense for the applicable real estate leases.

Other significant judgments and assumptions

For all classes of assets, the company primarily used our incremental borrowing rates (“IBR”) to perform lease classification tests and measure lease liabilities because discount rates implicit in the company’s leases were not readily determinable.

See Note 14, *Leases*, for our lease quantitative disclosures.

Segment. The company has identified two operating segments based on how business activities are managed and evaluated, legacy Flowers Foods and Simple Mills. Simple Mills qualifies as an operating segment as it meets the criteria of being a business and has discrete financial information available that is regularly reviewed by the CEO, who is the CODM, to assess the performance and allocate resources. As Simple Mills shares similar economic characteristics with legacy Flowers Foods, we aggregate Simple Mills and legacy Flowers Foods as one operating segment for the purpose of determining our one reportable segment.

Investment in Unconsolidated Affiliate. In the second quarter of Fiscal 2022, we invested \$9.0 million in Base Culture, a Clearwater, Florida-based company with one manufacturing facility. We made an additional investment of \$2.0 million in Base Culture during the second quarter of Fiscal 2023. Base Culture’s product offerings include better-for-you, gluten-free, and grain-free sliced breads and baked goods that are all-natural, 100% Paleo-certified, kosher-certified, dairy-free, soy-free, and non-GMO verified. The investment is being accounted for at cost, less any impairment, adjusted for changes resulting from observable price changes in orderly transactions involving the affiliate, as we do not control nor do we have the ability to significantly influence the affiliate, nor is there a readily determinable fair value. Should circumstances indicate a change in the fair value, a fair value adjustment may be necessary.

During the first quarter of Fiscal 2024, the company’s qualitative assessment of the fair value of Base Culture indicated the investment may be impaired. Additional quantitative analysis of Base Culture indicated a fair value of approximately \$1.5 million of the company’s interest. The company recognized an impairment loss of \$4.0 million during the first quarter of Fiscal 2024 which is reported in the plant closure costs and impairment of assets line item of the Consolidated Statements of Income. The company previously recognized an impairment loss of \$5.5 million during the fourth quarter of Fiscal 2023. The losses recognized represent the difference between the estimated fair value and the company’s carrying value. The current carrying value is approximately \$1.5 million.

Business Combinations. The company’s acquisitions of businesses are accounted for in accordance with ASC 805, “Business Combinations.” The company recognizes the identifiable assets acquired, the liabilities assumed, and any noncontrolling interests in an acquired business at their fair values as of the date of acquisition. Goodwill is measured as the excess of the consideration transferred, also measured at fair value, over the net of the acquisition date fair values of the identifiable assets acquired and liabilities assumed. The acquisition method of accounting requires us to make significant estimates and assumptions regarding the fair values of the elements of a business combination as of the date of acquisition, including the fair values of identifiable intangible assets, property, plant, and equipment, deferred tax asset valuation allowances, liabilities including those related to debt, pensions and other postretirement plans, uncertain tax positions, contingent consideration, and contingencies. This method also requires us to refine these estimates over a measurement period not to exceed one year to reflect new information obtained about facts and circumstances that existed as of the acquisition date that, if known, would have affected the measurement of the amounts recognized as of that date. If we are required to adjust provisional amounts that we have recorded for the fair values of assets and liabilities in connection with acquisitions, these adjustments could have a material impact on our financial condition and results of operations.

Significant estimates and assumptions in estimating the fair value of customer relationships, trademarks, non-compete agreements, distributor relationships, and other identifiable intangible assets include future cash flows that the company expects to generate from the acquired assets, discount rate, customer attrition rate, and long-term revenue growth projections. Projecting discounted future cash flows requires the company to make significant estimates regarding projected revenues, projected earnings before interest, taxes, depreciation, and amortization margins, discount rates, royalty rate and customer attrition rates. If the subsequent actual results and updated projections of the underlying business activity change compared with the assumptions and projections used to develop these values, the company could record impairment charges. In addition, the company has estimated the economic lives of certain acquired assets and these lives are used to calculate depreciation on property, plant, and equipment and amortization expense on definite-lived intangible assets. If the estimates of the economic lives change, depreciation or amortization expenses could be increased or decreased, or the acquired asset could become impaired.

For leases acquired in a business combination, the company measures the lease liability at the present value of the remaining lease payments, as if the acquired lease were a new lease of the company at the acquisition date. When the implicit rate in the acquired lease is not readily determinable, the company calculates the lease liabilities using discount rates based upon the company's applicable incremental borrowing rate. An assessment of the certainty associated with the exercise of any lease renewal, termination, and purchase options included in the acquired lease contracts is also performed. The company measures the right-of-use asset at the same amount as the lease liability as adjusted to reflect favorable or unfavorable terms of the lease when compared with market terms.

Impairment of Long-Lived, Intangible, and Other Assets. Assumptions and estimates used in the evaluation of potential impairment can result in adjustments affecting the carrying values of long-lived, intangible, and other assets and the recognition of impairment expense in the company's consolidated financial statements. The company evaluates its long-lived assets (property, plant and equipment), definite-lived intangible assets, and other assets (including right-of-use lease assets, notes receivable, and equity) for impairment whenever indicators of impairment exist, or when it commits to sell the asset. If the sum of the undiscounted expected future cash flows from a long-lived asset or definite-lived intangible asset group is less than the carrying value of that asset group, an asset impairment charge is recognized. Key assumptions and estimates used in the projection of expected future cash flows generally include price levels, sales growth, profit margins and asset life. Future adverse changes, such as decisions to discontinue or significantly reduce the use of certain brands, in market conditions or poor operating results of these underlying assets could result in losses or an inability to recover the carrying value of the asset that may not be reflected in the asset's current carrying value, thereby possibly requiring impairment charges in the future. The amount of an impairment charge, if any, is calculated as the excess of the asset's carrying value over its fair value, generally represented by the discounted future cash flows from that asset or, in the case of assets the company evaluates for sale, estimated sale proceeds less costs to sell. The company takes into consideration historical data and experience together with all other relevant information available when estimating the fair values of its assets. However, fair values that could be realized in actual transactions may differ from the estimates used to evaluate impairment. In addition, changes in the assumptions and estimates may result in a different conclusion regarding impairment.

Finite-lived intangible assets are reviewed for impairment when facts and circumstances indicate that the cost of any finite-lived intangible asset may be impaired. This recoverability test is based on the undiscounted cash flows expected to result from the company's use and eventual disposition of the asset. If these cash flows are sufficient to recover the carrying value over the useful life there is no impairment. Amortization of finite-lived intangible assets occurs over their estimated useful lives. The amortization periods, at origination, range from two years to forty years for these assets. The attribution methods we primarily use are the sum-of-the-year digits for customer relationships and straight-line for other amortizing intangible assets. These finite-lived intangible assets generally include trademarks, customer relationships, non-compete agreements, distributor relationships (for instances when not held for sale), and supply agreements.

Identifiable intangible assets that are determined to have an indefinite useful economic life are not amortized. Indefinite-lived intangible assets are tested for impairment, at least annually, using a one-step fair value-based approach or when certain indicators of potential impairment are present. We have elected not to perform the qualitative approach. We also reassess the indefinite-lived classification to determine if it is appropriate to reclassify these assets as finite-lived assets that will require amortization. We consider historical performance and future estimated results in our evaluation of impairment. If facts and circumstances indicate that the cost of any indefinite-lived intangible assets may be impaired, an evaluation of the fair value of the asset is compared to its carrying amount. If the carrying amount exceeds the fair value, an impairment charge is recorded for the difference.

We use the multi-period excess earnings method to value the finite-lived intangible assets and the relief-from-royalty method to value indefinite-lived intangible assets. Fair value is estimated using the future gross, discounted cash flows associated with the asset using the following five significant assumptions: (a) discount rate; (b) forecasted sales growth rates; (c) forecasted EBITDA margins (not applicable to the relief-from-royalty method), (d) assumed royalty rate (not applicable to the multi-period excess earnings method); and (e) customer attrition rate (not applicable to the relief-from-royalty method).

The company evaluates useful lives for finite-lived intangible assets to determine if facts or circumstances arise that may impact the estimates of useful lives assigned and the remaining amortization duration. Indefinite-lived intangible assets that are determined to have a finite useful life are tested for impairment as an indefinite-lived intangible asset prior to commencing amortization. Impairment charges for long-lived assets recorded in Fiscal 2025, 2024, and 2023 are discussed below.

On February 12, 2025, the company announced the closure of its Bailey Street Bakery located in Atlanta, Georgia. The bakery produced bread and bun products and ceased production on April 16, 2025. This bakery closure is part of our strategy to optimize capacity within our supply chain. Closure costs included asset impairment charges and equipment relocation costs of \$6.1 million and severance costs of \$1.3 million and were recorded in the first quarter of Fiscal 2025. These costs are reported in the Plant closure costs and impairment of assets line item of the Consolidated Statements of Income. In the second quarter of Fiscal 2025, the company classified the bakery as held for sale.

In the fourth quarter of Fiscal 2025, concurrent with the company's annual planning process, the company performed an assessment of its definite-lived regional brands based on their current and expected future performance. As a result of this assessment, the company recorded an impairment charge of \$136.0 million for two of our brands which are included in our legacy Flowers Foods segment. The company intends to continue to use these two trademarks for the foreseeable future but on a more limited basis as it intends to focus on growing its national brands. These costs are reported in the Impairment of intangible assets line item of the Consolidated Statements of Income. Future adverse changes in market conditions or poor operating results of underlying intangible assets could result in losses or an inability to recover the carrying value of the intangible assets that may not be reflected in the assets' current carrying values, thereby possibly requiring an impairment charge in the future. See Note 10, *Goodwill and Other Intangible Assets*, for additional disclosure.

On July 18, 2024, the company announced the closure of its Baton Rouge, Louisiana bakery. The bakery produced bun products and ceased production on September 19, 2024. This bakery closure was part of our strategy to optimize capacity within our supply chain. The facility continues to be used as a distribution center. The closure costs for the Baton Rouge, Louisiana bakery included severance costs of \$1.1 million and asset impairment and equipment relocation charges of \$2.4 million in Fiscal 2024. In Fiscal 2024, the company also recognized a recovery of \$1.3 million related to the sale of equipment that had been previously written off in Fiscal 2022 as part of the Phoenix, Arizona bakery closure. Also in Fiscal 2024, the company recorded charges of \$2.7 million to fully impair certain ERP-related software and other equipment, and also recorded an asset impairment charge of \$1.4 million to write-off certain cake distribution territories classified as held for sale that the company no longer intends to sell. These costs and the costs below are reported in the Plant closure costs and impairment of assets line item of the Consolidated Statements of Income.

During the third and fourth quarters of Fiscal 2023, the company entered into agreements to sell a warehouse and a closed bakery, respectively, both of which were classified as held for sale and recorded impairment charges of \$1.8 million. The company completed the sale of the impaired warehouse for proceeds of \$1.3 million at the end of the third quarter of Fiscal 2023 and completed the sale of the bakery in Fiscal 2024.

The company fully impaired the California held and used distribution rights classified as intangible assets and recorded a charge of \$2.3 million in the selling, distribution, and administrative expenses line item of the Consolidated Statements of Income during Fiscal 2023.

Goodwill. The company accounts for goodwill in a purchase business combination as the excess of the cost over the fair value of net assets acquired. The company assesses goodwill for impairment annually during the fourth quarter, or from time to time when warranted by the facts and circumstances surrounding individual reporting units or the company as a whole. The company completed its most recent annual goodwill impairment testing during the fourth quarter of Fiscal 2025 and analyzed certain qualitative and quantitative factors in determining whether a goodwill impairment existed. Flowers has concluded it has two operating segments and two reporting units, legacy Flowers Foods and Simple Mills. As Simple Mills shares similar economic characteristics with legacy Flowers Foods, we aggregate Simple Mills and legacy Flowers Foods as one operating segment for the purpose of determining our one reportable segment. We have elected not to perform the qualitative approach, but instead perform a quantitative analysis by comparing the fair value of each of the reporting units with which the goodwill is associated to the carrying amount of the respective reporting unit. If the fair value is less than the carrying value, the goodwill is written down to the extent the carrying amount exceeds the fair value.

When performing a quantitative analysis, the company estimates the fair value of its reporting units using a weighted average of the income and market approaches. Under the income approach, the company uses a discounted cash flow model based on projections of future years' operating results and associated cash flows. The company's assessments reflected a number of significant management assumptions and estimates including the: (a) weighted average cost of capital; (b) forecasted sales growth rates; (c) forecasted EBITDA margins; and (d) market multiples (not applicable to the income approach). Changes in these assumptions could materially impact the company's conclusions. Based on its assessments, the company concluded that there was no impairment of goodwill for either of its reporting units.

The company's assessments, whether qualitative or quantitative, incorporate management's expectations for the future, including forecasted growth rates and/or margin improvements. Therefore, should there be changes in the relevant facts and circumstances and/or expectations, management's conclusions regarding goodwill impairment may change as well.

In considering the level of uncertainty regarding the potential for goodwill impairment, management has concluded that any such impairment would, in most cases, likely be the result of adverse changes in more than one assumption. Management considers the assumptions used to be its best estimates across a range of possible outcomes based on available evidence at the time of the assessment. Other than in the Simple Mills reporting unit there is no specific singular event or single change in circumstances management has identified that it believes could reasonably result in a change to the expected future results in the legacy Flowers Foods reporting unit that would be significant enough to result in goodwill impairment. In the case of Simple Mills, the lower differential between the fair value and carrying value of the reporting unit is due to the acquisition (in February 2025), at which time the majority of assets and liabilities acquired were recorded at fair value. In management's opinion, a change of such magnitude

would more likely be the result of changes to some combination of the factors identified above, a general deterioration in competitive position, significant unexpected changes in customer preferences, an inability to pass through significant raw material cost increases, and other such items as identified in “Item 1A. Risk Factors” in this Annual Report on Form 10-K.

Although no reporting units failed the annual impairment test, in management’s opinion, the goodwill balance of the Simple Mills reporting unit is at risk of impairment in the near term if the reporting unit’s operation does not perform in line with management’s expectations, or if there is a negative change in the long-term financial outlook for the reporting unit or in other factors such as the particular discount rates used. Total goodwill associated with the Simple Mills reporting unit was \$367.9 million at January 3, 2026.

Derivative Financial Instruments. The disclosure requirements for derivatives and hedging provide investors with an enhanced understanding of: (a) how and why an entity uses derivative instruments and related hedged items, (b) how the entity accounts for derivative instruments and related hedged items, and (c) how derivative instruments and related hedged items affect an entity’s financial position, financial performance, and cash flows. Further, qualitative disclosures are required that explain the company’s objectives and strategies for using derivative instruments and related hedged items, as well as quantitative disclosures about the fair value of and gains and losses on derivative instruments and related hedged items, and disclosures about credit-risk-related contingent features in derivative instruments and related hedged items.

The company’s objectives in using commodity derivatives are to add stability to materials, supplies, labor, and other production costs and to manage its exposure to certain commodity price movements. To accomplish this objective, the company uses commodity futures as part of its commodity risk management strategy. The company’s commodity risk management programs include hedging price risk for wheat, soybean oil, corn, and natural gas primarily using futures contracts, and to a lesser extent, options. Commodity futures designated as cash flow hedges involve fixing the price on a fixed volume of a commodity on a specified date. The commodity futures are given up to third parties near maturity to price the physical goods (e.g. flour, sweetener, corn, etc.) required as part of the company’s production.

The company enters into interest rate derivatives designated as cash-flow hedges of existing or future exposure to changes in interest rates. The company’s risk management objective and strategy with respect to interest rate derivatives is to protect the company against adverse fluctuations in interest rates by reducing its exposure to variability in cash flows relating to interest payments on a forecasted issuance of long-term debt.

As required, the company records all derivatives on the Consolidated Balance Sheets at fair value. The accounting for changes in the fair value of derivatives depends on the intended use of the derivative, whether the company has elected to designate a derivative in a hedging relationship and apply hedge accounting and whether the hedging relationship has satisfied the criteria necessary to apply hedge accounting. Derivatives designated and qualifying as a hedge of the exposure to variability in expected future cash flows, or other types of forecasted transactions, are considered cash flow hedges. Hedge accounting generally provides for the matching of the timing of gain or loss recognition on the hedged item with the earnings effect of the hedged forecasted transactions in a cash flow hedge. The company may enter into derivative contracts that are intended to economically hedge certain of its risks, even though hedge accounting does not apply, or the company elects not to apply hedge accounting.

For derivatives designated and that qualify as cash flow hedges of commodity price risk, the gain or loss on the derivative is recorded in accumulated other comprehensive income (loss) (“AOCI”) and subsequently reclassified in the period during which the hedged transaction affects earnings within the same income statement line item as the earnings effect of the hedged transaction. All our commodity derivatives at January 3, 2026 and December 28, 2024 qualified for hedge accounting. See Note 11, *Derivative Financial Instruments*, for additional disclosure.

The company routinely transfers amounts from AOCI to earnings as transactions for which cash flow hedges were held occur and impact earnings. Amounts reclassified out of AOCI to net income that relate to commodity contracts are presented as an adjustment to reconcile net income to net cash provided by operating activities on the Consolidated Statements of Cash Flows. Significant situations which do not routinely occur that could cause transfers from AOCI to earnings are the cancellation of a forecasted transaction for which a derivative was held as a hedge or a significant and material reduction in volume used of a hedged ingredient such that the company is over hedged and must discontinue hedge accounting. During Fiscal 2025, 2024, and 2023 there were no discontinued hedge positions.

The impact to earnings is included in our materials, supplies, labor and other production costs (exclusive of depreciation and amortization shown separately) line item. Changes in the fair value of the asset or liability are recorded as either a current or long-term asset or liability depending on the underlying fair value. Amounts reclassified to earnings for the commodity cash flow hedges are presented as an adjustment to reconcile net income to net cash provided by operating activities on the Consolidated Statements of Cash Flows. See Note 11, *Derivative Financial Instruments*, for additional disclosure.

Treasury Stock. The company records acquisitions of its common stock for treasury at cost. Differences between the proceeds for reissuances of treasury stock and average cost are credited or charged to capital in excess of par value to the extent of prior credits and thereafter to retained earnings. See Note 18, *Stockholders' Equity*, for additional disclosure.

Advertising and Marketing Costs. Advertising and marketing costs are expensed the first time the advertising takes place. Advertising and marketing costs were \$93.2 million, \$89.1 million, and \$99.3 million for Fiscal 2025, 2024, and 2023, respectively. Advertising and marketing costs are recorded in the selling, distribution, and administrative expense line item in our Consolidated Statements of Income.

Stock-Based Compensation. Stock-based compensation expense for all share-based payment awards granted is determined based on the grant date fair value. The company recognizes compensation costs only for those shares expected to vest on a straight-line basis over the requisite service period of the award, which is generally the vesting term of the share-based payment award. The shares issued for exercises and at vesting of the awards are issued from treasury stock. Forfeitures are recognized as they occur. Shares issued at vesting are recorded as reissuances of treasury stock. See Note 19, *Stock-Based Compensation*, for additional disclosure. Stock-based compensation expense is primarily included in selling, distribution, and administrative expense in the Consolidated Statements of Income.

Cloud computing arrangements ("CCA"). If a CCA includes a software license, the arrangement is within the scope of the internal-use software guidance. If the CCA does not include a software license (i.e. is hosted), the arrangement is a service contract and the fees for the CCA are recorded as an operating expense. Capitalized implementation costs are amortized over the term of the associated hosted CCA service on a straight-line basis. Amortization over the contract term begins at the time any component of the hosted CCA service is ready for use. Capitalized implementation costs are presented on the Consolidated Balance Sheets as an other asset. Amortization charges are presented in the selling, distribution, and administrative expenses line on the Consolidated Statements of Income.

Software Development Costs. The company expenses internal and external software development costs incurred in the preliminary project stage, and, thereafter, capitalizes costs incurred in developing or obtaining internally used software. Certain costs, such as maintenance and training, are expensed as incurred. Capitalized costs are amortized over a period of three to eight years and are subject to impairment evaluation. An impairment could be triggered if the company determines that the underlying software under review will no longer be used. The net balance of capitalized software development costs included in plant, property and equipment was \$85.4 million and \$99.1 million at January 3, 2026 and December 28, 2024, respectively. Amortization expense of capitalized software development costs, which is included in depreciation and amortization expense in the Consolidated Statements of Income, was \$18.2 million, \$18.1 million, and \$14.2 million in Fiscal 2025, 2024, and 2023, respectively.

Income Taxes. The company accounts for income taxes using the asset and liability method and recognizes deferred tax assets and liabilities for the expected future tax consequences of events that have been included in the financial statements. Under this method, deferred tax assets and liabilities are determined based on the temporary differences between the financial statement and tax basis of assets and liabilities using enacted tax rates in effect for the year in which the differences are expected to reverse. The effect of a change in tax rates on deferred tax assets and liabilities is recognized in income as a discrete item in the period that includes the enactment date.

The company records a valuation allowance to reduce its deferred tax assets to the amount that is more likely than not to be realized. The company has considered carryback, future taxable income, and prudent and feasible tax planning strategies in assessing the need for the valuation allowance. In the event the company was to determine that it would be more likely than not able to realize its deferred tax assets in the future in excess of its net recorded amount, an adjustment to the valuation allowance would increase income in the period such a determination was made. Likewise, should the company determine that it would not more likely than not be able to realize all or part of its net deferred tax assets in the future, an adjustment to the valuation allowance would decrease income in the period such determination was made.

The company recognizes a tax benefit from an uncertain tax position when it is more likely than not that the position will be sustained upon examination, including resolution of any related appeals or litigation process. Interest related to unrecognized tax benefits is recorded within the interest expense line in the accompanying Consolidated Statements of Income. See Note 22, *Income Taxes*, for additional disclosure.

The deductions column in the table below presents the amounts reduced in the deferred tax asset valuation allowance that were recorded to, and included as part of, deferred tax expense. The additions column represents amounts that increased the allowance.

Activity in the deferred tax asset valuation allowance is as follows (amounts in thousands):

	Beginning Balance	Deductions	Additions	Ending Balance
Fiscal 2025	\$ 3,387	\$ —	\$ 684	\$ 4,071
Fiscal 2024	\$ 1,586	\$ —	\$ 1,801	\$ 3,387
Fiscal 2023	\$ 1,030	\$ —	\$ 556	\$ 1,586

Self-Insurance Reserves. The company is self-insured for various levels of general liability, auto liability, workers' compensation, and employee medical and dental coverage. Insurance reserves are calculated based on a combination of an undiscounted basis based on actual claim data and estimates of incurred but not reported claims developed utilizing historical claim trends. Projected settlements of incurred but not reported claims are estimated based on pending claims, historical trends and industry trends related to expected losses and actual reported losses, and key assumptions, including loss development factors and expected loss rates.

Loss Contingencies. Loss contingencies are recorded at the time it is probable an asset is impaired, or a liability has been incurred and the amount can be reasonably estimated. For litigation claims the company considers the degree of probability of an unfavorable outcome and the ability to make a reasonable estimate of the loss. Losses are recorded in selling, distribution, and administrative expense in our Consolidated Statements of Income.

Net Income Per Common Share. Basic net income per share is computed by dividing net income by the weighted average common shares outstanding for the period. Diluted net income per share is computed by dividing net income by the weighted average common and common equivalent shares outstanding for the period. Common stock equivalents consist of the incremental shares associated with the company's stock compensation plans, as determined under the treasury stock method. The performance contingent restricted stock awards do not contain a non-forfeitable right to dividend equivalents and are included in the computation for diluted net income per share. Fully vested shares which have a deferral period extending beyond the vesting date are included in the computation for basic net income per share. See Note 20, *Earnings Per Share*, for additional disclosure.

Variable Interest Entities. The incorporated IDPs are not voting interest entities since the company has no direct interest in each entity; however, they qualify as variable interest entities ("VIEs"). The IDPs who are formed as sole proprietorships are excluded from the VIE accounting analysis because sole proprietorships are not within scope for determination of VIE status. The company typically finances the incorporated IDP and enters into a contract with the incorporated IDP to supply product at a discount for distribution in the IDP's territory. The combination of the company's loans to the incorporated IDP and the ongoing supply arrangements with the incorporated IDP provides a level of protection to the equity owners of the various distributorships that would not otherwise be available. However, the company is not considered to be the primary beneficiary of the VIEs. See Note 16, *Variable Interest Entities*, for additional disclosure of these VIEs.

Postretirement Plans. The company records pension costs and benefit obligations related to its defined benefit plans based on actuarial valuations. These valuations reflect key assumptions determined by management, including the discount rate, expected long-term rate of return on plan assets and mortality. Material changes in pension costs and in benefit obligations may occur in the future due to experience that is different than assumed and changes in these assumptions. See Note 21, *Postretirement Plans*, for additional disclosure.

Pension Plan Assets. The finance committee of the Board of Directors delegated its fiduciary and other responsibilities with respect to the Company's retirement plans' investment strategies to the employee benefits investment committee ("EBIC"). The EBIC, which consists of certain members of management, establishes investment guidelines and strategies and regularly monitors the performance of the plans' assets. The EBIC is responsible for executing these strategies and investing the pension assets in accordance with ERISA and fiduciary standards. The investment objective of the pension plans is to preserve the plans' capital and maximize investment earnings within acceptable levels of risk and volatility. The EBIC meets on a regular basis with its investment advisors to review the performance of the plans' assets. Based upon performance and other measures and recommendations from its investment advisors, the EBIC rebalances the plans' assets to the targeted allocation when considered appropriate.

Fair Value of Financial Instruments. On February 14, 2025, the company issued \$500.0 million of senior notes (the "2035 notes") and \$300.0 million of senior notes ("the 2055 notes"). Additionally, on March 9, 2021 and September 28, 2016, the company issued \$500.0 million of senior notes (the "2031 notes") and \$400.0 million of senior notes (the "2026 notes"), respectively. These notes are recorded in our financial statements at carrying value, net of debt discount and issuance costs. The debt discount and issuance costs are being amortized over the term of the note to interest expense. In addition, and for disclosure purposes, the fair value of the notes is estimated using yields obtained from independent pricing sources for similar types of borrowing arrangements and is considered a Level 2 valuation. Additional details are included in Note 17, *Fair Value of Financial Instruments*.

Research and Development Costs. The company recorded research and development costs of \$9.3 million, \$5.1 million, and \$5.9 million for Fiscal 2025, 2024, and 2023, respectively. These costs are recorded as selling, distribution, and administrative expenses in our Consolidated Statements of Income.

Other Comprehensive Income (Loss) (“OCI”). The company reports comprehensive income in two separate but consecutive financial statements. See Note 7, *Accumulated Other Comprehensive Income (Loss)*, for additional required disclosures.

Business Process Improvement Costs Related to the Transformation Strategy Initiatives. In the second half of Fiscal 2020, we launched initiatives to transform our business, including an upgrade to our information system, as well as investments in e-commerce, autonomous planning, and our “bakery of the future” initiatives. These initiatives are further discussed in Item 1., *Business*, of this Form 10-K. Implementation of the ERP upgrade is anticipated to be completed in Fiscal 2027. The expensed portion of costs incurred related to these initiatives, which was primarily consulting costs, was \$3.4 million, \$4.5 million, and \$21.5 million in Fiscal 2025, 2024, and 2023, respectively, and is reflected in the selling, distribution, and administrative expenses line item of the Consolidated Statements of Income.

Loss on inferior ingredients. In Fiscal 2025, the company recognized \$2.7 million of identifiable and measurable costs associated with product losses. These product losses resulted from inferior coconut sugar and cashew flour used in certain of its Simple Mills' products due to tiny fragments of metal present in the ingredients and from the presence of gluten in certain of Canyon Bakehouse's gluten-free products. We are currently not able to estimate any future anticipated losses and we continue to seek recovery of all losses through appropriate means.

Note 3. Recent Accounting Pronouncements

Pronouncements adopted during Fiscal 2025

On March 29, 2024, the FASB issued ASU 2024-02, "*Codification Improvements - Amendments to Remove References to the Concepts Statements*" which removes references to the FASB's concepts statements from the *FASB Accounting Standards Codification*. The ASU is part of the FASB's standing project to make codification updated for technical corrections such as conforming amendments, clarifications to guidance, simplifications to wording or structure guidance, and other minor improvements. The company adopted the new standard as of December 29, 2024, the beginning of our Fiscal 2025. The adoption of this guidance did not impact our financial statements.

On December 14, 2023, The FASB issued ASU 2023-09, "*Income Taxes (Topic 740): Improvements to Income Tax Disclosures*", which enhances the transparency and decision usefulness of income tax disclosures by requiring; (1) consistent categories and greater disaggregation of information in the rate reconciliation and (2) income taxes paid disaggregated by jurisdiction. It also includes certain other amendments to improve the effectiveness of income tax disclosures. For public business entities, the standard is effective for annual periods beginning after December 15, 2024. The company adopted the standard as of December 29, 2024, the beginning of our Fiscal 2025. The additional disclosures can be found in the Note 22, *Income Taxes*.

Accounting pronouncements not yet adopted

On December 17, 2025, the FASB issued ASU 2025-12, "*Codification Improvements*" which facilitates Codification updates for a broad range of Topics arising from technical corrections, unintended application of the Codification, clarifications, and other minor improvements. The amendments in this Update are effective for all entities for annual reporting periods beginning after December 15, 2026, and interim reporting periods within those annual reporting periods. The company is determining the impact on our business.

On September 18, 2025, the FASB issued ASU 2025-06, "*Intangibles - Goodwill and Other - Internal-use Software (Subtopic 350-40) - Targeted Improvements to the Accounting for Internal-use Software*" which modernizes the accounting for software costs that are accounted for under Subtopic 350-40. The amendments in the update are effective for all entities for annual reporting periods beginning after December 15, 2027, and interim reporting periods within those annual reporting periods. Early adoption is permitted as of the beginning of an annual reporting period. The company is determining the impact on our business.

On November 4, 2024, the FASB issued ASU 2024-03, "*Income Statement - Reporting Comprehensive Income - Expense Disaggregation Disclosures*" which improves the disclosures about a public business entity's expenses and addresses requests from investors for more detailed information about the types of expenses in commonly presented expense captions. The amendments in this update are effective for annual reporting periods beginning after December 15, 2026, and interim reporting periods beginning after December 15, 2027. Early adoption is permitted. The company is determining the impact on our business.

We have reviewed other recently issued accounting pronouncements and concluded that either they are not applicable to our business or no material effect is expected upon future adoption.

Note 4. Segments

Our CODM evaluates operating performance based on net income adjusted for items impacting comparability as detailed below. The CODM uses adjusted net income for the annual budgeting and monthly forecasting process. The CODM considers budget-to-current forecast and prior forecast-to-current forecast variances for adjusted net income on a period basis for evaluating performance and making decisions about allocating capital and other resources.

Detailed below are expense items impacting comparability for Fiscal 2025, 2024, and 2023 (amounts in thousands):

	<u>Fiscal 2025</u>	<u>Fiscal 2024</u>	<u>Fiscal 2023</u>	<u>Footnote</u>
	<u>53 weeks</u>	<u>52 weeks</u>	<u>52 weeks</u>	<u>Disclosure</u>
	(Amounts in thousands)			
Business process improvement costs	\$ 3,368	\$ 4,529	\$ 21,521	Note 2
Restructuring charges	6,083	7,403	7,099	Note 5
Restructuring-related implementation costs	19,529	2,979	—	Note 5
Plant closure costs and impairment of assets	7,397	10,310	7,298	Note 2
Impairment of intangible assets	135,981	—	—	Note 2, 10
Acquisition and integration-related costs	17,904	2,008	3,712	Note 2, 6
Loss on inferior ingredients	2,657	—	—	Note 2
Legal settlements and related costs	902	3,800	137,529	Note 23
Pension plan settlement loss	—	241	—	Note 21
	<u>\$ 193,821</u>	<u>\$ 31,270</u>	<u>\$ 177,159</u>	

Our single reportable segment net sales, net income, and significant expenses are as follows for Fiscal 2025, 2024, and 2023 (amounts in thousands):

	<u>Fiscal 2025</u>	<u>Fiscal 2024</u>	<u>Fiscal 2023</u>
	<u>53 weeks</u>	<u>52 weeks</u>	<u>52 weeks</u>
	(Amounts in thousands, except per share data)		
Net sales	\$ 5,256,479	\$ 5,103,487	\$ 5,090,830

- (1) The Other line item includes outside purchases of product, utilities, repairs and maintenance, rent, and other production costs.
- (2) The Other line item includes transportation, marketing, legal, consulting, rent, computer maintenance, and other overhead expenses.

Note 5. Restructuring Activities

During the first quarter of Fiscal 2025, we began a review of our cost-to-serve focused on improving efficiencies and identifying cost reduction opportunities. Based on this review, we announced a restructuring program in the third quarter of Fiscal 2025 and incurred costs for employee termination benefits related to a 2025 reduction-in-force ("RIF"). In the fourth quarter of Fiscal 2025, we began a comprehensive review of our brands, operations, and financial strategy. Although this review is in the early stages, it resulted in the impairment of two regional brands in the fourth quarter of Fiscal 2025. This aligns with our strategy to optimize our brand portfolio and invest in our national brands and key product categories. Additionally, during Fiscal 2025, the company incurred consulting costs associated with implementing these programs. We anticipate additional restructuring charges and related costs in subsequent quarters.

In April 2024, the company announced a cost savings program to improve operational performance, which includes employee termination benefits associated with a 2024 RIF and other expense optimization initiatives. The company incurred final RIF charges and made final payments in the first quarter of Fiscal 2025. The company also incurred consulting costs associated with implementing the restructuring program.

In February 2023, to improve operational effectiveness, increase profitable sales, and better meet customer requirements, the company announced a restructuring of plant operation responsibilities from the sales function to the supply chain function. As part of that restructuring, we incurred costs for employee termination benefits and other cash charges, which were primarily related to the voluntary employee separation incentive plan (the "2023 VSIP"), 2023 RIF, and employee relocation costs. There were no additional costs incurred during Fiscal 2025 or Fiscal 2024 for the 2023 VSIP, 2023 RIF, and employee relocation costs.

The tables below present the components of costs associated with the restructuring programs detailed above (amounts in thousands):

	<u>Fiscal 2025</u>
Restructuring charges:	
2025 RIF (1)	\$ 5,511
2024 RIF (1)	572
Restructuring-related implementation costs (2)	19,529
Total restructuring charges	<u>\$ 25,612</u>

	<u>Fiscal 2024</u>
Restructuring charges:	
2024 RIF (1)	\$ 7,403
Restructuring-related implementation costs (2)	2,979
Total restructuring charges	<u>\$ 10,382</u>

	<u>Fiscal 2023</u>
Restructuring charges:	
2023 VSIP	\$ 5,229
2023 RIF	899
Relocation costs	971
Total restructuring charges (1)	<u>\$ 7,099</u>

- (1) Presented on our Consolidated Statements of Income.
- (2) Costs are recorded in the selling, distribution and administrative expenses line item of our Consolidated Statements of Income.

The table below presents the components of, and changes in, our restructuring accruals (amounts in thousands):

	2024 RIF	2025 RIF	Total
Liability balance (1) at December 28, 2024	\$ 86	\$ —	\$ 86
Charges	572	5,511	\$ 6,083
Cash payments	(658)	(4,761)	\$ (5,419)
Liability balance (1) at January 3, 2026	\$ —	\$ 750	\$ 750

(1) Recorded in the other accrued current liabilities line item of our Consolidated Balance Sheets.

Note 6. Acquisitions

Simple Mills

On February 21, 2025, we completed the acquisition of 100% of the equity interests of Purposeful Foods Holdings, Inc., the parent company of Simple Mills, Inc., for total consideration of approximately \$848.6 million, which includes \$17.9 million payable to the sellers upon realization of certain tax benefits acquired as part of the transaction. Simple Mills, a market-leading natural brand offering premium better-for-you crackers, cookies, snack bars, and baking mixes, expands the company's presence in the better-for-you snacking category. The acquisition has been accounted for as a business combination. The total goodwill recorded for the acquisition was \$367.9 million and is not deductible for tax purposes.

The following table summarizes the preliminary fair value of purchase consideration paid for Simple Mills and the preliminary allocation of the purchase consideration to the assets acquired and liabilities assumed based on their estimated fair value. The goodwill, taxes, and certain other assets and liabilities are still under review. When relevant information is obtained, resulting changes to our provisional purchase price allocation are adjusted to reflect new information obtained about the facts and circumstances that existed as of the respective acquisition date that, if known, would have affected the measurement of the amounts recognized as of those dates. We recognized a \$19.0 million goodwill measurement period adjustment related to the valuation of trademarks and customer relationships, deferred taxes and assumed liabilities during the second quarter of Fiscal 2025. Additionally, the company recorded an immaterial purchase price adjustment during the third quarter of Fiscal 2025. These measurement period adjustments are reflected in the 'measurement period adjustments' column below. The impact to the amortization expense on the Consolidated Statements of Income is immaterial for Fiscal 2025 (amounts in thousands):

	Initial Preliminary Allocation	Measurement Period Adjustments	Updated Preliminary Allocation
Fair value of consideration transferred:			
Cash consideration paid at closing	\$ 830,713	\$ —	\$ 830,713
Payable to seller	17,824	48	17,872
Total consideration	\$ 848,537	\$ 48	\$ 848,585
Recognized amounts of identifiable assets acquired and liabilities assumed:			
Cash and cash equivalents	\$ 38,833	\$ —	\$ 38,833
Accounts receivable, net of allowances	18,065	—	18,065
Inventories	19,612	(101)	19,511
Property, plant, and equipment	1,729	13	1,742
Operating lease right-of-use assets	1,668	—	1,668
Customer relationships	173,100	4,700	177,800
Trademarks - infinite-lived	334,300	21,100	355,400
Other financial assets	1,936	—	1,936
Total identifiable assets acquired	\$ 589,243	\$ 25,712	\$ 614,955
Current maturities of operating leases	1,172	—	1,172
Accounts payable	14,702	(75)	14,627
Other financial liabilities	7,621	281	7,902
Deferred income taxes, net	104,098	6,450	110,548
Total liabilities assumed	\$ 127,593	\$ 6,656	\$ 134,249
Total identifiable net assets acquired	\$ 461,650	\$ 19,056	\$ 480,706
Goodwill	\$ 386,887	\$ (19,008)	\$ 367,879

Property, plant and equipment in the table above includes machinery and equipment and leasehold improvements.

The following table presents the acquired intangible assets subject to amortization (amounts in thousands, except amortization periods):

	<u>Total</u>	<u>Amortization years</u>	<u>Amortization Method</u>
Trademarks	\$ 355,400	Indefinite	N/A
Customer relationships	177,800	17	Straight-line
Total intangible assets	\$ 533,200		

Acquisitions Pro Forma

Simple Mills contributed net sales of \$213.9 million and net loss of \$14.4 million, which includes interest and amortization expense, net of tax impact, for Fiscal 2025. The following table provides the supplemental pro forma net sales and net income of the combined entity had the acquisition date of Simple Mills been December 31, 2023, the first day of Fiscal 2024 (amounts in thousands):

	<u>Fiscal 2025</u>	<u>Fiscal 2024</u>
	<u>53 weeks</u>	<u>52 weeks</u>
	<u>(Amounts in thousands, except per share data)</u>	
Net sales	\$ 5,292,366	\$ 5,342,935
Net income attributable to Flowers Foods	\$ 95,026	\$ 209,104

We incurred costs of \$2.0 million in Fiscal 2024 and additional costs \$17.9 million during Fiscal 2025 related to the acquisition (including non-recurring integration costs). These costs are reflected in the selling, distribution, and administrative expenses line item of the Consolidated Statements of Income and are reflected in the pro forma net income. The pro forma financial information also includes the following adjustments (net of tax based on statutory rates) related to the acquisition: amortization of the intangible assets and interest expense for the additional indebtedness incurred to finance the acquisition that would not have been incurred without the transaction. These adjustments increased the pro forma net income attributable to Flowers Foods by \$9.9 million for Fiscal 2025, and decreased pro forma net income by \$59.4 million for Fiscal 2024.

Papa Pita

On February 17, 2023, the company completed the acquisition of Papa Pita for total consideration of approximately \$274.8 million, inclusive of a net working capital adjustment. Papa Pita is a manufacturer and distributor of bagels, tortillas, breads, buns, English muffins, and flat breads with one production facility in West Jordan, Utah and, prior to the acquisition, Papa Pita co-manufactured certain products for the company. Papa Pita has direct-store-delivery distribution in the western U.S., expanding our geographic reach. We incurred acquisition costs of \$3.7 million during Fiscal 2023. These costs are reflected in the selling, distribution, and administrative expenses line item of the Consolidated Statements of Income. The company also recognized a \$2.1 million goodwill measurement period adjustment related to an environmental and emissions liability during the first quarter of Fiscal 2024. Papa Pita's operating income since the acquisition was immaterial to our Fiscal 2023 results of operations.

Note 7. Accumulated Other Comprehensive Income (Loss)

The company's total comprehensive income presently consists of net income, adjustments for our derivative financial instruments accounted for as cash flow hedges, and various pension and other postretirement benefit related items.

During Fiscal 2025, 2024, and 2023, reclassifications out of AOCI were as follows (amounts in thousands):

Details about AOCI Components (Note 2)	Amount Reclassified from AOCI			Affected Line Item in the Statement Where Net Income is Presented
	Fiscal 2025	Fiscal 2024	Fiscal 2023	
Derivative instruments:				
Interest rate contracts	\$ 861	\$ 498	\$ 499	Interest expense
Commodity contracts	(816)	(1,457)	(2,920)	Cost of sales, Note 3, below
Total before tax	\$ 45	\$ (959)	\$ (2,421)	Total before tax
Tax (expense) benefit	(12)	239	606	Tax expense
Total net of tax	\$ 33	\$ (720)	\$ (1,815)	Net of tax
Pension and postretirement plans:				
Prior-service credits	\$ 207	\$ 177	\$ 177	Note 1, below
Settlement loss	—	(241)	—	Note 1, below
Actuarial (losses) gains	190	138	74	Note 1, below
Total before tax	\$ 397	\$ 74	\$ 251	Total before tax
Tax benefit (expense)	(100)	(18)	(63)	Tax benefit
Total net of tax	\$ 297	\$ 56	\$ 188	Net of tax benefit
Total reclassifications from AOCI	\$ 330	\$ (664)	\$ (1,627)	Net of tax benefit

Note 1: These items are included in the computation of net periodic pension cost. See Note 21, *Postretirement Plans*, for additional information.

Note 2: Amounts in parentheses indicate debits to determine net income.

Note 3: Amounts are presented as an adjustment to reconcile net income to net cash provided by operating activities on the Consolidated Statements of Cash Flows.

During Fiscal 2025, 2024, and 2023, amounts recognized in AOCI, exclusive of reclassifications, were as follows (amounts in thousands):

AOCI component	Amount of Gain (Loss) Recognized in AOCI		
	Fiscal 2025	Fiscal 2024	Fiscal 2023
Derivative instruments:			
Interest rate contracts	\$ 4,213	\$ 7,679	\$ —
Commodity contracts	(8,462)	(473)	(3,934)
Total before tax	\$ (4,249)	\$ 7,206	\$ (3,934)
Tax benefit (expense)	1,063	(1,802)	983
Total net of tax	\$ (3,186)	\$ 5,404	\$ (2,951)
Pension and postretirement plans:			
Current year actuarial loss before tax	\$ (2,959)	\$ 188	\$ 628
Current year prior service cost	(2,963)	—	—
Total before tax	\$ (5,922)	\$ 188	\$ 628
Tax benefit (expense)	1,481	(47)	(157)
Total net of tax	\$ (4,441)	\$ 141	\$ 471
Total recognized in AOCI	\$ (7,627)	\$ 5,545	\$ (2,480)

During Fiscal 2025, changes to AOCI, net of income tax, by component were as follows (amounts in thousands):

	Cash Flow Hedge Items	Defined Benefit Pension Plan Items	Total
AOCI at December 28, 2024	\$ 7,087	\$ (257)	\$ 6,830
Other comprehensive gain before reclassifications	(3,186)	(4,441)	(7,627)
Reclassified to earnings from AOCI	(33)	(297)	(330)
AOCI at January 3, 2026	<u>\$ 3,868</u>	<u>\$ (4,995)</u>	<u>\$ (1,127)</u>

During Fiscal 2024, changes to AOCI, net of income tax, by component were as follows (amounts in thousands):

	Cash Flow Hedge Items	Defined Benefit Pension Plan Items	Total
AOCI at December 30, 2023	\$ 963	\$ (342)	\$ 621
Other comprehensive loss before reclassifications	5,404	141	5,545
Reclassified to earnings from AOCI	720	(56)	664
AOCI at December 28, 2024	<u>\$ 7,087</u>	<u>\$ (257)</u>	<u>\$ 6,830</u>

Amounts reclassified out of AOCI to net income that relate to commodity contracts are presented as an adjustment to reconcile net income to net cash provided by operating activities on the Consolidated Statements of Cash Flows. The following table presents the net of tax amount of the loss reclassified from AOCI for our commodity contracts (amounts in thousands):

	Fiscal 2025	Fiscal 2024	Fiscal 2023
Gross loss reclassified from AOCI into income	\$ (816)	\$ (1,457)	\$ (2,920)
Tax benefit	203	363	732
Net of tax	<u>\$ (613)</u>	<u>\$ (1,094)</u>	<u>\$ (2,188)</u>

Note 8. Notes Receivable from IDPs

The company provides direct financing to certain IDPs for the purchase of the IDPs' distribution rights and records the notes receivable on the Consolidated Balance Sheets. The distribution rights are financed for up to ten years. During Fiscal 2025, 2024, and 2023 the following amounts were recorded as interest income, the majority of which relates to these notes receivable (amounts in thousands):

	Interest income
Fiscal 2025	\$ 17,371
Fiscal 2024	\$ 17,506
Fiscal 2023	\$ 20,577

The notes receivable are collateralized by the IDPs' distribution rights. Additional details are included in Note 17, *Fair Value of Financial Instruments*.

Note 9. Assets Held for Sale

The table below presents the assets held for sale as of January 3, 2026 and December 28, 2024, respectively (amounts in thousands):

	January 3, 2026	December 28, 2024
Distribution rights	\$ 23,205	\$ 23,734
Property, plant and equipment	3,485	790
Total assets held for sale	<u>\$ 26,690</u>	<u>\$ 24,524</u>

The company repurchases distribution rights from IDPs in circumstances when the company decides to exit a territory or, in some cases, when the IDP elects to terminate its relationship with the company. In most distributor agreements, if the company decides to exit a territory or stop using the independent distribution model in a territory, the company is contractually required to purchase the distribution rights from the IDP. In the event an IDP terminates its relationship with the company, the company, although not legally obligated, may repurchase and operate those distribution rights as a company-owned territory. The IDPs may also sell their

distribution rights to another person or entity. Distribution rights purchased from IDPs and operated as company-owned territories are recorded on the Consolidated Balance Sheets in the line item “Assets Held for Sale” while the company actively seeks another IDP to purchase the distribution rights for the territory. Distribution rights held for sale and operated by the company are sold to IDPs at fair market value pursuant to the terms of a distributor agreement. There are multiple versions of the distributor agreement in place at any given time and the terms of such distributor agreements vary.

On February 12, 2025, the company announced the closure of its Bailey Street Bakery located in Atlanta, Georgia, and it ceased production on April 16, 2025. In the second quarter of Fiscal 2025, the company classified the land and building as held for sale, and no impairment loss was recognized as the fair value less cost to sell exceeded the carrying value. The carrying values of assets held for sale are not amortized and are evaluated for impairment as required at the end of the reporting period.

During the second quarter of Fiscal 2024, the company recorded an asset impairment charge of \$1.4 million to write-off certain cake distribution territories classified as held for sale that the company no longer intends to sell.

During the third and fourth quarters of Fiscal 2023, the company entered into agreements to sell a warehouse and a closed bakery, respectively, both of which were classified as held for sale and recorded impairment charges of \$1.8 million. The company completed the sale of the impaired warehouse for proceeds of \$1.3 million at the end of the third quarter of Fiscal 2023 and completed the sale of the bakery in Fiscal 2024 for proceeds of \$0.7 million.

Note 10. Goodwill and Other Intangible Assets

The table below summarizes our goodwill and other intangible assets as of January 3, 2026 and December 28, 2024, respectively, each of which is explained in additional detail below (amounts in thousands):

	<u>January 3, 2026</u>	<u>December 28, 2024</u>
Goodwill	\$ 1,047,775	\$ 679,896
Amortizable intangible assets, net of amortization	502,162	499,269
Indefinite-lived intangible assets	482,500	127,100
Total goodwill and other intangible assets	<u>\$ 2,032,437</u>	<u>\$ 1,306,265</u>

On February 21, 2025, the company completed the acquisition of Simple Mills for total consideration of approximately \$848.6 million. The changes in the carrying amount of goodwill during Fiscal 2025 related to the acquisition of Simple Mills are as follows (amounts in thousands):

	<u>Total</u>
Balance as of December 28, 2024	\$ 679,896
Acquisition (see Note 6, <i>Acquisitions</i>)	367,879
Balance as of January 3, 2026	<u>\$ 1,047,775</u>

In the annual goodwill impairment analysis, completed during the fourth quarter of Fiscal 2025, projected future cash flows for the Simple Mills reporting unit were discounted at 11.0%, and its estimated fair value was determined to exceed its carrying value by approximately 7.9%. The smaller differential between the fair value and carrying value of the Simple Mills reporting unit is due to the short time period between the acquisition date (February 21, 2025), at which time the majority of assets and liabilities acquired were recorded at fair value, and the annual impairment testing date.

Although no reporting units failed the annual impairment test, in management’s opinion, the goodwill balance of the Simple Mills reporting unit could be at risk of impairment in the near term if the reporting unit’s operations do not perform in line with management’s expectations or if there is a negative change in the long-term financial outlook for the reporting unit or in other factors such as the discount rate or market multiples.

Based on equal weighting of the income and market approaches, and holding other valuation assumptions constant, the discount rate for the Simple Mills reporting unit would have to exceed 12.5% or forecasted EBITDA margin across all future periods would have to be reduced approximately 12.5% in order for the estimated fair value of the reporting unit to fall below its carrying value. At January 3, 2026, the total goodwill associated with the Simple Mills reporting unit was \$367.9 million. No goodwill impairments were recognized in Fiscal 2025, 2024, or 2023.

As of January 3, 2026 and December 28, 2024, the company had the following amounts related to amortizable intangible assets (amounts in thousands):

Asset	January 3, 2026			December 28, 2024		
	Cost	Accumulated Amortization	Net Value	Cost	Accumulated Amortization	Net Value
Trademarks	\$ 345,733	\$ 136,586	\$ 209,147	\$ 481,715	\$ 122,432	\$ 359,283
Customer relationships	518,021	225,143	292,878	340,221	200,549	139,672
Non-compete agreements	5,454	5,356	98	5,454	5,281	173
Distributor relationships	4,123	4,084	39	4,123	3,982	141
Total	<u>\$ 873,331</u>	<u>\$ 371,169</u>	<u>\$ 502,162</u>	<u>\$ 831,513</u>	<u>\$ 332,244</u>	<u>\$ 499,269</u>

The Simple Mills acquisition included an amortizable intangible asset of \$177.8 million and is included in the customer relationships line in the table above. See Note 6, *Acquisitions*, for details of the assets and the respective amortization period by category.

In the fourth quarter of Fiscal 2025, concurrent with the company's annual planning process, the company performed an assessment of two of its definite-lived regional brands based on their current and expected future performance. As a result of this assessment, the company recorded an impairment charge of \$136.0 million. The company intends to continue to use the trademarks for the foreseeable future but on a more limited basis as it intends to focus on growing its national brands.

In Fiscal 2020, the company reclassified certain California distribution rights from held for sale to held and used. In conjunction with the agreement to settle the California distributor-related litigation, reached in Fiscal 2023, the company fully impaired these distribution rights and recorded a charge of \$2.3 million in the selling, distribution, and administrative expenses line item of the Consolidated Statements of Income during Fiscal 2023. See Note 23, *Commitments and Contingencies*, for details of this settlement.

As of January 3, 2026 and December 28, 2024, there was \$482.5 million and \$127.1 million, respectively, of indefinite-lived intangible trademark assets separately identified from goodwill. These trademarks are classified as indefinite-lived because there is no foreseeable limit to the period over which the asset is expected to contribute to our cash flows. *Wonder* and *Sunbeam* are well established brands with a long history and well-defined markets. In addition, we are continuing to use these brands both in their original markets and throughout our expansion territories. The Simple Mills brands are part of our long-term strategy to grow in the better-for-you category. We believe these factors support an indefinite-life assignment with an annual impairment analysis to determine if the trademarks are realizing their expected economic benefits.

Amortization expense

Amortization expense for Fiscal 2025, 2024, and 2023 was as follows (amounts in thousands):

	Amortization expense
Fiscal 2025	\$ 38,925
Fiscal 2024	\$ 31,371
Fiscal 2023	\$ 32,218

Estimated amortization of intangibles for Fiscal 2026 and the next four years thereafter is as follows (amounts in thousands):

Fiscal year	Amortization of Intangibles
2026	\$ 34,702
2027	\$ 33,052
2028	\$ 31,423
2029	\$ 29,222
2030	\$ 28,125

Note 11. Derivative Financial Instruments

The company measures the fair value of its derivative portfolio by using the price that would be received to sell an asset or paid to transfer a liability in the principal market for that asset or liability. These measurements are classified into a hierarchy by the inputs used to perform the fair value calculation as follows:

Level 1: Fair value based on unadjusted quoted prices for identical assets or liabilities at the measurement date

Level 2: Modeled fair value with model inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly

Level 3: Modeled fair value with unobservable model inputs that are used to estimate the fair value of the asset or liability

Commodity Price Risk

The company enters into commodity derivatives, designated as cash-flow hedges of existing or future exposure to changes in commodity prices. The company's primary raw materials are flour, sweeteners, yeast, and shortening, along with pulp, paper, and petroleum-based packaging products. Natural gas, which is used as oven fuel, is also an important commodity used for production.

As of January 3, 2026, the company's commodity hedge portfolio contained derivatives which are recorded in the following accounts with fair values measured as indicated (amounts in thousands):

	Level 1	Level 2	Level 3	Total
Assets:				
Other current assets	\$ 46	\$ —	\$ —	\$ 46
Other long-term assets	—	—	—	—
Total	\$ 46	\$ —	\$ —	\$ 46
Liabilities:				
Other current liabilities	\$ (546)	\$ —	\$ —	\$ (546)
Other long-term liabilities	—	—	—	—
Total	\$ (546)	\$ —	\$ —	\$ (546)
Net Fair Value	\$ (500)	\$ —	\$ —	\$ (500)

As of December 28, 2024, the company's commodity hedge portfolio contained derivatives which are recorded in the following accounts with fair values measured as indicated (amounts in thousands):

	Level 1	Level 2	Level 3	Total
Assets:				
Other current assets	\$ 723	\$ —	\$ —	\$ 723
Other long-term assets	—	—	—	—
Total	\$ 723	\$ —	\$ —	\$ 723
Liabilities:				
Other current liabilities	\$ (1,290)	\$ —	\$ —	\$ (1,290)
Other long-term liabilities	—	—	—	—
Total	(1,290)	—	—	(1,290)
Net Fair Value	\$ (567)	\$ —	\$ —	\$ (567)

The positions held in the portfolio are used to hedge economic exposure to changes in various raw materials and production input prices and effectively fixes the price, or limits increases in prices, for a period of time extending into Fiscal 2026. These instruments are designated as cash-flow hedges. See Note 2, *Summary of Significant Accounting Policies*, for the accounting treatment of these hedged transactions.

Interest Rate Risk

The company enters into interest derivatives designated as cash-flow hedges of existing or future exposure to changes in interest rates. The company's risk management objective and strategy with respect to interest rate swaps is to protect the company against adverse fluctuations in interest rates by reducing its exposure to variability in cash flows relating to interest payments on a forecasted issuance of long-term debt. These swaps are designated as cash flow hedges.

For derivatives designated and that qualify as cash flow hedges of interest rate risk, the gain or loss on the derivative is recorded in AOCI and subsequently reclassified into interest expense in the same period during which the hedged transaction affects earnings. Amounts reported in AOCI related to derivatives will be reclassified to interest expense as interest payments are made on the company's long-term debt.

The company's hedge portfolio did not contain any interest derivatives as of January 3, 2026.

As of December 28, 2024, the company's hedge portfolio contained interest derivatives, which are recorded in the following accounts with fair values measured as indicated (amounts in thousands):

	Level 1	Level 2	Level 3	Total
Assets:				
Other current assets	\$ —	\$ —	\$ —	\$ —
Other long-term assets	7,686	—	—	7,686
Total	\$ 7,686	\$ —	\$ —	\$ 7,686
Liabilities:				
Other current liabilities	\$ —	\$ —	\$ —	\$ —
Other long-term liabilities	—	—	—	—
Total	—	—	—	—
Net Fair Value	\$ 7,686	\$ —	\$ —	\$ 7,686

During the first quarter of Fiscal 2025, the company closed interest rate swaps previously entered into to protect the company against adverse fluctuations in interest rates with a cash settlement net receipt of \$4.2 million. These swaps were designated as a cash flow hedge and the deferred amount reported in AOCI is being reclassified to interest expense as interest payments are made on the notes through maturity date.

The company previously entered into treasury rate locks at the time we executed the 2026 notes and 2031 notes. These rate locks were designated as a cash flow hedge and the fair value at termination was deferred in AOCI. The deferred amount reported in AOCI is being reclassified to interest expense as interest payments are made on the related notes through the maturity date.

Derivative Assets and Liabilities

The company had the following derivative instruments recorded on the Consolidated Balance Sheets, all of which are utilized for the risk management purposes detailed above (amounts in thousands):

	Derivative Assets			
	January 3, 2026		December 28, 2024	
	Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value
Derivatives Designated as Hedging Instruments				
Commodity contracts	Other current assets	\$ 46	Other current assets	\$ 723
Interest rate contracts	Other long-term assets	—	Other long-term assets	7,686
Total		\$ 46		\$ 8,409
	Derivative Liabilities			
	January 3, 2026		December 28, 2024	
	Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value
Derivatives Designated as Hedging Instruments				
Commodity contracts	Other current liabilities	\$ 546	Other current liabilities	\$ 1,290
Commodity contracts	Other long-term liabilities	—	Other long-term liabilities	—
Total		\$ 546		\$ 1,290

Derivative AOCI transactions

The company had the following derivative instruments for deferred gains and (losses) on closed contracts and the effective portion for changes in fair value recorded in AOCI (no amounts were excluded from the effectiveness test), all of which are utilized for the risk management purposes detailed above (amounts in thousands and net of tax):

Derivatives in Cash Flow Hedging Relationships	Amount of Gain or (Loss) Recognized in OCI on Derivatives (Effective Portion) (Net of tax)		
	Fiscal 2025	Fiscal 2024	Fiscal 2023
Interest rate contracts	\$ 3,160	\$ 5,758	\$ —
Commodity contracts	(6,346)	(354)	(2,951)
Total	\$ (3,186)	\$ 5,404	\$ (2,951)

Derivatives in Cash Flow Hedging Relationships	Amount of Gain or (Loss) Reclassified from AOCI into Income (Effective Portion)(Net of tax)			Location of Gain or (Loss) Reclassified from AOCI into Income (Effective Portion)
	Fiscal 2025	Fiscal 2024	Fiscal 2023	
Interest rate contracts	\$ 646	\$ 374	\$ 373	Interest income (expense)
Commodity contracts	(613)	(1,094)	(2,188)	Production costs (1)
Total	\$ 33	\$ (720)	\$ (1,815)	

- (1) Included in Materials, supplies, labor and other production costs (exclusive of depreciation and amortization shown separately).

The balance (credit or (debit) balance) in AOCI related to commodity price risk and interest rate risk derivative transactions that are closed or will expire over the next year are as follows (amounts in thousands and net of tax) at January 3, 2026:

	Commodity Price Risk Derivatives	Interest Rate Risk Derivatives	Totals
Closed contracts	\$ (213)	\$ 4,456	\$ 4,243
Expiring in 2026	(377)	—	(377)
Total	\$ (590)	\$ 4,456	\$ 3,866

See Note 2, *Summary of Significant Accounting Policies*, for the accounting treatment of OCI for these hedged transactions.

Derivative transactions notional amounts

As of January 3, 2026, the company had entered into the following financial contracts to hedge commodity risks (amounts in thousands):

Derivatives in Cash Flow Hedging Relationships	Notional amount
Wheat contracts	\$ 10,274
Soybean oil contracts	11,460
Natural gas contracts	2,779
Corn contracts	1,402
Total	\$ 25,915

The company's derivative instruments contained no credit-risk-related contingent features at January 3, 2026. As of January 3, 2026 and December 28, 2024, the company had \$4.3 million and \$4.0 million, respectively, recorded in other current assets representing collateral to counterparties for hedged positions. As of January 3, 2026 and December 28, 2024, the company had \$2.1 million recorded in other accrued liabilities representing collateral from counterparties for hedged positions.

Note 12. Other Current and Non-Current Assets

Other current assets consist of (amounts in thousands):

	January 3, 2026	December 28, 2024
Prepaid assets	\$ 4,408	\$ 3,433
Prepaid insurance	7,868	6,911
Prepaid marketing	1,669	3,995
Service contracts	20,993	21,748
Fair value of derivative instruments	46	723
Collateral to counterparties for derivative positions	4,257	4,046
Income taxes receivable	25,749	12,712
Other	262	290
Total	<u>\$ 65,252</u>	<u>\$ 53,858</u>

Other non-current assets consist of (amounts in thousands):

	January 3, 2026	December 28, 2024
Unamortized financing fees	\$ 1,900	\$ 783
Investments	2,223	2,318
Investment in unconsolidated affiliate	1,481	1,481
Fair value of derivative instruments	—	7,686
Deposits	3,328	2,874
Noncurrent postretirement benefit plan asset	4,065	6,869
Other	320	96
Total	<u>\$ 13,317</u>	<u>\$ 22,107</u>

Note 13. Other Accrued Liabilities and Other Long-Term Liabilities

Other accrued liabilities consist of (amounts in thousands):

	January 3, 2026	December 28, 2024
Employee compensation	\$ 34,467	\$ 35,521
Employee vacation	19,431	19,595
Employee bonus	28,965	50,422
Restructuring-related accruals	750	86
Fair value of derivative instruments	546	1,290
Self-insurance reserves	37,166	34,392
Bank overdraft	3,635	14,459
Accrued interest	21,868	7,340
Accrued taxes	6,787	7,655
Accrued legal costs	1,762	4,032
Accrued advertising	5,435	2,978
Accrued legal settlements	—	1,697
Accrued short term deferred income	2,295	2,380
Accrued utilities	6,559	6,141
Collateral from counterparties for derivative positions	2,136	2,076
Short-term portion of acquisition consideration payable to seller	12,654	—
Repurchase obligations of distribution rights	—	18,965
Other	5,673	10,340
Total	<u>\$ 190,129</u>	<u>\$ 219,369</u>

The repurchase obligations of distribution rights was part of a legal settlement which required a phased repurchase of approximately 350 distribution territories. The company estimated the cost of these repurchases, and an additional 50 other California distribution territories that were not part of the settlement, in accordance with the settlement agreement and the amount was net of the remaining notes receivable balance. The repurchases began at the end of the first quarter of Fiscal 2024 and were completed during the second quarter of Fiscal 2025. See Note 23, *Commitments and Contingencies*, for details on this settlement.

Other long-term liabilities consist of (amounts in thousands):

	<u>January 3, 2026</u>	<u>December 28, 2024</u>
Deferred income	\$ 4,277	\$ 5,445
Deferred compensation	29,805	28,306
Other deferred credits	435	57
Acquisition consideration payable to seller	5,218	—
Other	2,066	2,069
Total	<u>\$ 41,801</u>	<u>\$ 35,877</u>

Note 14. Leases

Qualitative disclosures about our leases, including the significant policy elections, can be found in Note 2, *Summary of Significant Accounting Policies*. The quantitative disclosures are presented below.

Lease costs incurred by lease type, and/or type of payment for Fiscal 2025, 2024 and 2023 were as follows (in thousands):

	<u>Fiscal 2025</u>	<u>Fiscal 2024</u>	<u>Fiscal 2023</u>
Lease cost:			
Amortization of right-of-use assets	\$ 90	\$ 260	\$ 1,703
Interest on lease liabilities	12	4	32
Operating lease cost	91,969	74,183	62,685
Short-term lease cost	15,373	10,910	3,121
Variable lease cost	40,113	40,564	37,588
Total lease cost	<u>\$ 147,557</u>	<u>\$ 125,921</u>	<u>\$ 105,129</u>

Other supplemental quantitative disclosures as of, and for, Fiscal 2025 and Fiscal 2024 were as follows (in thousands):

	<u>Fiscal 2025</u>	<u>Fiscal 2024</u>
Cash paid for amounts included in the measurement of lease liabilities:		
Operating cash flows from financing leases	\$ 12	\$ 4
Operating cash flows from operating leases	\$ 98,702	\$ 75,610
Financing cash flows from financing leases	\$ 84	\$ 70
Right-of-use assets obtained in exchange for new financing lease liabilities	\$ 126	\$ 106
Right-of-use assets obtained in exchange for new operating lease liabilities	\$ 75,176	\$ 93,775
Weighted-average remaining lease term (years):		
Financing leases	3.6	3.0
Operating leases	5.6	6.2
Weighted-average IBR (percentage):		
Financing leases	4.9	4.2
Operating leases	5.2	5.0

Estimated undiscounted future lease payments under non-cancelable operating leases and financing leases, along with a reconciliation of the undiscounted cash flows to operating and financing lease liabilities, respectively, as of January 3, 2026 (in thousands) were as follows:

	Operating lease liabilities	Financing lease liabilities
2026	\$ 88,406	\$ 68
2027	79,837	71
2028	59,660	58
2029	42,043	52
2030	33,960	4
Thereafter	74,346	—
Total minimum lease payments	378,252	253
Less: amount of lease payments representing interest	(53,408)	(22)
Present value of future minimum lease payments	324,844	231
Less: current obligations under leases	(73,662)	(116)
Long-term lease obligations	\$ 251,182	\$ 115

The following table details lease modifications and renewals and lease impairments (amounts in thousands):

	Fiscal 2025	Fiscal 2024
Lease modifications and renewals	\$ 18,725	\$ 33,221
Lease terminations	\$ 2,776	\$ 1,963

The lease modifications and renewals for Fiscal 2025 include renewals of multiple warehouse leases and transportation equipment. For Fiscal 2024, the lease modifications and renewals include renewals of multiple warehouse leases.

Note 15. Debt and Other Commitments

Long-term debt, including capital lease obligations, consisted of the following at January 3, 2026 and December 28, 2024:

	Interest Rate at January 3, 2026	Final Maturity	January 3, 2026	December 28, 2024
			(Amounts in thousands)	
Unsecured previous credit facility			\$ —	\$ 2,200
Unsecured new credit facility	6.875%	2030	5,000	—
2026 notes	3.500%	2026	399,575	398,992
2031 notes	2.400%	2031	496,193	495,452
2035 notes	5.750%	2035	494,776	—
2055 notes	6.200%	2055	294,588	—
Accounts receivable repurchase facility	4.541%	2027	65,000	125,000
			1,755,132	1,021,644
Current maturities of long-term debt			(399,575)	—
Long-term debt			\$ 1,355,557	\$ 1,021,644

Bank overdrafts occur when checks have been issued but have not been presented to the bank for payment. Certain of our banks allow us to delay funding of issued checks until the checks are presented for payment. The delay in funding results in a temporary source of financing from the bank. The activity related to bank overdrafts is shown as a financing activity in our Consolidated Statements of Cash Flows. Bank overdrafts are included in other current liabilities on our Consolidated Balance Sheets. As of January 3, 2026 and December 28, 2024, the bank overdraft balance was \$3.6 million and \$14.5 million, respectively.

The company also had standby letters of credit (“LOCs”) outstanding of \$8.4 million at January 3, 2026 and December 28, 2024, which reduce the availability of funds under the senior unsecured revolving credit facility (the “credit facility”). The outstanding LOCs are for the benefit of certain insurance companies and lessors. None of the LOCs are recorded as a liability on the Consolidated Balance Sheets.

Senior Notes, Accounts Receivable Repurchase Facility, Credit Facility and Term Loan Facility

2055 Notes. On February 14, 2025, the company issued \$300.0 million of senior notes due 2055. The company pays semiannual interest on the 2055 notes on each March 15 and September 15 and the 2055 notes will mature on March 15, 2055. The notes bear interest at 6.200% per annum. Prior to September 15, 2054, the company may redeem the 2055 notes at its option, in whole or in part, at any time and from time to time, at the redemption prices described in the Officer's Certificate establishing the specific terms and form of the 2055 notes, plus accrued and unpaid interest thereon to, but excluding, the redemption date. On or after September 15, 2054, the company may redeem the 2055 notes at its option, in whole or in part, at any time and from time to time, at a redemption price equal to 100% of the principal amount of 2055 notes being redeemed plus accrued and unpaid interest thereon to, but excluding, the redemption date. If the company experiences a "change of control triggering event" (which involves a change of control of the company and the related rating of the notes below investment grade) with respect to the 2055 notes, the company will be required to make an offer to each holder of the 2055 notes to repurchase all or any part of such holder's 2055 notes at a purchase price equal to 101% of the aggregate principal amount of the 2055 notes plus unpaid interest, if any, accrued to, but excluding, the date of repurchase, unless the company has exercised its option to redeem the 2055 notes in whole. The 2055 notes are also subject to customary restrictive covenants for investment grade debt, including certain limitations on liens and sale and leaseback transactions.

The face value of the 2055 notes is \$300.0 million. There was a debt discount of \$2.0 million representing the difference between the net proceeds, after expenses, received upon issuance of debt and the amount repayable at its maturity. The company also paid issuance costs of \$3.6 million (including underwriting fees and other fees) on the 2055 notes. Debt issuance costs and the debt discount are being amortized to interest expense over the term of the 2055 notes. As of January 3, 2026, the company was in compliance with all restrictive covenants under the indenture governing the 2055 notes.

2035 Notes. On February 14, 2025, the company issued \$500.0 million of senior notes due 2035. The company pays semiannual interest on the 2035 notes on each March 15 and September 15 and the 2035 notes will mature on March 15, 2035. The notes bear interest at 5.750% per annum. Prior to December 15, 2034, the company may redeem the 2035 notes at its option, in whole or in part, at any time and from time to time, at the redemption prices described in the Officer's Certificate establishing the specific terms and form of the 2035 notes, plus accrued and unpaid interest thereon to, but excluding, the redemption date. On or after December 15, 2034, the company may redeem the 2035 notes at its option, in whole or in part, at any time and from time to time, at a redemption price equal to 100% of the principal amount of 2035 notes being redeemed plus accrued and unpaid interest thereon to, but excluding, the redemption date. If the company experiences a "change of control triggering event" (which involves a change of control of the company and the related rating of the notes below investment grade) with respect to the 2035 notes, the company will be required to make an offer to each holder of the 2035 notes to repurchase all or any part of such holder's 2035 notes at a purchase price equal to 101% of the aggregate principal amount of the 2035 notes plus unpaid interest, if any, accrued to, but excluding, the date of repurchase, unless the company has exercised its option to redeem the 2035 notes in whole. The 2035 notes are also subject to customary restrictive covenants for investment grade debt, including certain limitations on liens and sale and leaseback transactions.

The face value of the 2035 notes is \$500.0 million. There was a debt discount of \$0.9 million representing the difference between the net proceeds, after expenses, received upon issuance of debt and the amount repayable at its maturity. The company also paid issuance costs of \$4.8 million (including underwriting fees and other fees) on the 2035 notes. Debt issuance costs and the debt discount are being amortized to interest expense over the term of the 2035 notes. As of January 3, 2026, the company was in compliance with all restrictive covenants under the indenture governing the 2035 notes.

2031 Notes. On March 9, 2021, the company issued \$500.0 million of senior notes. The company will pay semiannual interest on the 2031 notes on each March 15 and September 15 and the 2031 notes will mature on March 15, 2031. The notes bear interest at 2.400% per annum. On any date prior to December 15, 2030, the company may redeem some or all of the notes at a price equal to the greater of (1) 100% of the principal amount of the notes redeemed and (2) a "make-whole" amount plus, in each case, accrued and unpaid interest. The make-whole amount is equal to the sum of the present values of the remaining scheduled payments of principal and interest on the 2031 notes to be redeemed that would be due if such notes matured December 15, 2030 (exclusive of interest accrued to, but not including, the date of redemption), discounted to the date of redemption on a semi-annual basis (assuming a 360-day year consisting of twelve 30-day months) at a rate equal to the sum of the applicable treasury rate (as defined in the indenture governing the notes), plus 20 basis points, plus, in each case, accrued and unpaid interest. At any time on or after December 15, 2030, the company may redeem some or all of the 2031 notes at a price equal to 100% of the principal amount of the notes redeemed plus accrued and unpaid interest. If the company experiences a "change of control triggering event" (which involves a change of control of the company and the related rating of the notes below investment grade), it is required to offer to purchase the notes at a purchase price equal to 101% of the principal amount, plus accrued and unpaid interest thereon unless the company has exercised its option to redeem the notes in whole. The 2031 notes are also subject to customary restrictive covenants for investment grade debt, including certain limitations on liens and sale and leaseback transactions.

The face value of the 2031 notes is \$500.0 million. There was a debt discount of \$2.4 million representing the difference between the net proceeds, after expenses, received upon issuance of debt and the amount repayable at its maturity. The company also paid issuance costs of \$4.8 million (including underwriting fees and other fees) on the 2031 notes. Debt issuance costs and the debt discount are being amortized to interest expense over the term of the 2031 notes. As of January 3, 2026, the company was in compliance with all restrictive covenants under the indenture governing the 2031 notes.

2026 Notes. On September 28, 2016, the company issued \$400.0 million of senior notes. The company will pay semiannual interest on the 2026 notes on each April 1 and October 1, beginning on April 1, 2017, and the 2026 notes will mature on October 1, 2026. The notes bear interest at 3.500% per annum. The 2026 notes are subject to interest rate adjustments if either Moody's or S&P downgrades (or downgrades and subsequently upgrades) the credit rating assigned to the 2026 notes. On any date prior to July 1, 2026, the company may redeem some or all of the notes at a price equal to the greater of (1) 100% of the principal amount of the notes redeemed and (2) a "make-whole" amount plus, in each case, accrued and unpaid interest. The make-whole amount is equal to the sum of the present values of the remaining scheduled payments of principal and interest on the 2026 notes to be redeemed that would be due if such notes matured July 1, 2026 (exclusive of interest accrued to, but not including, the date of redemption), discounted to the date of redemption on a semi-annual basis (assuming a 360-day year consisting of twelve 30-day months) at the treasury rate (as defined in the indenture governing the notes), plus 30 basis points, plus in each case accrued and unpaid interest. At any time on or after July 1, 2026, the company may redeem some or all of the 2026 notes at a price equal to 100% of the principal amount of the notes redeemed plus accrued and unpaid interest. If the company experiences a "change of control triggering event" (which involves a change of control of the company and related rating of the notes below investment grade), it is required to offer to purchase the notes at a purchase price equal to 101% of the principal amount, plus accrued and unpaid interest thereon unless the company exercised its option to redeem the notes in whole. The 2026 notes are also subject to customary restrictive covenants, including certain limitations on liens and sale and leaseback transactions.

The face value of the 2026 notes is \$400.0 million. There was a debt discount of \$2.1 million representing the difference between the net proceeds, after expenses, received upon issuance of debt and the amount repayable at its maturity. The company also paid issuance costs of \$3.6 million (including underwriting fees and other fees) on the 2026 notes. Debt issuance costs and the debt discount are being amortized to interest expense over the term of the 2026 notes. As of January 3, 2026, the company was in compliance with all restrictive covenants under the indenture governing the 2026 notes.

As of January 3, 2026, the 2026 notes are classified within the current maturities of long-term debt as they mature in less than one year.

Accounts Receivable Repurchase Facility. On April 14, 2023, the company terminated the accounts receivable securitization facility (the "securitization facility") and entered into a two-year \$200.0 million accounts receivable repurchase facility (the "repurchase facility"). On April 14, 2025, the company entered into Amendment No. 2 to the Master Framework Agreement to amend the repurchase facility and extend the scheduled facility expiration date from April 14, 2026 to April 14, 2027. In addition, the amendment added a provision that permits the company to request up to \$50.0 million in additional commitment, for a total of up to \$250.0 million, subject to the satisfaction of certain customary conditions of the facility. Under the repurchase facility, certain subsidiaries of the company sell or distribute, on an ongoing basis, substantially all of their trade receivables to the company. The company may at its option onward sell all of its qualifying receivables to the funding parties under the repurchase facility with an agreement to repurchase the receivables on a monthly basis for a repurchase price equal to the purchase price paid and an interest component based on Term SOFR (as defined below) plus a margin. There is an unused fee applicable on the daily unused portion of the repurchase facility. The repurchase facility contains certain customary representations and warranties, affirmative and negative covenants, and events of default. Financing costs paid at inception of the repurchase facility are being amortized over the life of the repurchase facility. The company incurred \$0.2 million in financing costs during the first quarter of Fiscal 2024 related to the amendment and \$0.8 million in financing costs at inception during the first quarter of Fiscal 2023. The balance of unamortized financing costs was \$0.3 million on January 3, 2026 and December 28, 2024, and is recorded in other assets on the Consolidated Balance Sheets. As of January 3, 2026, the company was in compliance with all restrictive covenants under the repurchase facility.

The table below presents the borrowings and repayments under the repurchase facility during Fiscal 2025:

	Amount (thousands)
Balance as of December 28, 2024	\$ 125,000
Borrowings	140,000
Payments	(200,000)
Balance as of January 3, 2026	<u>\$ 65,000</u>

The table below presents the net amount available for working capital and general corporate purposes under the repurchase facility as of January 3, 2026:

	<u>Amount (thousands)</u>
Gross amount available	\$ 200,000
Outstanding	(65,000)
Available for withdrawal	<u>\$ 135,000</u>

Amounts available for withdrawal under the repurchase facility are determined as the lesser of the total repurchase facility limit and a formula derived amount based on qualifying trade receivables. The table below presents the highest and lowest outstanding balance under the repurchase facility during Fiscal 2025:

	<u>Amount (thousands)</u>
High balance	\$ 155,000
Low balance	\$ 50,000

Accounts Receivable Securitization Facility. On July 17, 2013, the company entered into the securitization facility. The company had previously amended the securitization facility 11 times since execution and most recently on February 13, 2023. On April 14, 2023, the company terminated the securitization facility with no outstanding borrowings and recognized a charge of \$0.3 million to write-off the unamortized loan costs upon the early extinguishment of the securitization facility.

Previous Credit Facility. The company was party to an amended and restated credit agreement, dated as of October 24, 2003, with the lenders party thereto and Deutsche Bank Trust Company Americas, as administrative agent, (as amended, restated, modified or supplemented from time to time, the “amended and restated credit agreement”). The company has amended the amended and restated credit agreement eight times since execution, most recently on April 12, 2023 (the “eighth amendment”). Under the amended and restated credit agreement, our previous credit facility was a five-year, \$500.0 million senior unsecured revolving loan facility with the following terms and conditions: (i) a maturity date of July 30, 2026; (ii) an applicable margin for revolving loans maintained as (1) base rate loans and swingline loans with a range of 0.00% to 0.525% and (2) SOFR loans with a range of 0.815% to 1.525%, in each case, based on the more favorable (to the company) of (x) the leverage ratio of the company and its subsidiaries and (y) the company’s debt rating; (iii) an applicable facility fee with a range of 0.06% to 0.225%, due quarterly on all commitments under the amended and restated credit agreement, based on the more favorable (to the company) of (x) the leverage ratio of the company and its subsidiaries and (y) the company’s debt rating; and (iv) a maximum leverage ratio covenant set at 3.75 to 1.00, which permitted the company, at its option, in connection with certain acquisitions and investments and subject to the terms and conditions provided in the amended and restated credit agreement, to increase the maximum ratio permitted thereunder on one or more occasions to 4.00 to 1.00 for a period of four consecutive fiscal quarters, including and/or immediately following the fiscal quarter in which such acquisitions or investments were completed (a covenant holiday), provided that each additional covenant holiday will not be available to the company until it has achieved and maintained a leverage ratio of at least 3.75 to 1.00 for at least two fiscal quarters. Additionally, the eighth amendment replaced the benchmark rate at which borrowings under the amended and restated credit agreement bear interest from LIBOR to the forward-looking SOFR term rate administered by CME Group Benchmark Administration Limited (“Term SOFR”). As a result of these amendments and with respect to SOFR Loans, we could borrow at Term SOFR, plus a credit spread adjustment of 0.10% subject to a floor of zero.

In addition, the previous credit facility contained a provision that permitted the company to request up to \$200.0 million in additional revolving commitments, for a total of up to \$700.0 million, subject to the satisfaction of certain conditions. Proceeds from the previous credit facility could be used for working capital and general corporate purposes, including capital expenditures, acquisition financing, refinancing of indebtedness, dividends and share repurchases. The previous credit facility included certain customary restrictions, which, among other things, required maintenance of financial covenants and limited encumbrance of assets and creation of indebtedness. Restrictive financial covenants included such ratios as a minimum interest coverage ratio and a maximum leverage ratio.

New Credit Facility. On February 5, 2025, the company entered into a credit agreement, with the lenders party thereto and Wells Fargo Bank, National Association, as administrative agent, (as amended, restated, modified or supplemented from time to time, the “new credit agreement”). The new credit agreement refinanced and replaced the amended and restated credit agreement. Under the new credit agreement, our new credit facility is a five-year, \$500.0 million senior unsecured revolving loan facility with the following terms and conditions: (i) a maturity date of February 5, 2030; (ii) an applicable margin for revolving loans maintained as (1) base rate loans and swingline loans with a range of 0.00% to 0.525% and (2) SOFR loans with a range of 0.815% to 1.525%, in each case, based on the more favorable (to the company) of (x) the leverage ratio of the company and its subsidiaries and (y) the company’s debt rating; (iii) an applicable facility fee with a range of 0.06% to 0.225%, due quarterly on all commitments under the new credit agreement, based on the more favorable (to the company) of (x) the leverage ratio of the company and its subsidiaries and (y) the

company's debt rating; and (iv) a maximum leverage ratio covenant set at 3.75 to 1.00, which permits the company, at its option, in connection with certain acquisitions and investments and subject to the terms and conditions provided in the new credit agreement, to increase the maximum ratio permitted thereunder on one or more occasions to 4.00 to 1.00 for a period of four consecutive fiscal quarters, including and/or immediately following the fiscal quarter in which such acquisitions or investments were completed (the "covenant holiday"), provided that each additional covenant holiday will not be available to the company until it has achieved and maintained a leverage ratio of at least 3.75 to 1.00 for at least two fiscal quarters. Subsequent to the acquisition of Simple Mills, the company exercised the covenant holiday, increasing the maximum leverage ratio covenant level from 3.75 to 1.00 to 4.00 to 1.00 for the four consecutive fiscal quarters through and including the first quarter of 2026.

In addition, the new credit facility contains a provision that permits the company to request up to \$200.0 million in additional revolving commitments, for a total of up to \$700.0 million, subject to the satisfaction of certain conditions. Proceeds from the new credit facility may be used for working capital and general corporate purposes, including capital expenditures, acquisition financing, refinancing of indebtedness, dividends and share repurchases. The new credit facility includes certain customary restrictions, which, among other things, requires maintenance of financial covenants and limits encumbrance of assets and creation of indebtedness. Restrictive financial covenants include such ratios as a minimum interest coverage ratio and a maximum leverage ratio.

The company believes that, given its current cash position, its cash flow from operating activities and its available credit capacity, it can comply with the current terms of the new credit facility and can meet its presently foreseeable financial requirements. As of January 3, 2026, the company was in compliance with all restrictive covenants under the new credit facility.

Financing costs paid at inception of the new credit facility and at the time amendments are executed are being amortized over the life of the new credit facility. The company incurred additional financing costs of \$1.5 million during the first quarter of Fiscal 2025 for the new credit facility. The balance of unamortized financing costs was \$1.6 million and \$0.5 million on January 3, 2026 and December 28, 2024, respectively, and is recorded in other assets on the Consolidated Balance Sheets.

Amounts outstanding under the new credit facility can vary daily. Changes in the gross borrowings and repayments can be caused by cash flow activity from operations, capital expenditures, acquisitions, dividends, share repurchases, and tax payments, as well as derivative transactions, which are part of the company's overall risk management strategy as discussed in Note 11, *Derivative Financial Instruments*. The table below presents the borrowings and repayments under the previous credit facility for the period up to February 5, 2025, and the new credit facility, for the period on and from February 5, 2025 to January 3, 2026:

	<u>Amount (thousands)</u>
Balance as of December 28, 2024	\$ 2,200
Borrowings	69,100
Payments	(66,300)
Balance as of January 3, 2026	<u>\$ 5,000</u>

The table below presents the net amount available under the new credit facility as of January 3, 2026:

	<u>Amount (thousands)</u>
Gross amount available	\$ 500,000
Outstanding	(5,000)
Letters of credit	(8,400)
Available for withdrawal	<u>\$ 486,600</u>

The table below presents the highest and lowest outstanding balance under the previous credit facility for the period up to February 5, 2025, and the new credit facility, for the period on and from February 5, 2025 to January 3, 2026:

	<u>Amount (thousands)</u>
High balance	\$ 18,600
Low balance	\$ —

Aggregate debt maturities. Aggregate maturities of debt outstanding as of January 3, 2026, are as follows (excluding unamortized debt discount and issuance costs) (amounts in thousands):

2026	\$	400,000
2027		65,000
2028		—
2029		—
2030		5,000
Thereafter		1,300,000
Total	\$	<u>1,770,000</u>

Debt issuance costs and debt discount. The table below reconciles the debt issuance costs and debt discounts to the net carrying value of each of our debt obligations (excluding line-of-credit arrangements) at January 3, 2026 (amounts in thousands):

	<u>Face Value</u>	<u>Debt issuance costs and debt discount</u>	<u>Net carrying value</u>
2026 notes	\$ 400,000	\$ 425	\$ 399,575
2031 notes	\$ 500,000	\$ 3,807	\$ 496,193
2035 notes	\$ 500,000	\$ 5,224	\$ 494,776
2055 notes	300,000	5,412	294,588
Total	\$ 1,700,000	\$ 14,868	\$ 1,685,132

The table below reconciles the debt issuance costs and debt discounts to the net carrying value of each of our debt obligations (excluding line-of-credit arrangements) at December 28, 2024 (amounts in thousands):

	<u>Face Value</u>	<u>Debt issuance costs and debt discount</u>	<u>Net carrying value</u>
2031 notes	\$ 500,000	\$ 4,548	\$ 495,452
2026 notes	400,000	1,008	398,992
Total	\$ 900,000	\$ 5,556	\$ 894,444

Deferred Compensation

The Executive Deferred Compensation Plan (“EDCP”) consists of unsecured general obligations of the company to pay the deferred compensation of, and our contributions to, participants in the EDCP. The obligations will rank equally with our other unsecured and unsubordinated indebtedness payable from the company’s general assets.

The company’s directors and certain key members of management are eligible to participate in the EDCP. Directors may elect to defer all or any portion of their annual retainer fee and meeting fees. Deferral elections by directors must be made prior to the beginning of each year and are thereafter irrevocable. Eligible employees could elect to defer up to 75% of their base salaries, and up to 100% of any cash bonuses and other compensation through December 31, 2015. Effective January 1, 2016, employees may elect to defer up to 75% of their base salaries, any cash bonuses, and other compensation. Deferral elections by eligible executives must be made prior to the beginning of each year and are thereafter irrevocable during that year. The portion of the participant’s compensation that is deferred depends on the participant’s election in effect with respect to his or her elective contributions under the EDCP.

The amounts outstanding at January 3, 2026 and December 28, 2024 were as follows (amounts in thousands):

	<u>January 3, 2026</u>	<u>December 28, 2024</u>
Deferral elections outstanding	\$ 32,197	\$ 29,996
Current portion of deferral elections	(2,392)	(1,690)
Long-term portion of deferral elections	<u>\$ 29,805</u>	<u>\$ 28,306</u>

The current portion of deferral elections is included in the other accrued liabilities on the Consolidated Balance Sheets. The long-term portion of deferral elections is included in the other long-term liabilities on the Consolidated Balance Sheets.

Guarantees and Indemnification Obligations

The company has provided various representations, warranties, and other standard indemnifications in various agreements with customers, suppliers, and other parties as well as in agreements to sell business assets or lease facilities. In general, these provisions indemnify the counterparty for matters such as breaches of representations and warranties, certain environmental conditions and tax matters, and, in the context of sales of business assets, any liabilities arising prior to the closing of the transactions. Non-performance under a contract could trigger an obligation of the company. The ultimate effect on future financial results is not subject to reasonable estimation because considerable uncertainty exists as to the final outcome of any potential claims.

No material guarantees or indemnifications have been entered into by the company through January 3, 2026.

Note 16. Variable Interest Entities

Distribution rights agreement VIE analysis

The incorporated IDPs qualify as VIEs. The IDPs who are formed as sole proprietorships are excluded from the following VIE accounting analysis and discussion.

Incorporated IDPs acquire distribution rights and enter into a contract with the company to sell the company's products in the IDPs' defined geographic territory. The incorporated IDPs have the option to finance the acquisition of their distribution rights with the company. They can also pay cash or obtain external financing at the time they acquire the distribution rights. The combination of the company's loans to the incorporated IDPs and the ongoing distributor arrangements with the incorporated IDPs provide a level of funding to the equity owners of the various incorporated IDPs that would not otherwise be available. As of January 3, 2026 and December 28, 2024, there was \$122.2 million and \$120.6 million, respectively, in gross distribution rights notes receivable outstanding from incorporated IDPs.

The company is not considered to be the primary beneficiary of the VIEs because the company does not (i) have the ability to direct the significant activities of the VIEs that would affect their ability to operate their respective businesses and (ii) provide any implicit or explicit guarantees or other financial support to the VIEs, other than the financing described above, for specific return or performance benchmarks. The activities controlled by the incorporated IDPs that are deemed to most significantly impact the ultimate success of the incorporated IDP entities relate to those decisions inherent in operating the distribution business in the territory, including acquiring trucks and trailers, managing fuel costs, employee matters and other strategic decisions. In addition, we do not provide, nor do we intend to provide, financial or other support to the IDP. The IDPs are responsible for the operations of their respective territories.

The company's maximum contractual exposure to loss for the incorporated IDP relates to the distributor rights note receivable for the portion of the territory the incorporated IDPs financed at the time they acquired the distribution rights. The incorporated IDPs remit payment on their distributor rights note receivable each week during the settlement process of their weekly activity. The company will operate a territory on behalf of an incorporated IDP in situations where the IDP has abandoned its distribution rights. Any remaining balance outstanding on the distribution rights notes receivable is relieved once the distribution rights have been sold on the IDPs behalf. The company's collateral from the territory distribution rights mitigates the potential losses.

Note 17. Fair Value of Financial Instruments

The carrying value of cash and cash equivalents and accounts receivable approximates fair value because of the short-term maturity of the instruments. Notes receivable are entered into in connection with the purchase of distribution rights by IDPs. These notes receivable are recorded in the Consolidated Balance Sheets at carrying value, which represents the closest approximation of fair value. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. As a result, the appropriate interest rate that should be used to estimate the fair value of the distribution rights notes is the prevailing market rate at which similar loans would be made to IDPs with similar credit ratings and for the same maturities. However, the company financed approximately 2,500 and 2,600 IDPs' distribution rights as of January 3, 2026 and December 28, 2024, respectively, all with varied financial histories and credit risks. Considering the diversity of credit risks among the IDPs, the company has no method to accurately determine a market interest rate to apply to the notes. The distribution rights are generally financed for up to ten years and the distribution rights notes are collateralized by the IDPs' distribution rights. The company maintains a wholly-owned subsidiary to assist in financing the distribution rights purchase activities if requested by new IDPs, using the distribution rights and certain associated assets as collateral. These notes receivable earn interest at a fixed rate.

At January 3, 2026 and December 28, 2024, respectively, the carrying value of the distribution rights notes receivable was as follows (amounts in thousands):

	<u>January 3, 2026</u>	<u>December 28, 2024</u>
Distribution rights notes receivable	\$ 130,723	\$ 128,199
Current portion recorded in accounts and notes receivable, net	(22,241)	(20,117)
Long-term portion of distribution rights notes receivable	<u>\$ 108,482</u>	<u>\$ 108,082</u>

The distributor notes receivable balance included no reserve as of January 3, 2026 and \$2.4 million as of December 28, 2024 related to a legal settlement. See Note 23, *Commitments and Contingencies*, for additional information.

The fair value of the company's variable rate debt at January 3, 2026 approximates the recorded value. The fair value of the company's notes, as discussed in Note 15, *Debt and Other Commitments*, are estimated using yields obtained from independent pricing sources for similar types of borrowing arrangements and are considered a Level 2 valuation. The fair value of the notes are presented in the table below (amounts in thousands, except level classification):

	<u>Carrying Value</u>	<u>Fair Value</u>	<u>Level</u>
2026 notes	\$ 399,575	\$ 397,990	2
2031 notes	\$ 496,193	\$ 453,628	2
2035 notes	\$ 494,776	\$ 500,553	2
2055 notes	\$ 294,588	\$ 280,772	2

For fair value disclosure information about our derivative assets and liabilities see Note 11, *Derivative Financial Instruments*. For fair value disclosure information about our pension plan net assets see Note 21, *Postretirement Plans*.

Note 18. Stockholders' Equity

Flowers Foods' articles of incorporation provide that its authorized capital consist of 500,000,000 shares of common stock having a par value of \$0.01 per share and 1,000,000 shares of preferred stock. The preferred stock of which (a) 200,000 shares have been designated by the Board of Directors as Series A Junior Participating Preferred Stock, having a par value per share of \$100 and (b) 800,000 shares of preferred stock, having a par value per share of \$0.01, have not been designated by the Board of Directors. No shares of preferred stock have been issued by Flowers Foods.

Common Stock

The holders of Flowers Foods common stock are entitled to one vote for each share held of record on all matters submitted to a vote of shareholders. Subject to preferential rights of any issued and outstanding preferred stock, including the Series A Preferred Stock, holders of common stock are entitled to receive ratably such dividends, if any, as may be declared by the Board of Directors of the company out of funds legally available. In the event of a liquidation, dissolution, or winding-up of the company, holders of common stock are entitled to share ratably in all assets of the company, if any, remaining after payment of liabilities and the liquidation preferences of any issued and outstanding preferred stock, including the Series A Preferred Stock. Holders of common stock have no preemptive rights, no cumulative voting rights, and no rights to convert their shares of common stock into any other securities of the company or any other person.

Preferred Stock

The Board of Directors has the authority to issue up to 1,000,000 shares of preferred stock in one or more series and to fix the designations, relative powers, preferences, rights, qualifications, limitations, and restrictions of all shares of each such series, including without limitation, dividend rates, conversion rights, voting rights, redemption and sinking fund provisions, liquidation preferences, and the number of shares constituting each such series, without any further vote or action by the holders of our common stock. Although the Board of Directors does not presently intend to do so, it could issue shares of preferred stock, with rights that could adversely affect the voting power and other rights of holders of our common stock without obtaining the approval of our shareholders. In addition, the issuance of preferred shares could delay or prevent a change in control of the company without further action by our shareholders.

Stock Repurchase Plan

Previously, our Board of Directors had approved a Stock Repurchase Plan ("SRP") (on December 19, 2002) that authorized share repurchases of up to 74.6 million shares of the company's common stock. On May 26, 2022, the company announced that the Board of Directors increased the company's share repurchase authorization by 20.0 million shares. As of January 3, 2026, 21.3 million shares remained available for repurchase under the existing authorization. Under the plan, the company may repurchase its common stock in open market or privately negotiated transactions or under an accelerated repurchase program at such times and at such prices as determined to be in the company's best interest.

The table below presents the shares repurchased under the SRP during our Fiscal 2025 (amounts in thousands except shares purchased):

Fiscal 2025 Quarter	Total Number of Shares Purchased	Total Cost of Shares Purchased
For the quarter ended April 19, 2025	286,980	\$ 5,499
For the quarter ended July 12, 2025	—	\$ —
For the quarter ended October 4, 2025	—	\$ —
For the quarter ended January 3, 2026	—	\$ —
Total	<u>286,980</u>	<u>\$ 5,499</u>

As of January 3, 2026, 73.3 million shares at a cost of \$761.5 million have been purchased since the inception of the SRP.

Dividends

During Fiscal 2025, 2024, and 2023, the company paid the following dividends, excluding dividends on vested stock-based compensation awards discussed in Note 19, *Stock-Based Compensation*, below (amounts in thousands except per share data):

	Dividends paid	Dividends paid per share
Fiscal 2025	\$ 207,471	\$ 0.9825
Fiscal 2024	\$ 200,334	\$ 0.9500
Fiscal 2023	\$ 192,435	\$ 0.9100

Note 19. Stock-Based Compensation

On March 5, 2014, our Board of Directors approved and adopted the 2014 Omnibus Equity and Incentive Compensation Plan ("Omnibus Plan"). The Omnibus Plan was approved by our shareholders on May 21, 2014 and authorized 8,000,000 shares to be used for awards under the Omnibus Plan. The Omnibus Plan authorizes the compensation committee of the Board of Directors to provide equity-based compensation in the form of stock options, stock appreciation rights, restricted stock, restricted stock units, performance shares, performance units, dividend equivalents and other awards to provide our officers, key employees, and non-employee directors' incentives and rewards for performance. The Omnibus Plan replaced the Flowers Foods' 2001 Equity and Performance Incentive Plan, as amended and restated as of April 1, 2009 ("EPIP"), the Stock Appreciation Rights Plan, and the Annual Executive Bonus Plan. All outstanding equity awards that were made under the EPIP will continue to be governed by the EPIP; however, all equity awards granted after May 21, 2014 are governed by the Omnibus Plan. No additional awards will be issued under the EPIP. On May 25, 2023, the company amended and restated the Omnibus Plan to register an additional 9,340,000 shares.

The following is a summary of restricted stock and deferred stock outstanding under the plans described above. Information relating to the company's stock appreciation rights, which were issued under a separate stock appreciation right plan, is also described below.

Performance-Contingent Restricted Stock Awards

Performance-Contingent Total Shareholder Return Shares (“TSR Shares”)

Since 2012, certain key employees have been granted performance-contingent restricted stock under the EPIP and the Omnibus Plan in the form of TSR Shares. Awards granted since the beginning of Fiscal 2019 vest approximately three years from the date of grant (after the filing of the company’s Annual Report on Form 10-K). These shares become non-forfeitable if, and to the extent that, on that date the vesting conditions are satisfied. The total shareholder return (“TSR”) is the percent change in the company’s stock price over the measurement period plus the dividends paid to shareholders. The performance payout is calculated at the end of each of the last four quarters (averaged) in the measurement period. Once the TSR is determined for the company (“Company TSR”), it is compared to the TSR of our food company peers (“Peer Group TSR”). The Company TSR compared to the Peer Group TSR will determine the payout as set forth below (the “TSR Modifier”):

Percentile	Payout as % of Target
90 th	200%
70 th	150%
50 th	100%
30 th	50%
Below 30 th	0%

For performance between the levels described above, the degree of vesting is interpolated on a linear basis. The table below presents the payout percentage for vested TSR awards:

Award	Fiscal year vested	Payout (%)
2022 award	Fiscal 2025	13%
2021 award	Fiscal 2024	128%
2020 award	Fiscal 2023	148%

The TSR Shares vest immediately if the grantee dies or becomes disabled. For awards granted subsequent to Fiscal 2023, if the grantee retires after attaining at least age 55, provided that the sum of the grantee's age plus years of service is an amount equal to or greater than 65, on the normal vesting date the grantee will receive a pro-rated number of shares based upon the retirement date and measured at the actual performance for the entire performance period. For awards granted prior to Fiscal 2024, if the grantee retires at age 65 (or age 55 with at least 10 years of service with the company) or later, on the normal vesting date the grantee will receive a pro-rated number of shares based upon the retirement date and measured at the actual performance for the entire performance period. In addition, if the company undergoes a change in control, the TSR Shares will immediately vest at the target level, provided that if 12 months of the performance period have been completed, vesting will be determined based on Company TSR as of the date of the change in control without application of four-quarter averaging. During the vesting period, the grantee has none of the rights of a shareholder. Dividends declared during the vesting period will accrue and will be paid at vesting on the TSR Shares that ultimately vest. The fair value estimate was determined using a *Monte Carlo* simulation model, which utilizes multiple input variables to estimate the probability of the company achieving the market condition discussed above. Inputs into the model included the following for the company and comparator companies: (i) TSR from the beginning of the performance cycle through the measurement date; (ii) volatility; (iii) risk-free interest rates; and (iv) the correlation of the comparator companies’ TSR. The inputs are based on historical capital market data. The 2023 TSR award is expected to payout at approximately 13%.

The following performance-contingent TSR Shares have been granted under the Omnibus Plan and have service period remaining (amounts in thousands, except price data):

Grant Date	Shares Granted	Vesting Date	Fair Value per Share
1/1/2023	338	3/1/2026	\$ 33.52
4/23/2023	9	3/1/2026	\$ 26.11
9/1/2023	25	3/1/2026	\$ 23.04
10/8/2023	40	3/1/2026	\$ 21.43
12/31/2023	272	2/28/2027	\$ 26.07
12/29/2024	303	2/29/2028	\$ 24.63

As of January 3, 2026, there was \$7.4 million of total unrecognized compensation cost related to nonvested TSR Shares granted under the Omnibus Plan. That cost is expected to be recognized over a weighted-average period of 1.66 years.

Performance-Contingent Return on Invested Capital Shares (“ROIC Shares”)

Certain key employees have been granted performance-contingent restricted stock under the Omnibus Plan in the form of ROIC Shares. The awards generally vest approximately three years from the date of grant (after the filing of the company’s Annual Report on Form 10-K), and the shares become nonforfeitable if, and to the extent that, on that date, the vesting conditions are satisfied. Return on Invested Capital (“ROIC”) is calculated by dividing our profit, as defined, by the invested capital. Generally, the performance condition requires the company’s average ROIC to exceed its average weighted cost of capital (“WACC”) by between 1.50 to 4.50 percentage points for the Fiscal 2025 and 2024 awards and 1.75 to 4.75 percentage points for the Fiscal 2023 award (the “ROI Target”) over the three fiscal year performance period. If the lowest ROI Target is not met, the awards are forfeited. The ROIC Shares can be earned based on the ranges of target as defined below:

Difference of ROIC minus WACC	2024 and 2025 Award
Less than 150 basis points	0%
150 basis points	50%
300 basis points	100%
450+ basis points	150%

Difference of ROIC minus WACC	2023 Award
Less than 175 basis points	0%
175 basis points	50%
375 basis points	100%
475+ basis points	125%

For performance between the levels described above, the degree of vesting is interpolated on a linear basis. The table below presents the payout percentage for vested ROIC awards:

Award	Fiscal year vested	Payout (%)
2022 award	Fiscal 2025	125%
2021 award	Fiscal 2024	125%
2020 award	Fiscal 2023	125%

The ROIC Shares vest immediately if the grantee dies or becomes disabled. For awards granted subsequent to Fiscal 2023, if the grantee retires after attaining at least age 55, provided that the sum of the grantee's age plus years of service is an amount equal to or greater than 65, on the normal vesting date the grantee will receive a pro-rated number of shares based upon the retirement date and measured at the actual performance for the entire performance period. For awards granted prior to Fiscal 2024, if the grantee retires at age 65 (or age 55 with at least 10 years of service with the company) or later, on the normal vesting date the grantee will receive a pro-rated number of ROIC Shares based upon the retirement date and actual performance for the entire performance period. In addition, if the company undergoes a change in control, the ROIC Shares will immediately vest at the target level. During the vesting period, the grantee has none of the rights of a shareholder. Dividends declared during the vesting period will accrue and will be paid at vesting on the ROIC Shares that ultimately vest. The fair value of this type of award is equal to the stock price on the grant date. Since these awards have a performance condition feature, the expense associated with these awards may change depending on the expected ROI Target attained at each reporting period. The 2023 award is being expensed at our current estimated payout percentage of 125% of ROI Target, and the 2024 and 2025 awards are being expensed at 100%.

The following performance-contingent ROIC Shares have been granted under the Omnibus Plan and have service period remaining (amounts in thousands, except price data):

Grant Date	Shares Granted	Vesting Date	Fair Value per Share
1/1/2023	338	3/1/2026	\$ 28.74
4/23/2023	9	3/1/2026	\$ 26.11
9/1/2023	25	3/1/2026	\$ 23.04
10/8/2023	40	3/1/2026	\$ 21.43
12/31/2023	272	2/28/2027	\$ 22.51
12/29/2024	303	2/29/2028	\$ 20.47

As of January 3, 2026, there was \$6.4 million of total unrecognized compensation cost related to nonvested ROIC Shares granted under the Omnibus Plan. This cost is expected to be recognized over a weighted-average period of 1.66 years.

Performance-Contingent Restricted Stock Summary

The table below presents the TSR Modifier share adjustment, ROIC Modifier share adjustment, accumulated dividends on vested shares, and the tax windfall/shortfall at vesting of the performance-contingent restricted stock awards (amounts in thousands except for share data):

<u>Award granted</u>	<u>Fiscal year vested</u>	<u>TSR Modifier increase shares</u>	<u>ROIC Modifier increase shares</u>	<u>Dividends at vesting (thousands)</u>	<u>Tax (expense) benefit</u>	<u>Fair value at vesting</u>
2022	2025	—	71,539	\$ 1,150	\$ (2,630)	\$ 7,475
2021	2024	92,775	83,835	\$ 2,173	\$ 286	\$ 19,419
2020	2023	151,513	78,893	\$ 2,154	\$ 1,424	\$ 24,652

A summary of the status of all of the company's nonvested shares for performance-contingent restricted stock (including the TSR Shares and the ROIC Shares) for Fiscal 2025, 2024, and 2023 is set forth below (amounts in thousands, except price data):

	<u>Fiscal 2025</u>		<u>Fiscal 2024</u>		<u>Fiscal 2023</u>	
	<u>Number of Shares</u>	<u>Weighted Average Fair Value</u>	<u>Number of Shares</u>	<u>Weighted Average Fair Value</u>	<u>Number of Shares</u>	<u>Weighted Average Fair Value</u>
Balance at beginning of year	1,835	\$ 27.85	2,017	\$ 27.70	2,009	\$ 25.83
Initial grant	606	\$ 22.55	544	\$ 24.29	824	\$ 29.37
Vested	(412)	\$ 27.78	(846)	\$ 24.40	(868)	\$ 23.51
Grant increase for achieving the ROIC modifier	72	\$ 22.55	84	\$ 22.51	79	\$ 29.37
Grant increase for achieving the TSR modifier	—	\$ —	93	\$ 26.07	152	\$ 29.37
Forfeitures	(380)	\$ 29.29	(57)	\$ 27.94	(179)	\$ 27.80
Balance at end of year	<u>1,721</u>	<u>\$ 25.53</u>	<u>1,835</u>	<u>\$ 27.85</u>	<u>2,017</u>	<u>\$ 27.70</u>

As of January 3, 2026, there was \$13.8 million of total unrecognized compensation cost related to nonvested performance-contingent restricted stock granted under the Omnibus Plan. This cost is expected to be recognized over a weighted-average period of 1.66 years.

Time-Based Restricted Stock Units

Certain key employees have been granted time-based restricted stock units ("TBR SU Shares"). These awards vest on the fifth of January each year in equal installments generally over a three-year period. Dividends earned on shares are held by the company during the vesting period and paid in cash when the awards vest and shares are distributed.

On January 1, 2026, the company's chief financial officer ("CFO") was granted TBR SU Shares of approximately \$1.4 million pursuant to the Omnibus Plan. The award will vest equally over four years starting on January 5, 2027 and ending on January 5, 2030 provided the CFO remains employed by the company during this period. Vesting will also occur in the event of the CFO's death or disability, but not his retirement if prior to the vesting date. Dividends will accrue on the award and will be paid to the CFO on the vesting date for all shares that vest. There were 128,680 shares issued for this award at a fair value of \$10.88 per share.

On May 23, 2019, the company's CEO was granted TBR SU Shares of approximately \$1.0 million pursuant to the Omnibus Plan. This award vested 100% during the second quarter of Fiscal 2023. Dividends accrued on the award and were paid to the CEO on the vesting date. There were 43,330 shares issued for this award at a fair value of \$23.08 per share.

The following TBR SU Shares have been granted under the Omnibus Plan and have service periods remaining (amounts in thousands, except price data):

Grant Date	Shares Granted	Vesting Date	Fair Value per Share
1/1/2023	220	Equally over 3 years	\$ 28.74
2/27/2023	11	1/5/2024	\$ 28.33
9/1/2023	54	Equally over 3 years	\$ 23.04
9/17/2023	10	Equally over 3 years	\$ 22.90
12/31/2023	818	Equally over 3 years	\$ 22.51
2/16/2024	7	Equally over 3 years	\$ 22.42
7/14/2024	23	Equally over 3 years	\$ 21.92
12/29/2024	915	Equally over 3 years	\$ 20.42
1/1/2026	129	Equally over 4 years	\$ 10.88

The TBR SU Shares activity for Fiscal 2025, 2024 and 2023 is set forth below (amounts in thousands, except price data):

	Fiscal 2025		Fiscal 2024		Fiscal 2023	
	Number of Shares	Weighted Average Fair Value	Number of Shares	Weighted Average Fair Value	Number of Shares	Weighted Average Fair Value
Nonvested shares at beginning of year	987	\$ 23.56	473	\$ 26.67	462	\$ 24.62
Granted	1,044	\$ 19.24	848	\$ 22.51	295	\$ 27.47
Vested	(397)	\$ 23.93	(255)	\$ 25.75	(251)	\$ 23.78
Forfeitures	(90)	\$ 21.46	(79)	\$ 24.07	(33)	\$ 26.87
Nonvested shares at end of year	<u>1,544</u>	\$ 20.57	<u>987</u>	\$ 23.56	<u>473</u>	\$ 26.67

Deferred Stock

Non-employee directors may convert their annual board retainers into deferred stock equal in value to 100% of the cash payments directors would otherwise receive and the vesting period is a one-year period to match the period of time that cash would have been received if no conversion existed. Accumulated dividends are paid upon delivery of the shares. During Fiscal 2025, non-employee directors elected to receive, and were granted, an aggregate grant of 7,299 common shares for board retainer deferrals pursuant to the Omnibus Plan which common shares vested on January 1, 2026. During Fiscal 2024, non-employee directors elected to receive, and were granted, an aggregate grant of 6,663 common shares for board retainer deferrals pursuant to the Omnibus Plan which vested during the first quarter of Fiscal 2025. Non-employee directors received 10,384 shares of previously vested deferred board retainer deferrals during Fiscal 2025.

Non-employee directors also receive annual grants of deferred stock. This deferred stock vests one year from the grant date. The deferred stock will be distributed to the grantee at a time designated by the grantee at the date of grant. Compensation expense is recorded on this deferred stock over the one-year vesting period. During the second quarter of Fiscal 2025, non-employee directors were granted 93,500 shares for their annual grant pursuant to the Omnibus Plan. During the second quarter of Fiscal 2024, non-employee directors were granted 72,270 shares, of which 32,850 were deferred, for their annual grant pursuant to the Omnibus Plan that vested during the second quarter of Fiscal 2025. Additionally, during the third quarter of Fiscal 2025, an aggregate of 7,900 shares were granted to a newly elected non-employee director, representing a prorated portion of the annual grant pursuant to the Omnibus Plan. Non-employee directors received 11,750 shares of previously deferred annual grant awards during Fiscal 2025.

Compensation expense is recorded on deferred stock over the vesting period.

The deferred and restricted stock activity for Fiscal 2025, 2024, and 2023 is set forth below (amounts in thousands, except price data):

	Fiscal 2025		Fiscal 2024		Fiscal 2023	
	Number of Shares	Weighted Average Fair Value	Number of Shares	Weighted Average Fair Value	Number of Shares	Weighted Average Fair Value
Nonvested shares at beginning of year	79	\$ 23.52	68	\$ 26.26	62	\$ 27.37
Granted	109	\$ 16.60	77	\$ 23.38	68	\$ 26.26
Vested	(86)	\$ 23.27	(66)	\$ 25.70	(62)	\$ 27.37
Nonvested shares at end of year	102	\$ 16.32	79	\$ 23.52	68	\$ 26.26
Vested and deferred shares at end of year (1)	243		218		214	

- (1) The vested and deferred shares at the end of the year include 50,597 shares, 58,772 shares, and 71,237 shares granted and deferred under the EPIP for Fiscal 2025, Fiscal 2024, and Fiscal 2023, respectively. The vested and deferred shares at the end of the year include 192,560 shares, 159,335 shares, and 142,582 shares granted and deferred under the Omnibus Plan for Fiscal 2025, Fiscal 2024, and Fiscal 2023, respectively.

As of January 3, 2026, there was \$0.7 million of total unrecognized compensation cost related to deferred and restricted stock awards. This cost is expected to be recognized over a weighted-average period of 0.38 years. The intrinsic value of deferred stock awards that vested during Fiscal 2025 was \$1.4 million. There was an immaterial tax shortfall on the exercise of deferred share awards during Fiscal 2025.

Share-Based Payments Compensation Expense Summary

The following table summarizes the company's stock-based compensation expense, which was primarily recognized in selling, distribution, and administrative expense, for Fiscal 2025, 2024, and 2023 (amounts in thousands):

	Fiscal 2025	Fiscal 2024	Fiscal 2023
Performance-contingent restricted stock awards	\$ 16,482	\$ 18,076	\$ 19,654
TBRUS shares	13,994	9,871	6,381
Deferred stock awards	1,834	1,796	910
Total stock-based compensation expense	\$ 32,310	\$ 29,743	\$ 26,945

Note 20. Earnings Per Share

The following is a reconciliation of net income and weighted average shares for calculating basic and diluted earnings per common share for Fiscal 2025, 2024, and 2023 (amounts in thousands, except per share data):

	Fiscal 2025	Fiscal 2024	Fiscal 2023
Net income	\$ 83,825	\$ 248,116	\$ 123,416
Basic Earnings Per Common Share:			
Basic weighted average shares outstanding per common share	211,343	211,023	211,630
Basic earnings per common share	\$ 0.40	\$ 1.18	\$ 0.58
Diluted Earnings Per Common Share:			
Basic weighted average shares outstanding per common share	211,343	211,023	211,630
Add: Shares of common stock assumed issued upon vesting of performance-contingent restricted stock and deferred stock	764	1,114	1,726
Diluted weighted average shares outstanding per common share	212,107	212,137	213,356
Diluted earnings per common share	\$ 0.40	\$ 1.17	\$ 0.58

There were 1,839,440 anti-dilutive shares for Fiscal 2025. There was an immaterial amount of anti-dilutive shares for Fiscal 2024 and 287,510 anti-dilutive shares for Fiscal 2023.

Note 21. Postretirement Plans

The following summarizes the company's balance sheet related pension and other postretirement benefit plan accounts at January 3, 2026 and December 28, 2024 (amounts in thousands):

	January 3, 2026	December 28, 2024
Noncurrent benefit asset	\$ 4,065	\$ 6,869
Current benefit liability	\$ 779	\$ 703
Noncurrent benefit liability	\$ 8,603	\$ 5,511
AOCI, net of tax	\$ (4,995)	\$ (257)

No contributions were made by the company to any plan during Fiscal 2025 or Fiscal 2024. The company made contributions of \$1.0 million to the Flowers Foods, Inc. Retirement Plan No. 2 ("Plan No. 2") during Fiscal 2023.

Pension Plan

The company maintains a trustee, noncontributory defined benefit pension plan that covers a small number of certain union employees. The benefits in this plan are based on years of service and the employee's career earnings. This qualified plan is funded at amounts deductible for income tax purposes but not less than the minimum funding required by the Employee Retirement Income Security Act of 1974 ("ERISA") and the Pension Protection Act of 2006 ("PPA"). The company also has an immaterial unqualified plan excluded from the disclosures herein.

The company recognizes settlement accounting charges, which accelerates recognition of a plan's unrecognized net gain or loss, when the ongoing lump sum payments from the plan exceed the sum of the plan's service cost and interest cost. During Fiscal 2025, no settlement charge was recorded because the company did not exceed the settlement accounting threshold. During the fourth quarter of Fiscal 2024, the company determined it was probable a settlement would occur and paid lump sums that exceeded that threshold and, as a result, the company recorded a settlement charge of \$0.2 million in the fourth quarter of Fiscal 2024. There was also no settlement charge during Fiscal 2023.

The company uses a calendar year end for the measurement date since the plans are based on a calendar year and because it approximates the company's fiscal year end. As of December 31, 2025 and December 31, 2024, the assets of the qualified plans included certificates of deposit, marketable equity securities, mutual funds, corporate and government debt securities, other diversifying strategies and annuity contracts. The company expects pension cost of approximately \$0.7 million for Fiscal 2026.

The net periodic pension cost (income) for the company's pension plan includes the following components for Fiscal 2025, 2024, and 2023 (amounts in thousands):

	Fiscal 2025	Fiscal 2024	Fiscal 2023
Service cost	\$ 608	\$ 728	\$ 682
Interest cost	1,083	1,088	1,207
Expected return on plan assets	(1,380)	(1,604)	(1,561)
Settlement loss	—	241	—
Amortization:			
Prior service cost	27	57	57
Actuarial loss	—	42	173
Net periodic pension cost	<u>338</u>	<u>552</u>	<u>558</u>
Other changes in plan assets and benefit obligations recognized in OCI:			
Current year actuarial loss (gain)	2,493	(588)	(920)
Settlement loss	—	(241)	—
Amortization of prior service cost	(27)	(57)	(57)
Amortization of actuarial loss	—	(42)	(173)
Total recognized in OCI	<u>2,466</u>	<u>(928)</u>	<u>(1,150)</u>
Total recognized in net periodic benefit and OCI	<u>\$ 2,804</u>	<u>\$ (376)</u>	<u>\$ (592)</u>

Actual return on plan assets for Fiscal 2025, 2024, and 2023 was \$1.1 million, \$1.8 million, and \$3.3 million, respectively.

The funded status and the amounts recognized in the Consolidated Balance Sheets for the company's pension plan are as follows (amounts in thousands):

	January 3, 2026	December 28, 2024
Change in benefit obligation:		
Benefit obligation at beginning of year	\$ 20,987	\$ 22,910
Service cost	608	728
Interest cost	1,083	1,088
Actuarial (gain) loss	2,216	(428)
Benefits paid	(2,331)	(1,265)
Settlements	—	(2,046)
Benefit obligation at end of year	<u>\$ 22,563</u>	<u>\$ 20,987</u>
Change in plan assets:		
Fair value of plan assets at beginning of year	\$ 27,856	\$ 29,404
Actual return on plan assets	1,103	1,763
Employer contribution	—	—
Benefits paid	(2,331)	(1,265)
Settlements	—	(2,046)
Fair value of plan assets at end of year	<u>\$ 26,628</u>	<u>\$ 27,856</u>
Funded status, end of year:		
Fair value of plan assets	\$ 26,628	\$ 27,856
Benefit obligations	(22,563)	(20,987)
Funded status and amount recognized at end of year	<u>\$ 4,065</u>	<u>\$ 6,869</u>
Amounts recognized in the balance sheet:		
Noncurrent asset	\$ 4,065	\$ 6,869
Current liability	—	—
Noncurrent liability	—	—
Amount recognized at end of year	<u>\$ 4,065</u>	<u>\$ 6,869</u>
Amounts recognized in AOCI:		
Net actuarial loss before taxes	\$ 4,961	\$ 2,468
Prior service cost before taxes	0	27
Amount recognized at end of year	<u>\$ 4,961</u>	<u>\$ 2,495</u>
Accumulated benefit obligation at end of year	<u>\$ 21,452</u>	<u>\$ 20,059</u>

The actuarial gain/(loss) on defined benefit obligations of the employer due to experience, including any assumption changes, different from assumed, and the reasons for such (gain)/loss, can be found in the table below for Fiscal 2025, 2024 and 2023 (amounts in thousands).

	Amount of (Gain)/Loss on Defined Benefit Obligation	Reasons for (Gain)/Loss
Fiscal 2025	\$ 2,348	Loss from decrease in general level of interest rates used to measure defined benefit plan obligations (approximately 20 basis points).
Fiscal 2024	\$ (562)	Gain from increase in general level of interest rates used to measure defined benefit plan obligations (approximately 50 basis points).
Fiscal 2023	\$ 953	Loss from decrease in general level of interest rates used to measure defined benefit plan obligations (approximately 33 basis points).

Assumptions used in accounting for the company's pension plan at each of the respective fiscal years ending are as follows:

	<u>Fiscal 2025</u>	<u>Fiscal 2024</u>	<u>Fiscal 2023</u>
Weighted average assumptions used to determine benefit obligations:			
Measurement date	12/31/2025	12/31/2024	12/31/2023
Discount rate	5.67%	5.84%	5.35%
Rate of compensation increase	3.00%	3.00%	3.00%
Weighted average assumptions used to determine net periodic benefit cost/(income):			
Measurement date	1/1/2025	1/1/2024	1/1/2023
Discount rate	5.84%	5.35%	5.67%
Expected return on plan assets	5.30%	5.90%	5.90%
Rate of compensation increase	3.00%	3.00%	3.00%

In developing the expected long-term rate of return on plan assets at each measurement date, the company considers the plan assets' historical actual returns, targeted asset allocations, and the anticipated future economic environment and long-term performance of individual asset classes, based on the company's investment strategy. While appropriate consideration is given to recent and historical investment performance, the assumption represents management's best estimate of the long-term prospective return. Further, pension costs do not include an explicit expense assumption, and therefore the return on assets rate reflects the long-term expected return, net of expenses.

Based on these factors the expected long-term rate of return assumption for Plan No. 2 was set at 5.3% for Fiscal 2026. This rate is net of administrative expenses paid from the trust, assumed to be 1.2% per annum. The average annual return on the plan assets over the last 15 years (while the assets were collectively managed) was approximately 6.5% (net of expenses).

Plan Assets

The investment committee, which consists of certain members of management, establishes investment guidelines and strategies and regularly monitors the performance of the plans' assets. The investment committee is responsible for executing these strategies and investing the pension assets in accordance with ERISA and fiduciary standards. The investment objective of the pension plans is to preserve the plans' capital and maximize investment earnings within acceptable levels of risk and volatility. The investment committee meets on a regular basis with its investment advisors to review the performance of the plans' assets. Based upon performance and other measures and recommendations from its investment advisors, the investment committee rebalances the plans' assets to the targeted allocation when considered appropriate. The fair values of all of the company's pension plan assets at December 31, 2025 and December 31, 2024, by asset class are as follows (amounts in thousands):

Asset Class	<u>Fair value of Pension Plan Assets as of December 31, 2025</u>			
	<u>Quoted prices in active markets for identical assets (Level 1)</u>	<u>Significant Observable Inputs (Level 2)</u>	<u>Significant Unobservable Inputs (Level 3)</u>	<u>Total</u>
Short term investments and cash	\$ 301	\$ —	\$ —	\$ 301
Common stocks:				
International common stocks	2,180	—	—	2,180
U.S. common stocks	3,963	—	—	3,963
Fixed income securities:				
U.S. government bonds	—	—	—	—
U.S. government agency bonds	—	—	—	—
U.S. corporate bonds	—	20,184	—	20,184
Pending transactions(*)	—	—	—	—
Accrued (expenses) income(*)	—	—	—	—
Total	\$ 6,444	\$ 20,184	\$ —	\$ 26,628

Asset Class	Fair value of Pension Plan Assets as of December 31, 2024			
	Quoted prices in active markets for identical assets (Level 1)	Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
Short term investments and cash	\$ 214	\$ —	\$ —	\$ 214
Common stocks:				
International common stocks	2,022	—	—	2,022
U.S. common stocks	4,190	—	—	4,190
Fixed income securities:				
U.S. government bonds	—	—	—	—
U.S. government agency bonds	—	—	—	—
U.S. corporate bonds	—	21,430	—	21,430
Pending transactions(*)	—	—	—	—
Accrued (expenses) income(*)	—	—	—	—
Total	\$ 6,426	\$ 21,430	\$ —	\$ 27,856

(*) This class includes accrued interest, dividends, and amounts receivable from asset sales and amounts payable for asset purchases.

The company's investment policy includes various guidelines and procedures designed to ensure the plan's assets are invested in a manner necessary to meet expected future benefits earned by participants. The investment guidelines consider a broad range of economic conditions.

The plan asset allocation as of the measurement dates December 31, 2025 and December 31, 2024, and target asset allocations for Fiscal 2026 are as follows for Plan No. 2:

Asset Category	Target Allocation 2026	Percentage of Plan Assets at the Measurement Date (As percent)	
		2025	2024
Equity securities	23%	23	22
Fixed income securities	75%	76	77
Short term investments and cash	2%	1	1
Total		100.0	100.0

The objectives of the target allocations are to maintain investment portfolios that diversify risk through prudent asset allocation parameters, achieve asset returns that meet or exceed the plans' actuarial assumptions, and achieve asset returns that are competitive with like institutions employing similar investment strategies.

Cash Flows

All contributions are made in cash. During Fiscal 2025 and 2024, there were no required or discretionary contributions made to Plan 2. During Fiscal 2023, there were no required contributions, but the company did make a discretionary of \$1.0 million to Plan 2. During Fiscal 2026, the company does not expect to make any cash contributions to Plan No. 2; however, the company may make a discretionary contribution if appropriate based on cash, tax or other considerations. These amounts represent estimates that are based on assumptions that are subject to change.

Benefit Payments

The following are benefits paid under the plan (including settlements) during Fiscal 2025, 2024, and 2023 and expected to be paid from Fiscal 2026 through Fiscal 2035. Estimated future payments include qualified pension benefits that will be paid from the plans' assets (amounts in thousands):

<u>Year</u>	<u>Pension Benefits</u>
2023	\$ 3,015 *
2024	\$ 1,265 ^
2025	\$ 2,331 +
Estimated Future Payments:	
2026	\$ 4,014
2027	\$ 1,958
2028	\$ 1,737
2029	\$ 1,659
2030	\$ 1,624
2031-2035	\$ 7,019

* Includes \$1.7 million from Plan No. 2 paid as lump sums.

^ Includes \$2.0 million from Plan No. 2 paid as lump sums.

+ Includes \$1.1 million from Plan No. 2 paid as lump sums.

Postretirement Benefit Plans

The company sponsors postretirement benefit plans that provide health care and life insurance benefits to retirees who meet certain eligibility requirements. Generally, this includes employees who have reached age 55 with 65 points (age plus service) and participate in a Flowers retirement plan. Retiree medical coverage is provided for a period of three to five years, depending on the participant's age and service at retirement. Participant premiums are determined using COBRA premium levels. Retiree life insurance benefits are offered to a closed group of retirees. The company also sponsors a medical, dental, and life insurance benefits plan to a limited and closed group of participants.

The company delivers retiree medical and dental benefits for Medicare eligible retirees through a health-care reimbursement account. The company no longer sponsors a medical plan for Medicare eligible retirees and does not file for a Medicare Part D subsidy.

The unfunded status of the plans was \$7.8 million and \$4.6 million at January 3, 2026 and December 28, 2024, respectively.

Multiemployer Plans

The company contributes to a MEPP under the terms of a collective-bargaining agreement that cover various union-represented employees. The risks of participating in this MEPP are different from single-employer plans. Assets contributed to the MEPP by one employer may be used to provide benefits to employees of other participating employers. If a participating employer stops contributing to the plan, the unfunded obligations of the plan may be borne by the remaining participating employers. If we choose to stop participating in the MEPP, we may be required to pay the plan an amount based on the underfunded status of the plan, referred to as a withdrawal liability. None of the contributions to the pension fund was in excess of 5% or more of the total contributions for plan years 2025, 2024, and 2023. There are no contractually required minimum contributions to the plans as of January 3, 2026.

Subsequent to Fiscal 2022, the Western Conference of Teamsters (EIN: 91-6145047) is the company's only remaining MEPP. This is a level green zone status plan. The current collective bargaining agreement expires on February 7, 2027. The company's contributions to the MEPPs were \$0.3 million for Fiscal 2025, Fiscal 2024, and Fiscal 2023.

On July 19, 2022, the company announced the closure of the Holsum Bakery in Phoenix, Arizona. The bakery produced bread and bun products and ceased production on October 31, 2022. As a result, the union participants of the IAM National Pension Fund (the "IAM Fund") at the Phoenix bakery will withdraw from the IAM Fund. During the third quarter of Fiscal 2022, the company recorded a liability of \$1.3 million for the withdrawal from the IAM Fund. During the first quarter of Fiscal 2024, the company paid \$1.4 million for the withdrawal and recorded additional expense of \$0.1 million which is included in the selling, distribution and administrative expenses line item of our Consolidated Statements of Income. The additional withdrawal liability period ended on July 19, 2025, and no additional costs were incurred.

401(k) Retirement Savings Plans

The Flowers Foods 401(k) Retirement Savings Plan covers substantially all of the company's employees who have completed certain service requirements. During Fiscal 2025, 2024, and 2023, the total cost and employer contributions were as follows (amounts in thousands):

<u>Contributions by fiscal year</u>	<u>Defined contribution plans expense</u>
Fiscal 2025	\$ 35,490
Fiscal 2024	\$ 33,312
Fiscal 2023	\$ 31,378

Note 22. Income Taxes

The company's provision for income tax expense (benefit) consists of the following for Fiscal 2025, 2024, and 2023 (amounts in thousands):

	<u>Fiscal 2025</u>	<u>Fiscal 2024</u>	<u>Fiscal 2023</u>
Current Taxes:			
Federal	\$ 9,143	\$ 41,406	\$ 63,351
State	7,941	8,466	13,680
	<u>17,084</u>	<u>49,872</u>	<u>77,031</u>
Deferred Taxes:			
Federal	16,057	24,029	(36,474)
State	(1,898)	6,925	(6,866)
	<u>14,159</u>	<u>30,954</u>	<u>(43,340)</u>
Income tax expense	<u>\$ 31,243</u>	<u>\$ 80,826</u>	<u>\$ 33,691</u>

Income tax expense differs from the amount computed by applying the applicable U.S. federal income tax rate of 21% because of the effect of the following items for Fiscal 2025, 2024 and 2023 (amounts in thousands, except percentages):

	<u>Fiscal 2025</u>		<u>Fiscal 2024</u>		<u>Fiscal 2023</u>	
	<u>Dollars</u>	<u>%</u>	<u>Dollars</u>	<u>%</u>	<u>Dollars</u>	<u>%</u>
Tax at U.S. federal income tax rate	\$ 24,164	21.0	\$ 69,078	21.0	\$ 32,992	21.0
State income taxes, net of federal income tax benefit (a), (b), (c)	4,774	4.2	12,158	3.7	5,383	3.4
Tax credits:						
Research and development tax credit	(2,200)	(1.9)	(2,200)	(0.7)	(2,200)	(1.4)
Other federal tax credits	(671)	(0.6)	(492)	(0.1)	(455)	(0.3)
	<u>(2,871)</u>	<u>(2.5)</u>	<u>(2,692)</u>	<u>(0.8)</u>	<u>(2,655)</u>	<u>(1.7)</u>
Nontaxable or nondeductible items:						
Excess executive compensation	1,514	1.3	3,175	1.0	1,950	1.2
Net share-based payments shortfalls (windfalls)	2,617	2.3	97	0.0	(1,960)	(1.2)
Acquisition costs	2,002	1.7	—	—	—	—
Other	(957)	(0.8)	(990)	(0.3)	(2,019)	(1.3)
	<u>5,176</u>	<u>4.5</u>	<u>2,282</u>	<u>0.7</u>	<u>(2,029)</u>	<u>(1.3)</u>
Income tax expense	<u>\$ 31,243</u>	<u>27.2</u>	<u>\$ 80,826</u>	<u>24.6</u>	<u>\$ 33,691</u>	<u>21.4</u>

- (a) During Fiscal 2025 state taxes in California, Georgia, Texas, and Utah made up the majority (greater than 50 percent) of the tax effect in this category.
- (b) During Fiscal 2024 state taxes in California, Florida, Georgia, Pennsylvania, and Texas made up the majority (greater than 50 percent) of the tax effect in this category.
- (c) During Fiscal 2023 state taxes in California, Pennsylvania, and Texas made up the majority (greater than 50 percent) of the tax effect in this category.

In Fiscal 2025, 2024 and 2023, the most significant difference in the effective rate and the statutory rate was state income taxes.

Deferred tax assets (liabilities) are comprised of the following (amounts in thousands):

	<u>January 3, 2026</u>	<u>December 28, 2024</u>
Self-insurance	\$ 8,317	\$ 7,593
Compensation and employee benefits	11,167	10,844
Deferred income	1,689	1,976
Loss and credit carryforwards	18,414	13,065
Equity-based compensation	7,976	7,554
Legal accrual	82	5,855
Pension and postretirement benefits	1,342	—
Financing and operating lease right-of-use liabilities	81,096	79,868
Capitalized software and research and development costs	14,270	32,484
Other	13,482	12,579
Valuation allowance	(4,071)	(3,387)
Deferred tax assets	<u>153,764</u>	<u>168,431</u>
Depreciation	(75,452)	(72,503)
Intangibles	(237,086)	(132,506)
Financing and operating lease right-of-use assets	(80,027)	(78,723)
Hedging	(1,290)	(2,371)
Pension and postretirement benefits	—	(137)
Other	(6,868)	(6,424)
Deferred tax liabilities	<u>(400,723)</u>	<u>(292,664)</u>
Net deferred tax liability	<u>\$ (246,959)</u>	<u>\$ (124,233)</u>

In Fiscal 2023, the company recorded a deferred tax asset, in the amount of \$33.4 million, related to an accrued legal settlement related to the repurchase of distribution rights. During Fiscal 2025 and 2024 a significant portion of this deferred tax asset has reversed, and the remaining balance is expected to reverse during 2026. See Note 23, *Commitments and Contingencies*, for details of this settlement.

During Fiscal 2025, new tax legislation was enacted under the One Big Beautiful Bill Act (the “Act”). The Act includes a wide range of tax provisions that impact the company’s financial results in 2025 and future periods. Significant impacts stemming from the Act include 2025 and future expensing of U.S. based research and development expenditures under Internal Revenue Code Section 174, coupled with the option to deduct previously capitalized research and development expenditures. The company has accounted for this change in legislation by electing to deduct the previously capitalized U.S. based research and development expenditures over Fiscal 2025 and 2026, resulting in an approximate \$23.0 million deferred tax asset reversal each year. The Act also reestablished elective 100% initial-year bonus depreciation.

The company has a deferred tax asset of \$3.6 million related to a federal net operating loss carryforward which we expect to fully utilize before expiration. Additionally, the company and various subsidiaries have a deferred tax asset of \$8.1 million related to state net operating loss carryforwards with expiration dates from Fiscal 2026 through Fiscal 2045, and \$6.7 million for credit carryforwards with expiration dates from Fiscal 2028 through Fiscal 2035. The utilization of a portion of these state carryforwards could be limited in the future; therefore, a valuation allowance of \$4.1 million has been recorded. Should the company determine at a later date that certain of these losses which have been reserved for may be utilized, a benefit may be recognized in the Consolidated Statements of Income. Likewise, should the company determine at a later date that certain of these net operating losses for which a deferred tax asset has been recorded may not be utilized, a charge to the Consolidated Statements of Income may be necessary. See Note 2, *Summary of Significant Accounting Policies*, for the deferred tax asset valuation allowance analysis.

During Fiscal 2025, income taxes paid, net of refunds, totaled \$29.0 million. The income taxes paid to a jurisdiction that represent greater than 5% of the total income taxes paid are as follows (amounts in thousands):

	Fiscal 2025	Fiscal 2024	Fiscal 2023
Income taxes paid:			
Federal	\$ 19,976	\$ 37,000	\$ 79,118
California	1,971	—	—
Texas	1,557	—	—
Other (individually below 5% of total income taxes paid)	5,539	9,379	20,000
Income taxes paid, net of refunds	<u>\$ 29,043</u>	<u>\$ 46,379</u>	<u>\$ 99,118</u>

The company did not have any unrecognized tax benefits for fiscal years 2025, 2024, and 2023. At this time, we do not anticipate significant changes to the amount of gross unrecognized tax benefits over the next twelve months.

The company accrues interest expense and penalties related to income tax liabilities as a component of income before taxes. No accrual of penalties is reflected on the company's balance sheet as the company believes the accrual of penalties is not necessary based upon the merits of its income tax positions. The company had no accrued interest balance at January 3, 2026 and December 28, 2024.

The company defines the federal jurisdiction as well as various state jurisdictions as "major" jurisdictions. The company is no longer subject to federal examinations for years prior to 2022, and with limited exceptions, for years prior to 2021 in state jurisdictions.

Note 23. Commitments and Contingencies

Self-insurance reserves and other commitments and contingencies

The company has recorded current liabilities of \$37.2 million and \$34.4 million related to self-insurance reserves at January 3, 2026 and December 28, 2024, respectively. The reserves include an estimate of expected settlements on pending claims, defense costs and a provision for claims incurred but not reported. These estimates are based on the company's assessment of potential liability using an analysis of available information with respect to pending claims, historical experience and current cost trends.

In the event the company ceases to utilize the independent distributor model or exits a geographic market, the company is contractually required in some situations to purchase the distribution rights from the independent distributor. The company expects to continue operating under this model and has concluded that the possibility of a loss is remote.

The company's facilities are subject to various federal, state and local laws and regulations regarding the discharge of material into the environment and the protection of the environment in other ways. The company is not a party to any material proceedings arising under these regulations. The company believes that compliance with existing environmental laws and regulations will not materially affect the consolidated financial condition, results of operations, cash flows or the competitive position of the company. The company believes it is currently in substantial compliance with all material environmental regulations affecting the company and its properties.

Litigation

The company and its subsidiaries from time to time are parties to, or targets of, lawsuits, claims, investigations and proceedings, including personal injury, commercial, contract, environmental, antitrust, product liability, health and safety and employment matters, which are being handled and defended in the ordinary course of business. While the company is unable to predict the outcome of these matters, it believes, based upon currently available facts, that it is remote that the ultimate resolution of any such pending matters will have a material adverse effect on its overall financial condition, results of operations or cash flows in the future. However, adverse developments could negatively impact earnings in a particular future fiscal period.

At this time, the company is defending ten complaints filed by IDPs alleging that they were misclassified as independent contractors. Six of these lawsuits seek class and/or collective action treatment. The remaining four cases either allege individual claims or do not seek class or collective action treatment or, in cases in which class treatment was sought, the court denied class certification. The respective courts have ruled on plaintiffs' motions for class certification in two of the pending cases, which are

discussed below. Unless otherwise noted, a class was conditionally certified under the FLSA in each of the cases described below, although the company has the ability to petition the court to decertify that class at a later date:

Case Name	Case No.	Venue	Date Filed	Status
Martins v. Flowers Foods, Inc., Flowers Baking Co. of Bradenton, LLC and Flowers Baking Co. of Villa Rica, LLC	8:16-cv-03145	U.S. District Court Middle District of Florida	11/8/2016	On November 25, 2024, the court denied defendants' motion to decertify the FLSA collective action.
Salgado v. Flowers Foods, Inc. and Holsum Bakery, Inc.	4:22-cv-00420	U.S. District Court District of Arizona	9/15/2022	

The company and/or its respective subsidiaries contests the allegations and are vigorously defending all of these lawsuits. Given the stage of the complaints and the claims and issues presented, except for lawsuits disclosed herein that have reached a settlement or agreement in principle, the company cannot reasonably estimate at this time the possible loss or range of loss that may arise from the unresolved lawsuits.

The company has settled, and the appropriate court has approved, the following collective and/or class action lawsuits filed by distributors alleging that such distributors were misclassified as independent contractors. In each of these settlements, in addition to the monetary terms noted below, the settlements also included certain non-economic terms intended to strengthen and enhance the independent contractor model. The list below details settled collective and/or class action lawsuits that impacted the company's presented financial statements since Fiscal 2023:

Case Name	Case No.	Venue	Date Filed	Comments
Ludlow et al. v. Flowers Foods, Inc., Flowers Bakeries, LLC and Flowers Finance, LLC	3:18-cv-01190	U.S. District Court Southern District of California	6/6/2018	On March 18, 2024, the court approved a settlement to settle this lawsuit and two companion cases – Maciel et al. v. Flowers Foods, Inc. et al., No. 3:20-cv-02059-JO-JLB (U.S. District Court for the Southern District of California) and Maciel v. Flowers Foods, Inc. et al., No. 20-CIV-02959 (Superior Court of San Mateo County, California). The settlement provides for a \$55 million common fund, which was paid during the second quarter of Fiscal 2024, to cover settlement payments to a class of approximately 475 plaintiffs, service awards, attorneys' fees and settlement administration expenses. The settlement also required a phased repurchase of distribution rights associated with approximately 350 territories in California. The company now services its California market with an employment model. The repurchase of distribution rights was completed in the second quarter of Fiscal 2025. The repurchase cost of the 350 territories, along with 50 additional California territories that are not part of the settlement, was \$79.0 million (of which \$65.3 million was originally included in other accrued liabilities and the remaining \$14.9 million in a contra account to notes receivable). These amounts were recorded in the selling, distribution, and administrative expenses line item of the Consolidated Statements of Income during Fiscal 2023, net of an adjustment recorded during the first quarter of Fiscal 2025 of \$1.2 million.

See Note 15, *Debt and Other Commitments*, for additional information on the company's commitments.

Note 24. Subsequent Events

The company has evaluated subsequent events since January 3, 2026, the date of these financial statements. We believe there were no material events or transactions discovered during this evaluation that requires recognition or disclosure in the financial statements other than the items discussed below.

Dividend. On February 20, 2026, the Board of Directors declared a dividend of \$0.2475 per share on the company's common stock to be paid on March 20, 2026 to shareholders of record on March 6, 2026.
